Anthony Wayne Arnold, Building Engineer, Columbine High School (CHS), was interviewed at CHS. After being advised of the identity of the Special Agent and the nature of the interview, Arnold provided the following information:

Arnold said he has been the Building Supervisor at CHS for approximately two years and has worked for the Jefferson County School District for approximately nine years, at a variety of Jefferson County Schools as a building custodian.

Arnold described the video taping system that was in place in the cafeteria as consisting of four cameras located at the northeast corner near the soda machines, the northwest corner near the entrance to the faculty lounge, the southwest corner located above the windows, and at the southeast corner near the stairway. All cameras are set to point into the cafeteria area and operate on a clockwise "rollover" system. Each camera terminates at a VCR which is located in a custodial closet in an area east of the cafeteria. Arnold and one of his subordinates, Jay Galientine, are the individuals that usually change the tapes. Arnold showed the interviewing Agent the location of the closet and the cameras.

Arnold said the purpose of the taping system is to document activity in the cafeteria, especially students leaving trash at the tables. Arnold said it is his procedure to periodically review the tapes to see if there is any trash located in the cafeteria and if trash is discovered to review the tape to find out which group of students left the trash, and then try to identify those students and have them clean up their mess. Arnold said that if he finds trash on a tape he will generally pull that tape out of the VCR and place it on top for later review.

On April 20, 1999, Arnold said he believes he started the tape in the morning between 7:00 am and 8:00 pm, then probably reviewed the tapes sometime between 10:00 am and 11:00 am, and may have seen trash or an object on the table and removed that tape and re-inserted another. He said he would have unlocked the door at approximately 11:10 am, and put in another

by SSA Ronald E. Knight/dma

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency;

re-wound tape to record lunchtime activity since that is a high volume time in the cafeteria.

He definitely remembers changing the tape before lunchtime, but is less sure whether or not he changed the tape several hours earlier. He said he probably did but has no specific knowledge of changing the tape between 10:00 am and 11:00 am.

Arnold said that the normal procedure is for Jay Gallentine to do a walk-through after each class period when classes occupy the cafeteria, and he believes that Gallentine would have done a walk-through at around 10:15 am. Arnold said he is sure that the door to the custodial closet where the VCR is kept was locked each time he went there on April 20, 1999.

Arnold said that on April 20, 1999, after the tape change which he believes would have occurred around 10:30 am, he went into the kitchen, got his lunch and went to his office where he ate lunch with John Curtis and Jay Gallentine. After lunch he returned to the custodial closet between 11:10 am, and 11:15 am, and changed the tape. After the tape change he walked back into the kitchen and heard Gallentine's voice on the radio saying words to the effect that he needed Neil Gardner, whom Arnold identified as the campus security policeman, in the west parking lot. Arnold said Gallentine's voice was agitated so Arnold went into the cafeteria area from the west entrance and saw several students looking to the west into the parking lot.

Arnold said he saw two students laying in the parking lot that appeared to have been injured. At that time he also noticed a student on his knees outside the window area to the west with a severe facial wound. Arnold said he also saw a student laying outside the door of the cafeteria. One student wanted to pull this student in and Arnold stopped him, feeling that the student was more likely to get medical attention outside than inside. Arnold said that students both outside and inside were ducking from what Arnold thought were gunshots that appeared to be coming from the north or northwest. He said the student that had been shot in the face was also facing to the north so Arnold inferred that the threat came from that area.

Arnold then ran into the faculty lounge to ensure someone was on the telephone calling 911. Once he verified that was in fact taking place, he ran back out and found the student that had been lying down had pulled himself half in and half out of the door. At that time Arnold noticed that the student had been shot in the back and Arnold suggested that they not move him further. Arnold then went around the serving line of the cafeteria and heard and felt a large "boom" which threw him to the ground. He believes the explosion came from the cafeteria area. He said he then crawled to the kitchen where he found three cooks and two more students ducked under appliances in the kitchen. At that time he noted Jay Gallentine and John Curtis running in the vicinity of the kitchen and he could hear bits and pieces of conversation over his two-way radio from persons outside the kitchen.

At that point Arnold said things begin to quiet down somewhat so he went to the storage room and noted students had began to huddle in there, so he went back out and got the cooks and another teacher whom he believed was a social studies teacher, and helped them into the storage room. He said the social studies teacher had been wounded in the leg and was obviously in a great deal of pain. He said the teacher had been hit with something from the explosion and the teacher said it felt like he had been hit with a "full beer can."

Arnold said shooting was going on while he was in the kitchen and until the time they went into the closet. Even after they were in the closet he would hear rustling, shots and screaming from an area he thought was above the kitchen. He estimated that the shooting went on for 20 to 30 minutes and then became sporadic. Arnold did not know at any point where the shooting was coming from other than at some point it was louder and then became quieter. After approximately 1 ½ to 2 ½ hours, Arnold and the students were directed out of the closet by police officers and taken out the west door of the cafeteria. Arnold thinks that occurred at around 3:00 pm. Arnold said the day of the incident he was wearing a white T-shirt and jeans.

Arnold said that he did recall a student who was performing community service working in the cafeteria prior to the incident. Arnold said the student's name was possibly [redacted] and would be listed on a sheet in the custodian's office.

Arnold was further described as follows:

Name:	Anthony Wayne Arnold
Race:	White
Sex:	Male
Height:	5'11"
Weight:	200 pounds
Date of birth:	September 4, 1971
Social Security Account Number:	356-74-0752

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 4/26/99

Jay Gallentine, Building Custodian, Columbine High School, was telephonically interviewed. After being advised of the identity of the Special Agent and the nature of the interview, Gallentine provided the following information:

Gallentine said he is a Building Custodian at Columbine High School. His shift begins at approximately 5:00 am, and ends at around 2:00 pm. On April 20, 1999, he came to work at approximately 5:00 am. He was dropped off by his wife, Linda, and as is his usual habit, opened the gates to the parking lots. Once he had opened the gates, he entered the school through a door located on the northwest corner of the school near the cooling towers. He unlocked the janitor's office and called security to let them know he was in the building.

Gallentine remembers that he had a job he had to complete the first thing in the morning and immediately went out and changed the lettering on the marquee in front of the high school. He then changed garbage bags in front of the school. Once he had raised the flag by the turnout in front of the school, he returned to the janitor's office.

After turning on the lights in the cafeteria, he propped the eastern-most door to the cafeteria open so that the head cook, whom he identified as Linda Tiplett, could enter. He recalls that after turning the lights on he did a cursory examination of the cafeteria and at that time saw no bags or backpacks on the floor of the cafeteria.

Gallentine said it is his habit to walk through the cafeteria at the commencement of each class period during the course of his shift. He does not recall seeing any objects unattended on the floor of the cafeteria on any of his walk throughs that day. Gallentine said that if he did see an object it was his habit to put the item on the table so that the person who lost or left it could return and easily find it. He is quite certain that he would have noticed an odd shaped duffel bag or larger container during one of his walk throughs.

Gallentine did note however, that on April 20, 1999, a student who had been assigned community service was in the

Investigation on 4/25/99 at Littleton, Colorado (telephonically)

by SSA Ronald E. Knight/dma

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency; it and its contents are not to be distributed outside your agency.

cafeteria helping to sweep the floor and wipe down tables and may have seen something. Gallentine does not know the student's name.

Gallentine said that it was his job to wait at the northwest corner of the kitchen until approximately 10:30 am when he would go into the kitchen and get his lunch. On April 20, 1999, he said he was waiting at the northwest corner until approximately 10:50 am, when he went into the kitchen to prepare his lunch. Around 11:15 am, Gallentine had noticed dirty tables near the doors to the faculty lounge and was beginning to clean those tables when a young girl came running into the cafeteria and said words to the effect of, "Someones been shot." Gallentine looked out the window and saw a student laying in the parking lot close to the soccer field.

At around that time a window on the south side of the cafeteria with a Columbine symbol etched in it was blown out by either an explosion or a bullet. Gallentine screamed, "Get down" to students around him and at that time recalls hearing sporadic gunfire. Gallentine directed students to get under tables as the gunfire increased. He noticed some students were running toward the stairs and the double doors leading to the south parking lot.

Gallentine recalls hearing gunfire upstairs above the cafeteria and he went to the stairs that led to that area. He is not sure but thinks he went all the way to the music room located on the northeast side of the building where he saw students fleeing in all directions. He then retraced his steps back toward the cafeteria and library area. As he approached the top of the steps in front of the library leading to the cafeteria, he encountered a teacher he identified as Teresa Lara, who said words to the effect, "Jay, Dave Sanders has been shot. Call an ambulance." Gallentine thinks Lara also may have said that two students had been shot, but he is not sure.

Gallentine reached for his walkie-talkie and as he turned back toward the library he saw a student in a black trench coat holding a pistol and what Gallentine thought was a long barreled grenade launcher. He said the shoulder weapon was strapped across the individual's chest with the butt of the weapon on the right side of the individual's body. For a brief moment Gallentine and the subject were face-to-face and he

noticed that under the trench coat the individual appeared to be wearing a white shirt. Gallentine did not recognize the individual. Gallentine turned and ran to the landing leading to the cafeteria when he heard shooting behind him. He believed at that time the individual in the trench coat was coming down the stairs behind him.

Gallentine believes that around this time he saw John Curtis, another custodian, and Eric Krizer, whom he believes is a social studies teacher. He, Curtis and Krizer were moving toward the kitchen when he heard a large explosion behind them. Gallentine believes it was a pipe bomb and it blew Krizer down to the ground. He and Curtis picked Krizer up and carried him into the kitchen where they encountered a student, whom he identified as Dusty Hofschnieder plus three other unidentified students. Gallentine warned them back and the students went toward the storeroom area in the rear of the kitchen.

Gallentine, Curtis and Krizer huddled down behind the dishwasher table and Gallentine closed the door behind them. He is not sure why the gunman did not follow them into the kitchen. He does recall that several students insisted on leaving and left on their hands and knees out the western side of the kitchen toward the door that led to the west parking lot.

Gallentine encountered Tony Arnold, Judy Greco, and a number of other students in the northern storeroom area of the kitchen and recalls that Tony Arnold and 17 students entered the storeroom and locked themselves in. He believes the cooks were locked in their office.

Gallentine then left the kitchen and went back through the cafeteria to the auditorium and found the door unlocked. As he entered the auditorium he noticed several students sitting near the top of the auditorium and he saw a teacher whom he identified as Mr. Andris, sitting with the students. Gallentine motioned the students to come to him and all the students came down to the double doors leading into the auditorium. Gallentine told them there was an extreme emergency and to get out as quickly as possible. He believes 50 to 80 students ran out the auditorium and down what he referred to as the business hall which leads to the eastern lower section of the school.

Gallentine believes that the movement out of the auditorium drew the attention of the individual in the trench coat and as he stood at the base of the stairs he looked up and saw at least one of the individuals who was doing the shooting, coming around the corner of the stairs. Gallentine believes it was the same man he had seen in front of the library. Gallentine ran back through the cafeteria and as he ran through the cafeteria, he noticed a student lying on the floor. When he got to the end of the cafeteria Gallentine did not see the subject, so he went back upstairs and saw John Curtis near the landing of the stairs.

Gallentine again saw the shooter standing in front of the library and it is his recollection that as he and Curtis began running down the stairs together, the shooter began firing rounds at them. Gallentine said that as he and Curtis entered the kitchen an explosion occurred behind them and he could hear objects hitting the metal door on the serving line.

Once he and Curtis were on the ground in the kitchen, they crawled underneath a large industrial oven, but realized that hiding place was not secure. Around this time Gallentine heard what he described as a "whoosh" and saw fire in the vicinity of the cafeteria and the kitchen. Gallentine determined that he was in a "bad place" and moved further into the kitchen. He then entered the walk-in cooler and Curtis went into the freezer. After approximately one minute, Curtis, who was carrying a radio, called Gallentine and told him to open the door and that he was coming in the walk-in cooler. The door opened and Curtis entered the walk-in cooler.

They propped a food cart against the door and prepared several large objects to use as weapons in case the gunman opened the door. Gallentine kept trying to make contact with two individuals, whom he identified as Sid and Andy, on his radio. Gallentine said that Andy answered and Gallentine told him they were in the cooler and to tell him when it was safe to come out. Gallentine recalled hearing gunshots for a long period of time while he was in the cooler, but could not tell where they were coming from. He believes he saw shadows moving around the kitchen but did not see anyone.

Gallentine believes he heard shooting for up to an hour to an hour and thirty minutes after the initial incident. He said at one point there was approximately a 20 minute interval of silence and then the shooting began again. He recalled looking at his watch at 1:50 pm, and around that time recalls hearing shooting and then he glanced at his watch at 2:25 pm, but heard nothing.

At approximately 2:35 pm, a voice on the radio told him that the SWAT Team was outside the doors and Gallentine and Curtis came out of the cooler.

Gallentine is sure he did not change the tapes on April 20, 1999. He also said he was wearing a white T-shirt with a Columbine emblem and blue jeans. He said he is a white male, approximately 5'6 ½" and weighs 140 pounds. Gallentine is further described as follows:

Name:	Jay Gallentine
Date of birth:	July 19, 1958
Address:	20661 Willowbend Lane Parker, Colorado 80138
Telephone number:	(303) 805-8230

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 04/24/1999

At approximately 10:35 a.m. on April 24, 1999, at the Denver Federal Bureau of Investigation office, 1961 Stout Street, Suite 1823, Denver, Colorado, Christopher R. Morris positively identified Philip Joseph Duran from a physical surveillance videotape. This physical surveillance was conducted at 2594 South Tennyson Way, Denver, Colorado on April 23, 1999.

Morris was unable to identify a white male and a white female observed with Duran on the videotape.

Morris' attorney, John Richalano, was present when Morris identified Duran from the videotape.

The original physical surveillance of Duran is attached in a 1A envelope.

On May 4, 1999, James Royce Washington (**PROTECT IDENTITY**), also known as Jim Washington, 6020 Snowbird Drive, Colorado Springs, Colorado 80918, was telephonically contacted at his residence. After being advised of the identity of the interviewing agent and the nature of the interview, Washington voluntarily provided the following information:

Washington advised that at the Tanner Gun Show at the Denver Merchandise Mart in Commerce City, Colorado on the weekend of November 21 - 22, 1998, he and Ron Hartmann rented their tables from a friend of Washington's, Bruce Guthridge or Gutridge. Washington was unsure of the exact spelling of the last name.

Washington described Guthridge as being a gun dealer from the Loveland, Colorado area, northwest of Denver, who he has known for some time. He believes that Guthridge holds a Federal Firearms Dealer's license. Washington would see Guthridge at various gun shows and from time to time, he would assist Guthridge by watching his table while Guthridge went to the bathroom or to get something to eat. Due to his friendship with Guthridge, Washington advised that he and Hartmann would rent their tables at shows from him in order to help Guthridge out with the cost of the rentals.

Washington stated that inside the Merchandise Mart at the Tanner Gun Show, their tables were located near the south side of the east restrooms, in front of some telephone booths. Furthermore, he advised that Guthridge usually rented "end-cap" tables, at the corner of an aisle and they would rent one side of this set-up from him.

Zachery Adam Heckler, white male, date of birth May 1, 1981, place of birth Albany, New York, residence 5880 West Quarles Drive, Littleton, Colorado 80128, residence telephone number (303) 978-0098, Zachery's personal telephone number (303) 978-1322, Columbine High School (CHS) student number 609951, 12th grader, employed part-time by the Great American Cookie Company, Southwest Plaza Mall, 8501 West Bowles Avenue, Littleton, Colorado 80123, work telephone number (303) 979-0400, employed approximately one and one-half months, was advised of the identity of the interviewing Agents and the nature and purpose of the interview. Heckler was interviewed in the presence of his father, Mark Heckler, work telephone number (303) 556-6587, at Zachery's place of employment. Heckler provided the following information:

Heckler was being interviewed based upon his known friendship with Eric Harris and Dylan Klebold, both members of the Trenchcoat Mafia (TCM), and to his knowledge of the Columbine High School incident that occurred on April 20, 1999. Heckler stated that he had been good friends with Dylan Klebold for years. In response to the questions pertaining to his computers, he replied that he does own several computers and considers himself to be proficient in using computers.

He stated that he corresponds via the Internet on the World Wide Web via www.Concentric.Net/~kibbz. He further stated that he has played computer games with Dylan Klebold and Eric Harris. Heckler advised that Klebold did not maintain an E-mail address. Eric Harris was known to maintain an American On Line (AOL) account with the computer name of "REBDOOMER." He stated that during the summer of 1997, he stopped being friends with Eric Harris for reasons not specified. He further stated he played the computer game known as "Quake" with Klebold, which is a game on the Internet that can be played on servers anywhere. Heckler stated he "Never" played the game "Postal."

Heckler advised that he maintains two computers in his home that he described as building in class while at CHS during approximately December, 1996. He stated he downloaded information off of his computer on Tuesday, April 20, 1999, following the CHS incident. He stated he downloaded the

File # 174A-DN-57419, Jefferson County #99-7625 Date dictated 05/23/99

by SA Richard H. Price, FBI /dae

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency; it and its contents are not to be distributed outside your agency.

"Anarchist Cookbook" and other information that was then placed into a coffee can and placed behind the furnace adjacent to Zachery's bedroom. He stated he "hid" the computer disk because he was concerned with the information contained on the disk. Heckler willingly provided the whereabouts of the computer disks when asked directly regarding its content and whereabouts. He stated he did have the CHS locker combinations to all of the students maintained in his computer system.

Heckler advised that he did not have prior knowledge that Klebold and Harris were going to commit or execute such an act of violence at CHS. Heckler stated that he does not consider himself to be a member of the TCM.

Heckler stated he heard a rumor following the CHS shooting from friend, Katy Trojan, that [redacted], and 11th grader, and [redacted], a 12th grader, had knowledge "something" was going to happen. Heckler stated that he was told this from Trojan on April 22, 1999, at approximately 4:00 p.m. He stated he called [redacted] this morning between 10:00 a.m. and 11:30 a.m. reporting that [redacted] sounded unsure of what was going on. He stated [redacted] wondered about [redacted] and also wondered about where the guns used at CHS came from.

Heckler stated that he would have notified Neil Gardner, Jefferson County Sheriff's Department, School Resources Officer (SRO), assigned to CHS, if he would have known something was going to happen. He further stated he did not think anybody knew an incident was going to happen prior to the April 20, 1999, shooting.

Heckler provided consent to seize his two (2) computers and multiple disks from his residence while his father, Mark Heckler, was present. Both Zachery and Mark Heckler were cooperative during the interview.

Present for the interview were the following personnel:

SA Mathew Hellman, FBI
Sergeant John Hicks, Jefferson County Sheriff's Department
Investigator Mike Russell, Jefferson County District Attorney's Office, West Metro Task Force.

On August 31, 1999, Special Agent John M. Elvig responded to the home of Randy Brown, 8003 South Vance, Littleton, Colorado, telephone (303)972-0602 to pickup a copy of an E-mail and some AOL Instant Messaging regarding Brenda Parker. Randy Brown is the father of Brooks Brown. Attachment A is the E-Mail and AOL Instant Messaging copies furnished by Brown.

Brooks Brown explained that he had received the documents via the Internet from Catherine Deely, 1868 Commonwealth Avenue #A, Brighton, Massachusetts 01235(old address), 92 Corey Road #3, Brighton, Massachusetts 01235 (new address), telephone (617)713-3872(h), (617)656-4959(vm). Deely had setup an Internet Website to support the victims of Columbine High School which included Brooks Brown. Brooks Brown began communicating with Deely over the Internet and the telephone. Deely's e-mail address is bostnbytch@aol.com. Deely met Brenda Parker via the web page and began communicating with her. Parker resides in Westminister, Colorado and has an e-mail address of VoDkAREB@aol.com. Brooks Brown has also communicated with Parker via the Internet and the telephone. Parker claims to be an old girlfriend of Eric Harris.

The Browns are concerned that based on the e-mail and the instant messaging, that Parker may be attempting to purchase a gun and go to Columbine High School to finish what Harris and Dylan Klebold started. Deely was advised that the information would be turned over to the Federal Bureau of Investigation and she advised the Browns that she was willing to cooperate.

AND SAVE HIM AND GET HIM BACK
VoDkAREB: COME CHAT WITH RACH
AND I
bostnbytch: we WILL. if he is out there we will
get him back.
bostnbytch: wait a sec, i wanna talk to you
about this stuff first (in private) if ya don't mind.
not that i don't trust rach but she IS in the
military...
VoDkAREB: K HOLD ON
VoDkAREB: K
bostnbytch: we can talk about this later if you
want? it's up 2 u
VoDkAREB: no let's talk
bostnbytch: k. what do u think we should do?
to start
VoDkAREB: start killing government people

until someone tells us THE TRUTH
bostnbytch: that won't do anything except land us in jail
bostnbytch: or dead
VoDkAREB: it was worth a try heeheee
bostnbytch: haaha :)
bostnbytch: i think i want to make a trip down to washington d.c. and see what i can find
bostnbytch: my sis goes to school there...while she's at class i can see if i can get some sort of "tour" of the FBI and CIA headquarters. i also might pretend i'm a journalist doing an article on Columbine conspiracy theories
VoDkAREB: at night i just want to go to the library just to be in there to see
bostnbytch: how will we get in??? the thing is sealed off, blocked by a wall of lockers, and no doubt has alarms and cameras
VoDkAREB: there are windows we can look in and a door on the outside
VoDkAREB: you'll see when you get out here
bostnbytch: is it guarded? also we need to find out where the cameras are so we can avoid them (whoever made the swastikas knew where the cameras were 'cause they didn't get taped)

VoDkAREB: i have a way to see where the camera is
bostnbytch: what
VoDkAREB: i have baknockalars (sp?) i'll show you everything that i mean when you get out here:)
bostnbytch: heeeheee. let's just not get arrested...my parents would have a fucking stroke :)
VoDkAREB: we can use the baknock. to see where the camera is from behind a hil behind the school.the way we always go to the school from
bostnbytch: and if we wear all black, put our hair up under baseball hats, and wear sunglasses...no one could recognize us anyhow. we def. need gloves though
VoDkAREB: that way we can go up to the school and have our celebration
bostnbytch: what if a cop car drives by? :)
VoDkAREB: lay down beleive me i have done

many missions with Eric and Dylan to know what to do :)
bostnbytch: if we do get caught let's just get all hysterical and tell them our boyfriends died in there (so they'll feel bad and let us go) but don't mention E. or D., let them think we meant one of the other victims
bostnbytch: maybe we should get in touch with those people from the CRTF (Columbine Research Task Force)
VoDkAREB: I ALREADY DID
bostnbytch: if i can find a really cheap flight wanna come w/me to washington d.c. to do our research?
VoDkAREB: SURE
bostnbytch: we can pretend we're reporters. and we can tour the FBI building...maybe talk to someone..hm..or is that totally farfetched
bostnbytch: then we have to kill carrie wilson for lying about eric's baby hahaha
VoDkAREB: NO B/C REPORTERS WOULD BE THE LAST TO TELL WHAT REALLY HAPPENED
bostnbytch: who can we say we are then? something official that would get us to talk to the right people...
VoDkAREB: hhhmmmm i dont know can you make your self really ugly and pretend to be Chelsy Clinton?
bostnbytch: HAHAHAHA she's not THAT ugly, maybe i'm uglier than her already LOL
VoDkAREB: no your not
bostnbytch: you've never even seen me, i could weigh 300 pounds LMAO
VoDkAREB: oh fucking well huh
bostnbytch: hahahhaa j/k
VoDkAREB: heeheee
bostnbytch: ok a flight to wash. would be $300
bostnbytch: but we can deal w/that later.
bostnbytch: now for what we can do in CO...
VoDkAREB: lets go to the mountains and detonate a pipe bomb in rememberance of them go to the school
VoDkAREB: have a b-day cake for Dylan
bostnbytch: you detonate the pipe bomb. i WILL fucking maim myself if i try. i have no

technical skills whatsoever
bostnbytch: yeah! b-day cake and vodka
bostnbytch: i wonder if his parents would be upset if we left smething in front of their house, like flowers and the cake or whatever
VoDkAREB: and a 13 gun shot salute
bostnbytch: do ya have a gun?
VoDkAREB: no
bostnbytch: well so much for that :)
bostnbytch: are we taking brooks w/us?
VoDkAREB: i guess that would help huh
bostnbytch: we can bring our fake guns and pretend
VoDkAREB: we will go see Brooks but otherwise ????
bostnbytch: yeah, he doesn't seem the type who'd like our missions
bostnbytch: do you still talk to chris morris or any other of e. and d.'s friends that would want to help?
VoDkAREB: NO
bostnbytch: oh well guess we're on our own then
bostnbytch: do you trust that dan guy?
VoDkAREB: I CAN ASK HIM IF HE WOULD WANT TO
VoDkAREB: HE LOVES THE KA-FUCKING BOOM SITE
bostnbytch: no, i just mean doy ou trust him in general. this could be a LOT of shit to get into and it's important to know for sure that he is for real
VoDkAREB: THAT'S WHY I'LL ASK HIM IF HE WANT'S TO GO ONE I MEETUK TO SEE
bostnbytch: he lives in denver?
bostnbytch: what if he's some psycho killer dude/
VoDkAREB: YEP
VoDkAREB: I CAN'T DIE
bostnbytch: so you might think
VoDkAREB: WITH ALL I HAVE BEEN THROUGH AND STILL AINT DEAD :)
bostnbytch: heeehee :) i wish ih ad your immortality
VoDkAREB: WHAT R YA DOIN' NOW?

bostnbytch: looking at stuff n tryin to stay awake. u?
VoDkAREB: TRIN' TO DO STUFF TO TRY AND FALL ASLEEP
bostnbytch: like what
VoDkAREB: CHATTING
bostnbytch: do you EVER sleep?
VoDkAREB: NOT REALLY ANYMORE
bostnbytch: u should go to the doctor
VoDkAREB: WHY? SO I CAN GET TURNED DOWN AGAIN?
bostnbytch: there has to be SOME dr. that would take you. go to the hospital and see if they have clinics
VoDkAREB: I DID, MONEY I DON'T HAVE RIGHT NOW :(OH WELL
bostnbytch: as long as you think you will be ok...does your mom have insurance you could go under?
VoDkAREB: I'M ALL OUTA FAITH THIS IS HOW I FEEL
bostnbytch: you should see "The Sixth Sense", it's really good
VoDkAREB: MAYBE
VoDkAREB: IF I EVER GET OUTA THE HOUSE
bostnbytch: i will drag ya out of the house :)

VoDkAREB: NOTHINGS RIGHT AT ALL
bostnbytch: ??
bostnbytch: what are ya doin' tomorrow? anything fun?
VoDkAREB: FIGHT!!!!!!!!!!!!!!!
bostnbytch: fighting who? LOL
VoDkAREB: FUCK THIS!
bostnbytch: are ya quoting lyrics or are ya serious?
VoDkAREB: I'M JUST A GIRL
VoDkAREB: I'M SERIOUS
bostnbytch: what are you talking about
VoDkAREB:
AAAAAAAAAUUUUUUUUUUUUUGGGG
GGGGGGGGGGGGGGGGGGGGGGGGHH
HHHHHHHHHHHHHHHHHHHHHHHHHH
HHHHHHHHHHHHHHHHHHHHHHHHHH
HHHHHHHHHHHHHHHHHHHHHHHHHH

HHHHHHHHHHHHHHHHHHHHHHHHH
HHHHHHHHHHHHHHHHHHHHHH
bostnbytch: bren, what the hell? are you ok?
VoDkAREB: I HAD TO LEAVE THAT
ROOM
bostnbytch: y?
VoDkAREB: B/C THEY WERE PISSING
ME OFF SO BAD AND I NEED TO GET
UNSTRESSED NOT STRESSED
bostnbytch: what were they saying? y'know
when i go out there we are going to get fucking
drunk and do stupid shit to cheer you up
VoDkAREB: starting tomorrow i need to lay
off this shit and get going with my business again
bostnbytch: yeah, that's another reason i left
edhdbk, it got addictive. when school starts i
can't chat nearly as much. i will only talk to you
and rachel
VoDkAREB: it's 3:10am and i am wide awake.
i an so pathetic. i am going down at such a fast
rate that i cant stop
VoDkAREB: i'm a loser baby so why dont you
kill me
bostnbytch: stop it, you are not pathetic. you
went through a fucking HORRIBLE traumatic
experience and you lost two friends and to top it
off, your friends are being assholes and you have
all this other shit to contend with (media, your
cousin, etc.) is it your fault???
bostnbytch: NO. if you were a "loser" you
would have lost it well before now. you will get
through this. "everyone dies only brenda
survives" :P
VoDkAREB: yeah. well it looks like my time is
up Brenda dosen't survive everything
bostnbytch: your time is not up. please promise
me you're not gonna do anything to change that.
you and i have both been down THAT road
before and it doesn't help. don't you think Eric
would want you to be strong and get through
this?
VoDkAREB: no b/c i was supose to be with
him and Dylan

there so now you have it
bostnbytch: you mean you were supposed to

help them that day?
VoDkAREB: YES OK I CANT KEEP IT IN
ANYMORE!!!!!!!!!!!!!!!!!!
bostnbytch: what made you change your mind?
VoDkAREB: I AM SUCH A BAD
PERSON!!!!!!!!!!!!!!!!!!!!!!!!!
bostnbytch: how are you a bad person? you
didn't kill anyone. everyone makes mistakes
VoDkAREB: NO BUT IT WAS MY
PLANNING TOO
bostnbytch: what changed your mind?
VoDkAREB: OH GAWD I NEED HELP
bostnbytch: you do. but anyone would in that
situation, bren!! YOU ARE NOT A BAD
PERSON
bostnbytch: i haven't known you long, granted,
but i think i know you fairly well and to me it
seems like you are a really cool person who got
caught in a BAD SITUATION..because she
CARED so much about her friends!
VoDkAREB: i wish that i can fly up into the sky
bostnbytch: what happened on that day? would
it help to talk about it?
bostnbytch: you kNOW i'm not gonna tell
anyone
VoDkAREB: ohhhhhhhhhh i want to get away i
want to fly away
VoDkAREB: do you know "jane doe187" from
mikes page? i invited her to the club so dont
delete her
bostnbytch: she e-mailed me once about the
tears 4 ed webpage; i recognized her e-mail
address. y did you invite her? have u talked to
...r?
VoDkAREB: yeah
bostnbytch: i feel bad for her. she seems really
depressed
VoDkAREB: that's why i invited her
i let 2 of my friends down so i might as well try to
save someone
bostnbytch: bren, how did you let your friends
down. WHAT HAPPENED that day to make
you blame yourself so much? Eric called you that
morning, right? And you said you weren't going
to do it? Is that what happened/
VoDkAREB: my mom just e-mailed me saying

that she dloaded AIM and her s/n is Kittylois2
how cute my mommy
bostnbytch: I take it she's Lois and she has kitties? :)
VoDkAREB: no i have the kitties and yes her name is Lois
bostnbytch: that's cute
bostnbytch: i'm going home to RI tomorrow to drop off my kitties. my parents are babysitting them while we move. i'm also trying to talk my parents into getting another cat 'cause my baby Butterscotch died in March :(and one of our other cats has been really depressed since
VoDkAREB: oh how sad :(
bostnbytch: they get like that, it's weird, animals mourn too
bostnbytch: but enough sad stuff!!!! are you really ok. i mean really. would it help you to talk about it or would you rather not?
VoDkAREB: that's what i did for Miesha she needed a play buddie
bostnbytch: Did Toni name her cat Meiha after Miesha?
VoDkAREB: i don't know what will help anymore
VoDkAREB: no she had Meha out if FL
bostnbytch: there has to be some way you can see someone (professional). do you think that will really help? if so i will look around on the Net and see if there are any places that take you w/o insurance and don't cost a lot
bostnbytch: that's weird, you guys named your cats almost exactly the same thing...
VoDkAREB: i'm been kissed by a rose on a grave
bostnbytch: is there any way you could get any kind of job that had benefits. i mean, you're good w/computers, maybe you could get some kind of computer job? that way you would have the benefits to go see someone?
VoDkAREB: i cant even get outa the house let alone get a job outside the house
bostnbytch: why can't you get out of the house?
VoDkAREB: i just dont feel like it no one to go out with ect
bostnbytch: it would be diff. for a job. what

about your cousin? and didn't you say your friend called you the other day. besides, you have me when i come visit :) and i'm gonna be back again in dec. over x-mas break
VoDkAREB: Danyelle called and said they deserved it
bostnbytch: aren't ANY of your friends nice?? why are they all being such psycho bitches (no offense if they're still your friends)
VoDkAREB: no one is my friend except you now
bostnbytch: you will make other friends (although of course i will always be your twin) you're awesome and funny, if you let people in you will find REAL friends (not like those fake assholes) i guarantee it. that's another reason having a job would be good, you could meet more people. i'm totally antisocial so i know this from experience :)
bostnbytch: you really don't give yourself enough of a chance, ya know
VoDkAREB: I guess that's why Eric and I clicked we are 1
bostnbytch: I didn't know Eric but it seems you are both very smart and funny yet with something inside you that tells you you're not good enough
VoDkAREB: i feel angry
i feel helpless
want to chang the world
i feel violence
don't try to change my mind
VoDkAREB: that is a song
bostnbytch: i know :)
bostnbytch: have u tried keeping a diary? sometimes it helps to get everything out in writing (it worked for Eric!)
VoDkAREB: yeah but it had everything about what happened in it and i burned it up so that the CBI wouldn't find it
bostnbytch: so what DID happen on that day?? why do you keep blaming yourself?
VoDkAREB: just b/c it all went wrong when i didn't meet Eric at the bus stop where he was to pick me up
bostnbytch: you didn't cause ANYONE to die..and that includes Eric and Dylan

bostnbytch: you had second thoughts, which probably saved your life, and if they had had the same thoughts it would have saved theirs too. NOT YOUR FAULT!!!
VoDkAREB: oh Cat if ya only knew
bostnbytch: no matter what, you are still my friend and i will never believe you are a bad person
bostnbytch: if you did mess up it's only b/c you cared too much about Eric, I would bet
VoDkAREB: it should've been ME!
bostnbytch: it shouldn't have been ANYONE
bostnbytch: i am not gonna ask you to tell me everything. if you want to i am hear to listen. k? but we never have to bring it up again if you don't want to. it's over and nothing can change it and you can't keep killing yourself over it
VoDkAREB: i would tell ya but there is just so much that there isn't that much room
bostnbytch: well tell what you want to tell if it makes you feel better. if it makes you feel better not to talk about it that's cool too. whatever is easier for you. you have been through enough
VoDkAREB: to type it all and we would be here for a week vuntil i'm done
bostnbytch: did you back out 'cause you were scared? and now you blame yourself for backing out? is that the gist of it or am i totally wrong?
VoDkAREB: i didn't back out i couldn't get on the bus
bostnbytch: y not?
VoDkAREB: didn't have a pass or money
VoDkAREB: i live up in the mountains at the time
bostnbytch: ?? but didn't you plan it? what were you supposed to do, shoot people too? or was anyone even supposed to die at all?
VoDkAREB: there were 4 guns 1 for me 1 for Eric 1 for Dylan and 1 for
bostnbytch: for who??
VoDkAREB: [redacted]
bostnbytch: this is weird, how come no one knows about any of this? not saying you're lying, DUH, but it's really strange. what the hell went wrong? and what was supposed to happen? (kill random people, kill specific people, blow up the

school, etc.?)
VoDkAREB: the plan was for me to get on the bus and Eric would pick me up at Ace Express bus stop from there we would meet [redacted] and Dylan at Clement Park
bostnbytch: why were you supposed to be in on it
bostnbytch: and what happened? didn't you say eric wanted to shoot just certain people? what went wrong
VoDkAREB: from there we get everything up and going (as Dylan put it) we would go to the school I would be waiting in Erics car on the south side looking for police [redacted] would be on the North side looking for police
VoDkAREB: Eric would run in and shoot to scare people while Dylan waited outside
bostnbytch: what the fuck went wrong...?
VoDkAREB: Eric would then run out and wait with Dylan and shoot the people runing out
VoDkAREB: they would then run to [redacted] and I and we would get away and go to my house and stay up there in the mountains where no one would find us
bostnbytch: Brenda, I don't mean this hurtfully but WHY would you want to go along w/something like this? Why did they want to do it in the first place??
VoDkAREB: [redacted] backed out sometime that week
VoDkAREB: I dont know why maybe it's b/c i never really had friends and b/c it was just i just dont know
VoDkAREB: I guess that I got caught up in it
bostnbytch: Maybe on one level you didn't think it could really happen...were people supposed to die?
bostnbytch: And because you loved Eric
VoDkAREB: but there is so much more and it goes into detail
bostnbytch: you don't have to tell me. it's ok.
bostnbytch: i just don't see why Eric and Dylan went ahead with everything, and how it all got so messed up.
VoDkAREB: i told Eric to keep it quiet b/c if the police ever found out about me then that

would ruin our "hide out"
bostnbytch: what if someone saw your car
VoDkAREB: i just hope that [redacted] doesn't lose it and say anything
bostnbytch: He has a lawyer. I'm pretty sure he said that he heard them joking around about it and didn't take it seriously. I don't think it's a crime if you hear something but (allegedly) don't believe it
VoDkAREB: but the police are saying that in the diary that it was supose to be a suicide mission NO NOTHING like that was in the diary
bostnbytch: witnesses have said Eric was screaming "TODAY I AM GOING TO DIE"..was he suicidal?
VoDkAREB: So much stuff isn't adding up and that is why i want to talk to CTRF
bostnbytch: be careful. what if it is a setup?
bostnbytch: but if you know all the planning that went into it...why do you think the gov't has anything to do w/it?
VoDkAREB: That's what I read but but no i dont really think that he said that
VoDkAREB: b/c of what we talked about numerous times
bostnbytch: just BE CAREFUL. i know you know this but i'll say it anyway. as you have already unfortunately seen, there are a lot of people who will do anything for a few $$ and some fame
VoDkAREB: his dad even sat me down one time and asked if Eric has said anything out of the ordnary and of course I said no
bostnbytch: was this after or before the shootings
VoDkAREB: i know that's why i'm not gonna say anything i'll be the one asking the questions
VoDkAREB: before
bostnbytch: i will help you. i promise
bostnbytch: i'm just scared. i have to admit that
VoDkAREB: why?
bostnbytch: because this is deep shit and what if it blows up in our faces
VoDkAREB: it wont b/c i will die before thay can do anything with me

bostnbytch: yeah but i really don't want to die, or get my life or yours fucked up forever either
VoDkAREB: don't worry about it nothing will happen just act normal
bostnbytch: i've been "acting normal" :) for 22 years and it's worked so far :)
bostnbytch: i really appreciate that you trust me this much. it is an awful lot of trust to place in someone you only really know over the Internet
VoDkAREB: if they haven't caught me yet then you have nothing to worry about they will come for me before they even think of getting you
bostnbytch: i don't want them to get you either
VoDkAREB: i dont either but like we used to always say shit happens
bostnbytch: but think about it, you didn't really do anything wrong that they could get you for, did you? you didn't hurt anyone
VoDkAREB: i have a feeling that someone is standing right behind me i am so scared
bostnbytch: there's no one there. it's ok
VoDkAREB: like a gost and i am getting chills on the right side of my body but not the left
bostnbytch: you are scaring yourself tod eath over this, bren. what will it take for you to feel ok again?
VoDkAREB: the only thing going through my head is DYLAN DYLAN DYLAN DYLAN
bostnbytch: i just want to know the truth about this and if anyone is responsible besides eric and dylan, if there is some coverup, i will do all i can to expose it and make things right
bostnbytch: ever since i first heard about this all something just didn't click. I didn't know eric and dylan but i had this weird feeling that i did, that i knew enough to know they couldn't do something so awful
VoDkAREB: i just heard something i just saw something
bostnbytch: what
VoDkAREB: he's here
bostnbytch: dylan? you're scaring yourself
bostnbytch: he can't be there and even if he were a ghost why would he haunt you
VoDkAREB: it's like a good but scary feeling
bostnbytch: are you sure it's something real

VoDkAREB:
wwwwwwooooooooohhhhhhhhhhhhhhhhhh his pic just moved
bostnbytch: stop it you're freaking me out
VoDkAREB: a song that he liked is on
VoDkAREB: cat this has never happened to me before
bostnbytch: swear to me you are not fucking w/me
VoDkAREB: i dont fuck with shit like this that would not be cool
bostnbytch: well maybe he is visiting you to tell you something? what would he want to say
VoDkAREB: i dont know
bostnbytch: my head is swirling right now. i always get myself into the weirdest shit....
VoDkAREB: if ya dont want to talk to me then just let me know
bostnbytch: why wouldn't i want to talk to you? i don't fuck my friends over
bostnbytch: this is just heavier than anything i have ever been involved in, or even thought of, in my life and i'm scared a little and not sure what to make of everything
VoDkAREB: STOP
bostnbytch: STOP what
VoDkAREB: oh my gawd
bostnbytch: what
VoDkAREB: i cant say any more about the plan
bostnbytch: y not
VoDkAREB: yes i can say about the plan
bostnbytch: what are you talking abou
bostnbytch: t
VoDkAREB: they arnt gonna get me
VoDkAREB: i fine
VoDkAREB: HELP
bostnbytch: ??? please explain....are you ok.....
VoDkAREB: want to come back
bostnbytch: Brenda STOP IT this is not funny
VoDkAREB: love you
VoDkAREB: i am the only one who can help
VoDkAREB: my cheek
VoDkAREB: my head
bostnbytch: ????? BRENDA what the HELL is

going on
bostnbytch: Dylan?
VoDkAREB: jaJDS: ooooooouuuuuuuuuu
wwwiiiiiieeeeeeeeeee
VoDkAREB: i just felt the bullet
VoDkAREB: middle left side back of head
bostnbytch: if this is a joke it is NOT fucking funny, bren you are scaring the shit out of me. what the hell is going on. if our friendship means anything at all TELL ME WHAT YOU ARE DOING
VoDkAREB: fell
VoDkAREB: celling
bostnbytch: Dylan..if that is you...what is my part in all of this. WHy do I still care so much about you and Eric?
VoDkAREB: he is outa me i feel him behind me
VoDkAREB: OMG what
bostnbytch: i want him to answer my question
VoDkAREB: cath i am so scared
VoDkAREB: what is going on
VoDkAREB: why me
bostnbytch: i have no fucking idea, all i know is half of me is screaming "You are a moron to get involved of tis and believe it" and the other half is scared to fucking death
bostnbytch: WHAT IS HAPPENING
VoDkAREB: wholy shit i can't believe this is happening
VoDkAREB: either i am sick, fucked up, and deminted or there really is a such thing as well you know
bostnbytch: which do you think it is and why would it happen just as we were talking about everything?
VoDkAREB: i dont feel so good right now
bostnbytch: what do you really think happened
VoDkAREB: I DONT KNOW
VoDkAREB: i need to get everything
VoDkAREB: i am burning up right now
bostnbytch: get everything what?
VoDkAREB: give me an ice water bath right now i am so hot
bostnbytch: go take a cool shower and lie down
VoDkAREB: i dont know it just poped in my head thoughts

bostnbytch: maybe this is totally irrelvant (esp. if dylan wasn't really there) but i have had 3 dreams about columbine and only dylan has been in them and in all of them SOMETHING HAS BEEN WRONG
VoDkAREB: same here i have had dreams about Eric but made up things and places
VoDkAREB: all my dreams about Columbine onlu Dylan has been there
bostnbytch: In both of the dreams I remember Dylan was killed. In the first one he and Eric were going to be executed (but I couldn't see Eric) and in the second I watched helplessly while the police shot him (Dylan)
VoDkAREB: ok ok
VoDkAREB: i'll take it down
bostnbytch: what are you talking about
VoDkAREB: you just told me to take down my unicorn beanie off the top of my monitor
bostnbytch: stop it bren
VoDkAREB: b/c it is too girly
VoDkAREB: your the one that said it Cat
bostnbytch: you know i didn't. read the chat transcript yourself. this is not cool
VoDkAREB: hold on
VoDkAREB: huh
bostnbytch: what
VoDkAREB: ok so i dont see that you wrote it
bostnbytch: where did you get the idea that i did. you are scaring me. bren, go take a cold bath and go lie down
VoDkAREB: it's just a beanie baby why be scared
bostnbytch: because it came out of nowhere and you KNOW what's to be scared about
VoDkAREB: lets talk about you coming out here and having fun :)
bostnbytch: i have to go to bed. i'll call ya tomorrow

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/28/99

ROBYN KAY ANDERSON, born 11/04/80, was advised of the identity of the interviewing agent and the purpose of the interview. ANDERSON was interviewed at the office of her attorney, MICHAEL G. ROOT, 1999 Broadway, Suite 3205, Denver, Colorado, telephone 303-675-0500, who was also present during the course of the interview. INV GARY CLYMAN, Colorado Attorney General's Office, coordinated and set-up the interview with ROOT, and also participated. ANDERSON's parents were not present. ANDERSON provided the following information:

ANDERSON had lived in the Columbine area for approximately four years and moved from Fort Collins. ANDERSON's father lived 20 minutes East of her. ANDERSON's mother was presently in Minnesota visiting an aunt.

ANDERSON started checker school this week at the Safeway store located on the corner of Ken Caryl and Pierce, in Littleton.

ANDERSON had a 4.0 grade point average in school and took a lot harder classes than the other Trenchcoat Mafia (TCM) members. ANDERSON was also in the National Honor Society. ANDERSON had taken classes with the jocks at Columbine High School (CHS) and never had any problems with them. ANDERSON pretty much got along with the other students at CHS. ANDERSON normally got out of school sometime between 10:20 am and 11:50 am.

ANDERSON recalled a "huge" fight last year involving 20 TCM members and some CHS freshmen behind the local Blackjack Pizza. ANDERSON did not know what started the fight.

DYLAN KLEBOLD also got along well with the other students at CHS. He never talked about being abused by anybody. ANDERSON did not consider KLEBOLD to be a violent person. ANDERSON did not consider herself to be a violent person.

KLEBOLD and ERIC HARRIS had outside interests such as bowling, shooting pool at KLEBOLD's house, music, and the computer game, "Doom." ANDERSON had never played "Doom" with them. ANDERSON recalled KLEBOLD bragging to her that he, at one

Investigation on 06/24/99 at Denver, Colorado

File # 174A-DN-57419 Date dictated 06/28/99

by SA Mark Holstlaw/mah

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency; it and its contents are not to be distributed outside your agency.

time, had beaten HARRIS in total number of kills while playing the game.

KLEBOLD and HARRIS never talked about going hunting.

ANDERSON accompanied KLEBOLD and HARRIS to a gun show, circa December 1998, and was present when they procured some of their weapons. ANDERSON knew they were not old enough to buy a gun and that she had to be present.

About a week after the purchase, ANDERSON informed a friend of hers, PAT MCDUFFY, that she had gone to a gun show with KLEBOLD and HARRIS, and that they had bought three weapons.

KLEBOLD and HARRIS asked ANDERSON not to tell anyone they had bought the guns because they were afraid someone would take them away. They said they wanted to have the guns for a long time. They assured ANDERSON they would not tell anyone she had been with them when they got their guns. ANDERSON recalled making a comment to them at the time, "you're not going to shoot anyone, are you?" They answered no.

ANDERSON did not know why KLEBOLD and HARRIS picked her to buy their guns for them. ANDERSON figured at the time, if she did not do it, someone else would.

ANDERSON made sure that her name did not appear on any paperwork when KLEBOLD and HARRIS obtained their guns.

KLEBOLD and HARRIS never really talked about guns, or being interested in them.

ANDERSON regretted posing in the CHS senior class picture with KLEBOLD and HARRIS, acting like they were shooting guns. The picture was taken during the second period. They did not talk about posing that way ahead of time. KLEBOLD had put his left arm around ANDERSON and pretended to hold a gun, so she did too.

ANDERSON only knew two of the victims at CHS: LISA KRUTZ and LAUREN TOWNSEND. ANDERSON did not attend any of the memorial services after the shooting because she did not know any of the victims well enough.

ANDERSON did not think that KLEBOLD or HARRIS told any of their friends about their violent plans. If ANDERSON would have been told in advance, she would have done everything possible to talk them out of it, or informed KLEBOLD's parents. ANDERSON could think of no reason why anyone would say she knew about their plans ahead of time.

No one has ever informed ANDERSON that they suspected anyone else of being involved in the CHS shooting.

ANDERSON hosted a party at her home on Friday night, 03/26/99. Approximately ten to fifteen people attended, including HARRIS. KLEBOLD was in Arizona with his parents at the time, visiting the University of Arizona. ANDERSON recalled that KELLY BROWN and her boyfriend had been at her party, as well as MONICA and her friend DEBBIE, and another individual named TRAVIS. HARRIS seemed to be his normal self at the party, quiet and keeping mostly to himself. ANDERSON initially contacted HARRIS to find out where KLEBOLD was at and ended up inviting him to her party.

After the shooting, ANDERSON had visited KLEBOLD's mother at their residence and she told ANDERSON that KLEBOLD and HARRIS had dinner together at the Outback Restaurant the night before the shooting. HARRIS had coupons and liked eating there.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/10/99

Sydney Jo Keating, maiden name Arbogast, white female, date of birth July 24, 1956, place of birth Denver, Colorado, Social Security Account Number 522-92-9702, residence 233 Reed Street, Lakewood, Colorado 80226, home telephone number (303) 238-3105, cellular telephone number (303) 870-3479, employer - Jefferson County School District, Columbine High School (CHS), 6201 South Pierce Street, Littleton, Colorado 80123, work telephone number (303) 982-4400, X4415, title - Campus Supervisor, responsibilities include being in charge of safety and security of students, was advised of the identity of the interviewing Agents and the nature and purpose of the interview. Keating was interviewed at Columbine High School and provided the following information:

Keating stated she has been employed with CHS for six years and is known as the "School Narc". She stated that on April 20, 1999, she had gone to a breakfast in the morning which was sponsored by the DECA Association at the Wellshire Inn located off of Hampden and Colorado Boulevard, Denver, Colorado. Keating stated the purpose of the breakfast was for the "DECA Kids," which is described as a business education program. Keating stated CHS Principal, Frank DeAngelas, was present for the breakfast. A list of students present for the DECA breakfast is maintained by Kathy Frommer, CHS faculty member, teaching business education. Frommer is reported to have a list of the DECA students invited and who showed up. Keating stated she returned back to CHS at approximately 11:00 AM.

Keating stated she parked in the faculty parking lot and entered CHS through the front doors located on the east side of the building. Keating went to her office located in the hallway to the north of the main office where the school administration offices are located. She picked up her school radio which she refers to as her "Ears." Neil Gardner, a Jefferson County Sheriff's Department Deputy assigned to CHS, and Andy (Last Name Unknown) (LNU) were not in the main office at the time she showed up. Keating stated she remembers their absence because she was "dressed up" and wanted to show Neil and Andy how she looked. Keating stated Neil Gardner was believed to be in his police vehicle at around 11:00 AM. Keating stated she was hanging out around the CHS trophy case with students who were

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency it and its contents are not to be distributed outside your agency.

commenting and "teasing" her regarding being dressed up. Keating stated she took a walk past the library, down to the lunch room, down to the cafeteria through the kitchen to show the cafeteria ladies how she looked. She stated that students in the cafeteria were clapping and cheering at how she was dressed up. She entered the faculty lounge located adjacent to the kitchen which she stated was empty. Keating stated she returned to her office at exactly 11:15 AM and noticed the red light on her office telephone flashing indicating she had a message. She checked her voice messages and had a message from her husband which she returned. When she called her husband, she was placed on hold, awaiting for her husband, Tom, to answer the phone. She stated that she recalls CHS Administrator Peter Horvath declaring a 911 emergency via the radio, "There's a shooting in Mrs. Grecko's Room." She recalled hearing "Syd, Andy, Neil, shooting in Mrs. Grecko's Room." Gunshots were heard which are described as three or four "pops." Breaking glass was heard in the area of the front doors. Another CHS Administrator, Chris Mikesell (female), was heard saying, "Oh my God, gun, lay down, get down." Keating saw an unidentified subject wearing black come through the front doors shooting at the windows. People started to scramble when all the shooting started.

Keating described Susan White, a CHS Administrator, as being positioned behind her in the hallway located adjacent to the principal's office. Mikesell was also close by. Keating grabbed Susan White and "threw" her into Peter Horvath's office, followed her in and shut the door. Keating dialed 9-911 and rolled under a desk with Susan White, declaring to the emergency dispatcher that CHS was under gunfire. Keating described Peter Horvath as being in close proximity to her prior to entering his office. Keating stated when she started hearing the gunfire that she believed the gunmen were coming after her because she is known as the "School Narc." While looking through the glass and while staying on the telephone with the 911 dispatcher, she noticed three male subjects, all dressed in black. She described the first two unknown subjects as being 5'7" to 5'8" in height and the third subject wearing a bright colored hat described as a gold/yellow color with the brim facing forward. Keating told Susan White, "They're coming to get me." Keating remained under the desk and continued to hear loud noises. Keating remained under stated desk with Susan White until law enforcement SWAT

members arrived. Keating stated she lost all track of time during the shooting.

In response to questions about individuals [redacted] was a CHS student, Zachery Heckler, a senior. Keating stated Heckler is skilled in computers and got "all" the locker combinations last year. Keating asked Heckler in January, 1999, if he would help in designing and building a computer program that would break down student information such as parking assignments, locker assignments, etc. The CHS staff found out that Keating had asked Heckler to assist her in a student program due to him being competent in programming. The CHS staff became upset with her when they found out Heckler was into the CHS computer system. When Heckler was advised he would not be permitted to complete his programming task, he became upset. He commented that he would return and do something to the school. Keating stated Heckler and Dylan Klebold spent a lot of time together. Keating stated Heckler put a lock on the computer identified as a "Newbus." Keating was called into Principal DeAngelas' office with the vice principal regarding Heckler and his access to the school computer. Keating stated in February, 1999, the "Newbus" was still running. Heckler came to Keating's Office in February, 1999, with a clenched fist saying, "They're going to get it." Keating stated Heckler drives a blue colored vehicle and parks in space #259.

Keating provided the name of Chris Morris, describing him as always wearing a green beret, dark glasses, and is known to be a member of the Trench Coat Mafia (TCM). His personality is described as "defiant and sneaky." He hangs out in the commons area of the cafeteria leaning against the trash cans. Morris is known to be a friend of Dylan Klebold. Morris recently commented to Keating, "I'm a good kid - you haven't caught me."

The name of Brooks Brown was mentioned, described as a "Total Wacko." Keating stated Brooks Brown's parents came to the school during mid-year of 1998 seeking an "intervention" due to Brooks' radical behavior. The parents of Brooks commented that their son was "becoming weirder," he was not bathing, and believed him to be gay. Keating stated toward the end of the 1998 school year that Brooks was "out of control" and needed counseling. Keating stated Brooks came to her in November, 1998,

and told her that he was getting his act together. He was reported to have stopped wearing his trench coat at that time, was growing a beard, dyed his hair black, wore sagging pants, being described as "strange." Approximately one week ago, Brooks mother called her reporting Brooks had run away from home. He was reported to have had a fight with his parents. He is known to be working as a waiter at the International House of Pancakes (IHOP), located at Cross and Bowles in Littleton, Colorado. Following an argument with his parents one night, he stayed at the IHOP over night. Recently, Brooks came to her office and told Keating that he was not getting along with his parents, especially his mother because she was making him do chores. Keating stated Brooks had a close relationship with Dylan Klebold. Keating stated Brooks [redacted] He was always talking to Dylan and that he hated the students of Columbine High School.

Keating provided associates of Harris and Klebold: Kristen Theabold (phonetic), Eric Dutroe and Pat McDuffee. No specifics were provided relating to their relationships with the Trench Coat Mafia and known associates.

Joe Stair (phonetic) was mentioned, stating that he had graduated from CHS in 1998 and still was known to hang around school. Keating stated Stair was friends with Harris and Klebold. She believes Stair to be working at Arby's located in proximity to the Southwest Plaza Mall, Littleton, Colorado.

Keating stated she has never heard of anything related to explosives or bombs in connection with students at CHS. [redacted] was reported to have sold "fake cocaine" last year to Eric Harris, Chris Morris and Eric Dutroe. Chantel Beery (phonetic) is reported to be an associate of the TCM. Crystal Bragazzi, CHS student, telephone number (303) 932-7855, is a student Eric Harris was known to like.

Keating stated Eric Ault, a former CHS student that never graduated was seen at school on Tuesday, April 20, 1999, wearing a green shirt and black pants. Keating stated Ault looked at her and turned away. She called Ault a "loser." Ault's best friend is Phillip Casey, another student that had gone bad and was no longer attending CHS. Eric Dutroe and John Beach are also friends of Ault. Brian Sargeant, a CHS senior, is a member

of the TCM. Paulene Colby, a CHS senior and associate and Nicole Markham are also associates of the TCM.

Keating stated Zachery Heckler, a CHS senior, has a computer disk described as being yellow in color that may be of some interest. She stated Heckler has a black bag that is filled with computer disks. She described the black bag as looking like a briefcase, leather or the appearance of leather, a handle and a shoulder strap.

Following a detailed synopsis of Heckler's access to her computer, Special Agent (SA) Matt Hellman, FBI, and Sergeant John Hicks, Jefferson County Sheriff's Department, both computer specialists, were introduced during the interview to discuss Heckler's access and known actions with the schools computer system. All present concurred that Heckler's computers and computer disks needed to be reviewed.

INVESTIGATION:

On February 22, 2001, I met with several family members of the victims of the Columbine High School shootings in order to return property belonging to the victims. Specifically, I returned property belonging to Matthew Kechter, which I returned to his father, Joseph Kechter. When returning the property, Joseph Kechter told me it was his understanding that when Matthew Kechter was shot, he had a pen in hand and he would like to know if we still have that pen and if so, he would like if returned to him. I told Joseph Kechter that I was unaware whether or not that pen had been collected and I would research it and get back to him.

On February 26, 2001 I reviewed the evidence logs and was unable to locate any pen that was collected from the body of Matthew Kechter. In an attempt to ascertain whether or not that pen was collected, I responded to the Jefferson County Crime Lab and met Acting Supervisor Chris Loptien. I explained to Loptien that I was attempting to find crime scene photographs or videotapes that may not be in the evidence vault so I could ascertain whether or not the pen in Matthew Kechter's hand was collected. Loptien then took me into the locked area of the crime lab where Columbine photographs and crime lab diagrams and reports are located. Loptien advised that he was not familiar with how all the items are organized and stated that the previous Lab Supervisor Chris Andrist, had been the person in charge of the Columbine photographs and documents pertaining to the crime lab. While looking at the shelves where the books are kept, Loptien discovered a cardboard box that had several documents that appeared to be copies. Also included in this box was some compact discs that had digital images and scanned images as well as zip files that had images on them. Loptein advised me that he was not familiar enough with the contents of the box to make a determination if these were copies or originals. I then offered to go through the box to make that determination.

In reviewing all of the contents in the cardboard box, I found the majority of the items were copies of reports pertaining to crime scene documentation and all of these copies are already contained in the Investigative Files. I did however locate some original documents that I had never seen before and were not included in the Investigative Files. Specifically, I found original drawings from the autopsies of John Tomlin, Matthew Kechter, and Cassie Bernal. These are drawings showing the wounds inflicted on the bodies of these three victims. It should be noted that I have previously submitted copies of drawings of the autopsies of Cassie Bernal and Matthew Kechter, however these are the originals and will be added to those drawings already in the evidence vault.

JC-001-012279

Officer Signature	Unit	Number	Supervisor Initials and Date	Assigned To	
	661	3 Cy			1 of 3

I also found an original report by CSP Officer Dan Overturf that is dated 04-27-99. This report is documenting a male who contacted Trooper Overturf on 04-27-99 and told him that there was information on the Internet about how to make pipe bombs. This is not new information and this issue was being looked into in April 1999.

I found another original report dated 04-26-99 by Jefferson County Sheriff's Office Sergeant Lee Ulshoffer in which he interviewed Randy Francis. Francis had responded to Columbine High School on 04-26-99 and provided Ulshoffer with information about a subject with a first name of Mark who had sold a 9mm to Harris and Klebold. This information is most likely referring to Mark Manes and the issue has already been addressed.

I found an original report dated 04-26-99 by JCSO Sergeant Scott Pocsik. This report documents that two Columbine students by the name of Jennifer Tindall and Kristen Schoenhoff had provided information to Sgt. Pocsik. Both students filled out a written statement. Other officers interviewed these students and this is not new information.

I found another original report from Arapahoe County Sheriff's Office Officer Wayne Belohlavy that documents his response to Columbine High School on April 20, 1999. Although this report is the original, it appears a copy of this report is already contained in the Investigative Files. The original will replace the copy of the report.

In addition, at the bottom of the box, I located in a plastic bag and seven pages of documents that appeared to be school homework. The school papers appear to be authored by Nathan Dykeman, Dylan Klebold, and Eric Harris. These documents are in a plastic bag that has writing outside of the bag that says "06-08-99, 1000 hours, SCA received from instructor".

Lastly, I found a flattened piece of metal that is in a bag with a yellow post it note. The yellow post it note indicates that this evidence was found in the sidewalk near the library, west going to the parking lot. According to the note, Brent McSwain, DOB/03-04-58, found it on 06-18-99 at 1345 hours. It was then given to JCSO Deputy S. Flowers.

The original reports were subsequently placed in the investigative files. The school papers and flattened piece of metal were subsequently placed in the JCSO evidence vault on 03-07-01.

JC-001-012280

On March 6, 2001 I interviewed Chris Andrist, the previous supervisor of the JCSO Crime Lab. I explained to Andrist that I had located a box with the above documented reports and evidence and asked if he could recall how they came to

be in the Crime Lab vault. Andrist stated that he specifically recalls getting the English papers of Dykeman, Klebold, and Harris on 06-08-99 from an English Instructor at Columbine High School. Andrist said the three students had turned them in to their English instructor and after the Columbine shooting, the instructor located these papers and gave them to Andrist. Andrist stated that he most likely placed them in a box to give to me however he inadvertently forgot and they were instead left in the crime lab, which is also a secured vault.

I asked Andrist about the original reports and he stated he had never seen those reports before and has no idea how they got into the cardboard box but speculates the reports may have inadvertently been sent to the lab. He surmised that someone in the lab may have placed them with the rest of the Columbine documents that the lab have.

I then asked Andrist about the flattened piece of metal and he advised he does remember taking custody of that. Andrist said that Deputy Flowers gave him the bag with the flattened piece of metal after a construction worker who was involved in the remodeling of Columbine High School found it. Andrist said he recalls telling Deputy Flowers that he would take possession of the piece of metal and hold on to it for safekeeping in the secured evidence area of the lab. Andrist said he told Deputy Flowers that he needed to document exactly how he came into possession of this piece of metal in a report and then provide that report to either myself or Chris Andrist. Andrist said he subsequently placed that piece of metal in the original bag that Flowers gave it to him in into the secured area of the lab. Andrist said he never heard back from Deputy Flowers nor did he hear from me whether or not I had received the report from Deputy Flowers.

I did check the Investigative Files for any report generated by Deputy S. Flowers or any interview or report generated by Brent McSwain who had found the piece of metal. I was unable to find any documentation regarding this.

Deputy Flowers will be interviewed at a later time.

DISPOSITION: Case exceptionally clear.

INVESTIGATION:

On March 8, 2001 I received a fax from Assistant County Attorney Lilly Oeffler regarding a letter sent to the County Attorney's Office from CBS attorney's representing 60 Minutes. Specifically the letter addressed the Critical Incident Team interviews of all of the officers involved in discharging their weapons at Columbine High School on April 20, 1999. The main issue addressed is whether or not the Jefferson County Sheriff's Office has possession of the transcript or audio tape of the interview with JCSO Deputy Neal Gardner by Detective Russ Boatright of the Arvada Police Department.

I subsequently confirmed that the Investigative Files as well as the evidence vault do not contain any tape recorded interviews with Deputy Gardner by Russ Boatright nor do we have the transcript of any such tape. What we do have is a 9-page report by Detective Boatright documenting his interview with Deputy Gardner.

I subsequently contacted Detective Boatright of the Arvada Police Department and asked if he had ever provided those items to me. Detective Boatright indicated that shortly after the shootings at Columbine High School he was notified by his superior, Commander Debbie Grainger, of the Arvada PD who advised that she needed all of the transcripts, reports, and cassette tape recordings of any interviews conducted by the Critical Incident Team. Detective Boatright advised that he did in fact provide Debbie Grainger with the original cassette tapes as well as a lengthy transcript of the cassette tapes of his interview with Deputy Gardner. Detective Boatright advised that he specifically recalls that he had not completely corrected the transcript in terms of typos or information that the secretaries who typed the transcript had not been able to discern. I told Detective Boatright that I had checked the Investigative Files and the evidence vault and I had been unable to find the audio tape or transcript of the interview with Neal Gardner. I asked Detective Boatright if he would check his files and see if he has the originals or copies of these items. Detective Boatright said that he would check and he would contact me.

On March 13, 2001, Detective Boatright responded to the Jefferson County Sheriff's Office and provided me with a copy of an 88-page transcript of his interview with Deputy Gardner on April 20, 1999. Detective Boatright also provided me with a copy of Deputy Gardner's diagram that he prepared during the interview. I did not have this in my files.

Detective Boatright also provided me with a diagram prepared by Kim Blair that had not been attached to her report.

NARRATIVE:

I was about halfway through eating my lunch in the cafeteria, at a table close to an exterior window. I heard 2 maybe 3 popping sounds and saw a large group of people crowd the window. At the base of the stairs by the window I saw two kids, one with a blond, apparently dyed, bowl haircut, another with a close shaved head, wearing a green shirt, both lying on the ground in pain. When many of us were gathered around being held back by a teacher, the teachers lounge is very close, we heard another series of pops. It was about 11:25-35 when this happened. The teacher began to shout and tell people to get down, my friends and I did and began to crawl away towards the inside. I ran towards an inside area where I thought I would be safe, some friends directed me towards the janitors elevator. We filled the elevator and proceeded upstairs, when we opened the door upstairs we saw the upstairs was filled with smoke, from what smelled like smoke bombs. We quickly closed the door and ran downstairs and a teacher led us to the left into the Auditorium. The teachers leading us had us sit down in the seats and told us if the shooter came in to immediately get down. About 10 minutes later about 11:45 we were led out to Leawood Park by a janitor with a walkie-talkie. We remained there in scattered groups for about another 10 minutes or so until we heard more pops coming →

I further state that I have read the foregoing statement, that I understand the contents and all the facts stated therein are true in substance and in fact.

When I was in the cafetena hiding under the table, Some one yelled that there was 2 gun men shooting at us. I then ran up the stairs while people yelled "Go".. down the math halls and out the back door. My 2 best friends were out in the Senior parking lot retreiving something from one of the girls cars. They saw 2 gun men both of wich were neither Dylan or Eric Cara (one of my friends at the car) later identified one in the Yearbook. She looked in the back at the "Mafia Dedication and found him in the picture. One other friend of mine took the elevator upstairs That elevator lets up by the library and when the doors opened he saw at leadt 3 gun men around them. There is Proof that more were involved that [redacted] Dylan & Eric Cara did talk to the police but I dont think any arrests have been made. I am scared because I live around here and I dont know if anyone dangerous is wandering free.

We live right along the lake and you can see the lake perfectly clear. My brother saw 2 guys in army pants and black ~~jackets~~ jackets, not trench coats, walking on the path talking on cell phone. Now where I was, I was in the student parking lot and I saw a guy, very big in a black trench coat, walking up the stairs. The other guy who was shooting, didn't have one on. I thought the shooter was Eric Harris, but the girl who was with me said it wasn't. The guy in the black trench coat, I know for a fact that he isn't Dylan or Eric. He was very big with black hair. He just stood there watching the whole thing. My friend Cara, said it was a guy named [redacted] I looked him up in the yearbook and he looks very familiar.

Eric Harris	DOB: (040981)
Dylan Klebold	DOB: (091181)

WEATHER: Variable

EVIDENCE SEIZED BY: Representatives from Jefferson County Sheriff's Office

EVIDENCE IN CUSTODY OF: Jefferson County Sheriff's Office

REMARKS: The following reports are those for the teams designated as Team One through Team Five for processing the scene and vehicles associated with Columbine High School. Other teams also involved were team Six, the Federal Bureau of Investigation, who handled the two deceased victims on the grounds, the cafeteria, and the area around the building; Team Seven, the Denver Police Department, who processed the administrative offices and attended all autopsies; and Team Eight, the Bureau of Alcohol, Tobacco and Firearms, who handled the explosive evidence and the school parking lot on the southwest.

The reports for Teams One thorough Five represent the combined efforts of over thirty professionals from eight law enforcement agencies. Those agencies assisting the Jefferson County Sheriff's Office included the Colorado Bureau of Investigation (Denver, Pueblo and Montrose Offices); the Arapahoe County Sheriff's Office, the Wheat Ridge Police Department; the Arvada Police Department; the Greenwood Village Police Department; the Thornton Police Department, and the Littleton Police Department. All team leaders reported to Jefferson County Sheriff's Office Laboratory Supervisor Chris Andrist. Scene processing began after the school interior was deemed safe to enter according to explosive experts. The processing began Wednesday, April 21, 1999 and essentially concluded Thursday evening, April 29, 1999.

Teams One through Five worked with representatives from and for the Jefferson County Coroner's Office for the recovery of the bodies of eleven victims in the school and the bodies of Harris and Klebold. Team members also exchanged information directly with the five forensic pathologists who performed all of the autopsies. Summary data for these five teams is given on the chart on page 4.

The enclosed five narratives and photologs for Teams One through Five detail the activities of each team. Each photograph sleeve is numbered to denote the team, the roll of film and the exposure. A set of scaled diagrams for the library (processed by

Teams One and Two) will be a separate submission (Arapahoe County Sheriff's Office), as will any evidence logs (Jefferson County Sheriff's Office). All evidence was kept in the custody of either the Jefferson County Sheriff's Office or the Jefferson County Coroner's Office. These five reports are intended to be read in conjunction with their respective evidence logs and team diagrams.

REMARKS:

On April 20, 1999, crime scene personnel from various law enforcement agencies were assigned to assist with the processing of a crime scene at Columbine High School, located in Jefferson County, Colorado.

Upon arrival at the Command Post located on Pierce Street by Clement Park, crime scene personnel were informed that the bomb squads of various agencies were in the process of clearing the school and the parking lot of explosive devices. At approximately 11:30 p.m., all crime scene personnel were instructed that processing of the scene would not start until the bomb squads had completed their activities; therefore, all crime scene personnel would report back to the command post on Wednesday, April 21, 1999 at 8:00 a.m.

ACTION TAKEN:

At 11:45 a.m. on April 21, 1999, Chris Andrist of the Jefferson County Sheriff's Office conducted a briefing for crime scene personnel. A plan was presented to divide the crime scene into specific areas and assign a team of four or five crime scene personnel to each area. A team leader was designated for each team.

Team One personnel consisted of :
Barie Goetz, Colorado Bureau of Investigation
Ted Ritter, Colorado Bureau of Investigation
Tom Adair, Arapahoe County Sheriff's Office
Chris Loptien, Jefferson County Sheriff's Office
Donald Sollars, Colorado Bureau of Investigation

Team One was assigned the eastern half of the school library, which included victims numbered 1 through 5. In addition, Team One was later assigned the northwest library offices, hallway and the emergency exit door in that area.

At approximately 1:39 p.m., April 21, 1999, members of Team One were escorted through the crime scene portion of the school for orientation purposes. At approximately 2:05 p.m., team members initiated processing of the school library. The main emphasis of processing for the day was evidence documentation and collection to facilitate body recovery.

Duties assignments of Team One were:
Barie Goetz - bloodstain pattern interpretation, coordinator of the team.
Ted Ritter - photography, firearm evidence recognition
Tom Adair - measurements, crime scene sketching
Chris Loptien - evidence collection, evidence log
Donald Sollars - photography log
All team members were assigned the task of evidence recognition and the marking of its location with a green placard evidence marker. Numbers 600 through 899 were assigned to Team One for identifying evidence.

The main part of the school library consisted of an entryway on the northeast, staff counter and workspace on the north, student study areas with tables and chairs on the south, and computer tables on the northwest. Secondary areas of the library consisted of storage and staff rooms to the north of the main library and offices and hallway in the northwest area. The student study area was physically divided into three sections by the placement of bookshelves oriented north-to- south. Bookshelf Row 1 was attached to the east wall. Rows 2, 3, and 4 separated the east student section from the middle student section. Rows 5 and 6 separated the middle section from the southwest section. The east section of the student study area consisted of six tables, labeled Table 1 through Table 6 with accompanying chairs labeled 1A, 1B, etc. Three of the victims, #1, #2 and #3, were located in this section. The middle section of the student area consisted of eight tables, labeled Table 7 through Table 14, with accompanying chairs labeled 7A, 7B, etc. Two of the victims, #4 and #5, were located in this middle section. The west section was designated as part of the area processed by Team Two and its description is included in their report.

The Federal Bureau of Investigation Special Projects Team was present to prepare a detailed diagram of the entire school and surrounding areas. The Arapahoe County Sheriff's Office representatives on Teams One and Two have generated a detailed diagram of the library with the location of all physical features of the area and all items of evidence. Therefore, measurements concerning the location of evidence, bullet holes, tables, chairs, walls, windows, desks, etc. will not be included in the narrative of this report.

All items of evidence were assigned a number, photographed in place, measured for final location in sketch, and then collected in a suitable container and marked with the case number, item number, date, time, location, description, and the initials of the collector. The Jefferson County Sheriff's Office has generated a detailed list of evidence for the entire school and area; therefore, a detailed list of the evidence collected by Team One is not included in the narrative of this report.

Prior to collection of evidence, overall photographs were taken of the library entrance, main staff counter, student area, and bodies of the deceased.

Processing was initiated in the entryway. Evidence items consisting of spent cartridge cases and firearm projectiles were located and collected from this area. The entryway was then utilized as a staging area for equipment and personnel.

The area leading up to Table 2 in the east section of the student study area was processed for obvious items of evidence. Apparent bullet holes were present in the carpet under and surrounding Table 2.

Victim #1, later identified as LAUREN TOWNSEND, was found lying on her left side, bent at the waist, head to the north, feet to the east, under the northwest corner of the table. She was dressed in a blue top, denim pants and dark boots. Multiple bullet holes were noted in the back of the shirt. Bloodstains associated with the upper two holes were consistent with drainage of blood while the body was positioned as found. Minimal drainage was present around the two lower holes. Concentrated drainage of blood was present under the left arm. A linear blood drainage stain was present in the rectal area. Bullet holes were present in the right thigh area with surrounding blood drainage stains consistent with the position of the body as found. Transfer bloodstains were present on the lower legs and on the sides and bottom of the boots. These bloodstains were not associated with injuries to the victim. Bloodstains on the carpet indicated that the legs of the victim were moved to the east through wet bloodstains to their position as found. The position of Table 2 and the surrounding chairs were marked on the carpet and then moved to view the body. Additional bullet holes were noted in the front crotch area when the body

was moved. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the victim. A bloodstained shirt was present under Table 2 to the south of victim #1. Medical treatment type packages and bandages were present in this area. Bloodstain patterns on the carpet and on the vertical supports of Table 2 along with the shirt and bandages indicated that multiple injured individuals were present at some time under the table and then moved from the scene.

Victim #2, later identified as KELLY FLEMING, was found lying on the floor in a prone position to the southeast of Table 2. She was dressed in a black shirt, denim pants and black/white tennis shoes. An entry wound consistent with a shotgun discharge was present in the lower left back of the body. The plastic shotgun cup/wad was present in the wound tract. Several associated pellet holes were present adjacent to the main entry wound. Drainage of blood from the wound was minimal and consistent with the position of the body as found. Drainage of blood from the nose/mouth area was consistent with the position of the body as found. No other bloodstains were present on the body. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Victim #3, later identified as JOHN TOMLIN, was found lying on the floor in a prone position to the southeast of Table 6. He was dressed in a dark T-shirt, denim pants, and white/black tennis shoes. Numerous wood fragments and pieces of foam padding were dispersed in the area of the body. Drainage of blood from the right side of the head was consistent with the position of the body as found. A large pool of blood was present on the carpet extending to the west of the victim's head area and under the victim's chest and right arm. The victim's eyeglasses were present under the lower portion of the face. No bloodstains were noted on the pants or shoes of the victim. No impact blood spatter was noted in the area. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Victim #4, later identified as COREY DEPOOTER, was found lying on the floor in a prone position to the west of Table 14. He was dressed in a gray shirt, denim pants, and brown leather boots. A large concentrated bloodstain consistent with drainage from the rear of the neck and the upper chest was found under the body. This pooling of blood continued onto the carpet to the west of the body. A large concentrated transfer bloodstain was present on the lower back area of the clothing and body. No wounds were present in this area of the body. The bloodstain originated on the exterior of the outer shirt, soaked through to the thermal undershirt and onto the skin of the victim. A strap from the victim's backpack was present under the left arm of the victim and the backpack was found to the west of the body. The bottom of the backpack was heavily blood soaked. No corresponding stain was present on the carpet under the position of the backpack as found. A pattern in the pooled blood to the west of the body was consistent with the size and shape of the backpack bottom. The bloodstain patterns were consistent with the backpack initially lying in the pool of blood from the victim; the backpack being moved to the small of the back of the victim; and then moved to the floor to the west of the body. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Victim #5, later identified as DANIEL MAUSER, was found lying on his right side under Table 9 in the middle section. He was dressed in a tan shirt, denim pants, and black/gray tennis shoes. His right arm extended to the south and the wrist area was positioned on top of the right rear stile of Chair 9E. The chair was found lying on its back to the south of the victim. An injury to the fingers of the right hand was present and a small pool of dripped blood was found under the position of the hand. A concentrated pool of blood was present under the head, neck and shoulder area of the victim. Eyeglasses were found under the head of the victim, partially on the upper face. Chair 9E had a bullet path through the chair, entry in the seat cushion and exit in the front upper wooden rail. Wood fragments were dispersed over the body. A number of wood fragments were embedded into the right forearm of the victim. An injury to the right ear was noted upon repositioning of the body prior to transport.

Photographs were taken of the position of the body, the position of the chair as found, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Removal of bodies by coroner investigators from various agencies commenced at approximately 5:30 p.m. and was completed by 9:06 p.m.

On Thursday, Friday, Monday, Tuesday and Wednesday, April 22, 23, 26, 27 and 28, 1999 respectively, members of Team One returned to the library to continue documenting and collecting evidence. On Wednesday, April 28, 1999, Dr. Bodelson, Jefferson County Coroner, and the five pathologists who conducted the autopsies, Dr. Michael Dobersen, Dr. Ben Galloway, Dr. Thomas Henry, Dr. John Meyer and Dr. Jim Wahe, briefed the members of Team One on the preliminary results of the autopsies. Their findings are included in the narrative part of this report as they pertain to each victim.

The students' backpacks were examined for items to demonstrate the ownership. Materials remaining on the tables were similarly examined. After verification of the owner by identification cards or a multiple of other items, the student's name was printed on a section of tape and affixed to the table in the approximate location as his/her belongings were found. Backpacks and other items identified as belonging to one of the deceased victims were collected as items of evidence. The film was removed from a camera (item #737) found on top of Table 3 and collected as evidence. A disposable type camera from the top of a table in the middle student study area was collected as evidence.

Table 1, the first table on the right as the east section is viewed from the entryway, contained materials belonging to Mark Kintgen on the southwest corner and Jen Doyle on the northeast corner. Reports listed Mark Kintgen as having gunshot injuries to the head and neck. A pool of blood and eyeglasses were located under the southwest corner of Table 1. Chair 1A was located across from the table position of Kintgen's belongings. It was found facing south and positioned almost all the way under the table. It contained a shotgun discharge hole in the backrest with the entry on the north side and exit on the south side; pellet holes were present in the seat portion. A blood

transfer was found on the cross brace (stretcher) of the chair above the blood pool. The longitudinal cross brace under the table directly in front of Chair 1A contained shotgun pellet damage and one pellet was imbedded in this area. Chair 1E was located to the east of Kintgen's belongings and it contained a bullet strike in the southwest leg. Chair 1F was located to the south of Kintgen's belongings on Table 1 and it contained bullet strikes to the rear upper rail and the right rear leg. A blood transfer was present across the top of the backrest of Chair 1F. A bullet strike was found on the exterior surface of the north support of Table 3. No other projectile strike marks were found on Table 3. Trajectory of the shotgun blast to the backrest of Chair 1A aligned with the damage to the seat cushion, cross member of the table, bullet damage to opposing chairs and the eyeglasses and bloodstain under the table.

Preliminary autopsy results from Dr. Dobersen on LAUREN TOWNSEND indicated that both shotgun pellets and 9mm bullets were recovered. The numerous wounds and their locations indicated that the body had been shot in more than one position. Several rounds had exited the body.

Autopsy results from Dr. Dobersen on KELLY FLEMING indicated a single shotgun blast entered the lower left back, traveled straight upward, and the pellets were contained in the upper left back area. The acute angle of travel through the body indicated that the victim was in a prone or near prone position when shot.

Concentrated, congealed bloodstains were found projected onto the exterior vertical surface of the east support of Table 1. The stains range from 29" to 6" from the floor. Chair 1C also contained a concentrated, congealed, projected bloodstain on the left middle rail, 8.5" from the floor. The table support and left side of the chair were exposed to the area under Table 2.

The area under and surrounding Table 2 contained numerous bloodstain patterns. Concentrated pooling of blood was found on the carpet in the southeast area under the head of FLEMING. A large transfer bloodstain was found on the interior surface of the south table support. This stain covered an area 11" high by 12" wide. A concentrated bloodstain was found on the carpet

directly below this stain. Concentrated pooling of blood was found on the carpet to the north of this area. Concentrated pooling, dripping, and transfer bloodstains were found on the carpet to the southwest of Table 2. A bloodstained shirt and emergency medical supplies were found to the north of this area. Concentrated pooling of blood with associated spatter was found on the carpet at the base of the north support of Table 3. No bloodstains were found on the remainder of Table 3. Concentrated pooling, dripping, and transfer bloodstains were found on the carpet to the northeast of the table. A drip pattern extended to the north of the table. The bloodstain patterns associated with Table 2 were in excess of what would be expected from the injuries to TOWNSEND and FLEMING. Patterns indicated that individuals were injured under Table 2 and then were transported or moved away from the area. Personal belongings of Jessica Lea Holliday, Lisa Michelle Kreutz, and Jeanna Park were found on the east side of the table. Personal belongings of Diwata Perez and LAUREN TOWNSEND were found on the west side. Personal belongings of Val Schnurr and possibly from a Susan Peters were present on a small table to the northeast of Table 2. Personal belongings of Heather Jackson and Patti Blair were found on Table 3.

Chairs 2A and 2B were found to the north of Table 2. Chair 2A was facing to the northwest; Chair 2B was facing to the southeast. 2A had two bullet entry holes in the seat cushion, one exited the bottom of the chair, and the other one exited the top rail on the right side. Bloodspatter was present on the chair; however, no corresponding patterns were present in the surrounding area. Wood splinters from the chair were found under Table 2. Chair 2B had blood smears on the lower front left leg and on the seat cushion; however, no corresponding patterns were present in the surrounding area. A bullet impact site was present on the rear right leg. The physical evidence found on the chairs indicated that they were originally positioned to the sides of Table 2 and then moved to the positions as found.

Pellet impact sites were present on the interior surface of the north support of Table 2. One pellet penetrated the veneer surface and projected a section of wood from the exterior surface onto the carpet north of the table. This pellet was imbedded in the wood. The trajectory of the pellets indicated that the pellets originated from the

southeast and traveled under the table and struck the interior of the north support. Pellet wounds to TOWNSEND corresponded with this trajectory. Bullet impact sites in the carpet under and around the table were aligned both north-south and east-west. Examination of the exterior surface of the south support of Table 2 did not reveal any bullet strike marks or bloodstains.

Personal items identified as FLEMING's were found on and under the northeast corner of Table 4. The corresponding chair was moved back from the table. Examination of Table 4 and the six chairs associated with it did not reveal any bloodstains or bullet impact sites. No other person's belongings were found on Table 4.

The north end of Table 6 contained a bloodstain pattern consistent with expirated/aspirated blood. The origin of the bloodstains was determined to be approximately 51" above the surface of the floor, 43" from the east baseboard, and 19'6" from the south wall. The north side of Chair 6B also contained fine droplets of blood consistent with the source of bloodstains on Table 6. A linear pattern of small blood droplets was also found on the surface of Table 5 leading up to the position of a bloodstained multifunction tool. The tool was configured into the pliers position. No other bloodstains were found on Tables 5 and 6. Personal belongings of Nicole Nowlen were found on Table 5. Personal belongings of TOMLIN were found on Table 6.

The carpeted area to the southeast of Table 6 contained four bullet impact sites. The trajectories were parallel and were aligned in an east-west orientation consistent with an origin south of Table 5. A jacketed bullet was recovered from one of the carpet strike points. The lower left side of Chair 6D contained two bullet impact sites. The east bookshelf baseboard trim behind Chair 6D also contained a bullet strike. A dowel rod was inserted through the holes in the chair and aligned with the impact site on the baseboard. The convex mirror positioned on a support on the south wall contained a single bullet hole through the mirror and into the wall. A dowel rod was inserted through the mirror holes and into the wall hole to approximate the trajectory. The trajectories of the bullet paths through the mirror and the bullet hole through Chair 6D intersected at a location south of Table 5. Agent

Goetz held a dowel rod in each hand and approximated the intersection of the trajectories to demonstrate a possible common origin. This area was 9' from the south wall and 14' from the east baseboard. Photographs were taken of the damage to the mirror, baseboard, carpet, Chair 6D, and of the dowel rod trajectories.

Chair 5G contained a shotgun blast through the backrest portion. The entrance was to the rear of the seat back. Additional damage was noted on the upper portion of the front left leg. Debris from the chair was found under and to the east and south of Table 6. Pellets were found to the east of Table 6. Chairs 6A and 6E also contained impact sites. The evidence was consistent with Chair 5G being originally positioned along the west side of Table 6 when a shotgun blast originated from the area north of Table 5. A dowel rod was inserted through the hole to approximate the trajectory. Photographs were taken of the damage, indicated original position, and dowel rod trajectory. As reported above, TOMLIN was found on the floor to the east of Table 6. Preliminary autopsy results by Dr. Thomas Henry indicated three projectiles had entered the right side of the head/neck area and exited the left side. Additional injuries to the torso were consistent with shotgun pellets.

As reported above, MAUSER was found lying under Table 9 in the middle student section with Chair 9E lying to his south. Preliminary autopsy results from Dr. Galloway indicated three wounds. The right hand had two defects present. A bullet graze injury was present on the right ear, and the fatal injury was due to a single bullet that entered the nose and exited the back. Bloodstains on the carpet between Table 1 of the east section and the location of MAUSER indicated an individual with a bleeding injury or injuries traveled from the area of Table 1 toward the west and Table 9. Bloodstains on the rows of bookshelves in this area were found where a person with an injury to the right hand would have touched as he or she moved to the west. The arrangement of chairs to the south of Table 1 indicated an individual in addition to Mark Kington was seated on the south side of Table 1.

A dowel rod was used to demonstrate the trajectory of the bullet hole through Chair 9E. The chair was originally found lying on its back; however, the trajectory through the chair was not feasible with that position. With the

chair upright on its legs and placed to the south of Table 9, the trajectory of the bullet and a bullet strike mark in the carpet indicated a common area of origin. Photographs were taken of Agent Goetz standing in various locations south of Table 9 holding a dowel rod to simulate a weapon.

As reported above, DEPOOTER was found under Table 14. Preliminary autopsy results from Dr. Jim Wahe indicated three injuries. A single bullet entered the left arm, continued through and entered the left chest, and exited the back of the neck. A second single bullet entered the upper back leaving an atypical entrance hole and lodged in the left chest. A third single bullet entered the back and lodged in the left chest. Three bullet strike marks were found in the carpet under Table 14. Two were aligned east-to-west and one was aligned south-to-north.

Bloodstains were collected from various areas for possible future comparison to injured or deceased individuals. A sample of the pooled bloodstain from under the east end of Table 1 was collected for comparison to the blood of Kington. A sample of the bloodspatter from the top of Table 6 and a sample of the droplets from the top of Table 5 were collected for comparison to the bloods of HARRIS and KLEBOLD. Samples of five different bloodstains from the carpet in the area of Table 2 and a sample of the blood from the side of Table 1 were collected for comparison to blood standards of TOWNSEND, FLEMING and the injured individuals who were shot while under Table 2. A sample of the blood from the carpet between bookshelf Rows 2 & 3 and a sample of the transfer stain on a vertical surface of bookshelf Row 4 were collected for comparison to the blood standard of MAUSER. Samples of the pooled blood from under the positions of victims TOWNSEND, FLEMING, TOMLIN, DEPOOTER, and MAUSER were collected as substitute standards of the victims' bloods.

Paper debris was present in the middle student section at the base of bookshelf Row 5. The color and texture of the paper pieces matched the large debris field found between Rows 5 and 6.

A bullet hole was found in the south wall above the third window from the east. A large caliber projectile was collected from this location. The apparent general

trajectory was consistent with having originated from the window area of the west wall of the library.

An exit bullet hole through an art display on the east wall of the student section was determined to be a continuation of an entrance bullet hole in the west wall of the hallway outside the library. The bullet continued upward into the ceiling of the east section of the library where it ricocheted off of the concrete roof supports and came to rest on the upper surface of the ceiling tile above Table 14. The trajectory of the various paths through the wall and ceiling indicated an origin on the stairs landing leading to the cafeteria.

The center student study section contained eight tables numbered 7 through 14 as depicted on the crime scene diagram. Table 7, the first table on the left as viewed from the north, contained personal belongings of Aaron Welsh. Table 8, the first table on the right as viewed from the north, contained personal belongings of Aaron Cohn, Byron Kirkland, Joshua Lapp, Megan Coxey, Craig Scott, and Brittany Bollerud. A backpack belonging to MAUSER was found on the floor next to Table 9. Table 10 contained personal belongings of Sara Houy and Crystal Woodman. Table 11 contained belongings of John Savage. Table 12 contained personal belongings of Lindsay Elmore and Rebecca Parker. Table 13 contained belongings of Athena Lagos. Table 14 contained belongings of Peter Ball and DEPOOTER. A backpack with items labeled Austin Eubanks was found on a chair along the south wall.

On April 22, 1999 Team One was assigned to process and document the hallway, five offices, conference room, and emergency exit of the northwest corner of the library, as well as the staff service area at the north end of the main library. The area was documented through sketches. Placards were mounted to the walls outside each office designating the offices as "LMC-1", "LMC-2", "LMC-3", "LMC-4", and "LMC-5". The rest of the area was comprised of a conference room, designated as Office #2 in photographs, and a hallway. The following observations were made in each room or hallway. See sketch for measurements of items and bullet holes. Bullet holes were given an alphanumeric designation (for example, BH-1). All entry doors were on the east side of each office.

LMC-1 was the southernmost office. The office door was closed and locked upon arrival on scene. The office had a long desk that ran the length of the south and west walls. Bookshelves took up much of the space on the north wall. There were windows on the south and west walls of the office. No evidence was located in office LMC-1.

LMC-2 was directly north of LMC-1 and had two windows along the west wall. The office door was closed and locked upon arrival on scene. A rectangular wooden table and four chairs were in the center of the room. A small computer table was against the east wall to the south of the office entry door. A small book cart on casters was against the north wall just west of the entry. There was no evidence located in LMC-2.

LMC-3 was directly north of LMC-2 and had one window along the west wall. The office door was closed and locked upon arrival on scene. A long worktable was attached to the south wall. A chair and a file cabinet were located in the southwest corner of the room. A row of staggered bookshelves was attached to the north wall west of the entry door. An apparent bullet impact defect was observed in the north wall above the door. A bullet fragment (item #763) was recovered from that location (corresponded to BH-6 in LMC-4).

LMC-4 was directly north of LMC-3 and had one window on the west wall. A small table with a television on it was located in the northwest corner of the office. There was a rectangular wooden conference table and six chairs in the center of the room. There was loose wallboard debris over the top of the table. The debris appeared to have come from three bullets that penetrated the north wall of the office, passed over the table, and entered the south wall of the office. The south wall of the office contained three bullet holes given the designations BH-4, BH-5, and BH-6. A bullet fragment (item #761) was recovered from the hole designated BH-4 (corresponded to BH-1 in LMC-4). Another bullet fragment (item #762) was recovered from the hole designated BH-5 (corresponded to BH-3 in LMC-4). The bullet fragment forming BH-6 was actually recovered from the north wall, adjoining LMC-3.

The north wall of the office also contained three apparent bullet holes designated BH-1, BH-2, and BH-3. There were no bullet fragments located in these holes.

LMC-5 was the northernmost office in the northwest library hallway. LMC-5 had one window on the west wall and one on the north wall. A small wooden table, black metal audio-visual cart, and chair were located against the south wall of the office. A green metal audio-visual cart was against the east wall directly south of the entrance.

There were seven apparent bullet holes in the south wall of LMC-5. The holes were labeled BH-6 (corresponded to BH-1 in LMC-4), BH-7, BH-8 (corresponded to BH-3 in LMC-4), BH-9 (corresponded to BH-2 in LMC-4), and BH-10. BH-7 contained the copper jacketing associated with lead fragment item #761. BH-10 contained two copper jackets (one associated with item #762) and one lead bullet fragment (item #767). There were also numerous secondary missile impact sites in the area of BH-10 consistent with small glass fragments projected towards the wall, with the bullet fragments, from the north window.

The window on the north wall had five bullet holes through it (three through the glass, two through the frame). No bullet fragments were located in these five holes. The holes were labeled BH-1 (corresponded to item #764), BH-2 (corresponded to BH-6 and BH-7), BH-3 (corresponded to BH-10), BH-4 (corresponded to BH-8 and BH-10), and BH-5 (corresponded to BH-9). It was determined through glass fracture analysis that the sequence for the bullet holes in the north window glass of LMC-5 was as follows:

1. BH-2
2. BH-3
3. BH-4

The following chart explains bullet hole correspondence for LMC-5 through LMC-3 going from north-to-south:

Ext. North	LMC-5 North	LMC-5 South	LMC-4 North	LMC-4 South	LMC-3 North
BH-1	BH-1	ON FLOOR (#764)			
BH-2	BH-2	BH-6/BH-7	BH-1	BH-4	IN WALL (#761)
BH-3	BH-3	BH-10			
BH-4	BH-4	BH-8/BH-10	BH-3	BH-5	IN WALL (#762)
BH-5	BH-5	BH-9	BH-2	BH-6	IN WALL (#763)

The five bullet holes in the north window and frame of LMC-5 were also documented from the exterior north library wall. In addition, two bullet impact sites were located in the north wall between the north window of LMC-5 and the emergency exit door at the north end of the library hallway.

There were several bullet impact sites in the hallway at the northwest corner of the library. All of the bullet trajectories were traveling south. A wooden twenty-drawer map storage cabinet, located against the east hallway wall, had three bullet impact holes on the north side of the cabinet. Two of the bullets (BH-1 and BH-3) were recovered inside the cabinet. One bullet (item #757) was embedded in the wood of the south edge of drawer #10 from the top and was facing south. One bullet (item #755) traveled through the map cabinet (BH-2 to BH-4), exited the map cabinet then entered the rear of the television cabinet to the south of the map cabinet. Upon making contact with the front frame of the television on the west side, the bullet made a dramatic turn to the east and exited between the plastic face and glass screen of the television set. The bullet then traveled east and struck the east wall. The bullet was recovered from the floor beneath the television cart. Wallboard material was observed on the nose of the bullet at the time of collection.

At the south end of the hallway, on the east wall separating the hallway from the conference room, there were several bullet impact sites. One bullet impacted the upper northern frame of a chair (CH1) along the east wall. The bullet impact (designated impact #1) sent smaller pieces of metal across the wall and through a picture frame on the east wall at the south end. A second bullet impact (designated impact #2) struck the wallboard to the south of CH1 and impacted below the computer table. Team Two recovered that bullet. The third bullet impact (designated impact #3) struck the wood corner molding at the south end of the east wall. The projectile then traveled south and hit a Macintosh computer monitor on the computer table. All three impact sites were tested with sodium rhodizinate with positive results for lead. A fourth projectile also passed through the lower back (south) partition under the computer table and was designated projectile hole #1A by Team Two. A minimum of 15 projectiles was determined to have been fired from

the north end of the library, down through the northwest hallway and offices towards the south.

The conference room was located on the southeast end of the hallway and directly west of the library magazine storage room. The conference room consisted of a large wood top conference table, surrounded by six padded chairs, in the center of the room. A small table was to the west of the entrance along the north wall of the conference room. A large paper writing pad on an easel was located in the southeast corner of the room. There was a bullet hole in the north wall of the conference room on the west edge of the doorframe. The trajectory of the bullet was traveling south into the conference room. As the bullet passed through the wall it fragmented. Several copper and lead fragments were found on the floor, tabletop, chairs (Chairs "A" and "D") and the south wall. A bullet hole was located in the floor molding of the south wall. The largest of the lead fragments (item #752) was located in the south wall under the easel. An apparent bullet wipe was found on the conference room floor in the southeast quadrant of the room. The wipe was in line with the bullet hole impact area on the floor molding. The area tested positive for lead with sodium rhodizinate.

The magazine storage room was located directly east of the library conference room. Entry into the room could be gained by either the conference room or the staff service area. The room was comprised of two rows of magazine stacks as well as shelving on the south and west walls. No evidence was located in this room. Both doors were open and unlocked upon arrival.

The staff service area was located at the northern end of the main library. The area was comprised of a large wood countertop work area. There were two computer terminals centered in the service counter, which faced south. Inspection of the area revealed that an under-the-counter telephone (presumably for staff use) was off the hook with the receiver on the floor behind the counter. One of the blue cushioned bar stool style chairs from the computer terminal area had apparent bullet hole damage to it. The chair was found on top of the counter to the east of the easternmost computer terminal. The computer monitor was off center of the CPU to the west and had scuffs on the front of it indicating that the chair had been thrown onto the counter striking the computer

monitor.

A small rectangular wooden printer stand cabinet was located at the northwest end of the staff service counter. The cabinet was open to the east and 100 sheet packs of white (8 1/2"x11") printer paper were stored under the counter on the staff (east) side. A computer printer (HP Laser Jet 5si/mx) was essentially centered on top of the cabinet. There were at least 14 shotgun pellet impact sites on the wood frame of the cabinet, some caused by ricocheted pellets. At least three pellets also struck the east side of the upper northwest paper bundle (item #735). No on-site examination or extraction of pellets was performed. One pellet (item #699) was recovered from the lower paper tray of the HP printer east side. Five other pellet impact sites were located on the west side wall of the westernmost staff seating area (access panel location) directly south of the printer cabinet. Additional items of evidence were recovered from the floor and countertop areas of the staff service section (see evidence report).

2	None
3	A. Thomas, backpack
4	**#691** midrange
5	**#691** close-up
6	B. Anderson, backpack
7	**#692, 695, 696, 697** midrange
8	**#692** close-up
9	**#695** close-up
10	**#696** close-up
11	**#697** close-up

Roll #11 continued

12	**#693, 694** midrange
13	**#693** close-up
14	**#694** close-up
15	**#698, 699, 700** midrange
16	**#698** close-up
17	**#700** close-up
18	**#699** close-up
19	**#701** midrange
20	**#701** close-up
21	**#703** midrange
22	**#703** close-up
23	Medium range, **#699** showing metallic fragment in bottom tray of copier
24	Close-up, **#699** showing metallic fragment in bottom tray of copier
25	Midrange **#704**, Table 6
26	**#704** Table 6, top
27	**#704** Table 6, top
28	**#704** Table 6, North end
29	**#705** Table 5, top – blood on floor
30	**#706** blood on carpet behind Chair 2A
31	**#707** Northeast corner, Table 2, blood on floor
32	**#717** Eastside, Table 2, blood on floor
33	**#712** Body #2, blood on floor
34	**#708** Southwest corner, Table 2, blood on floor
35	**#716** under Table 2, blood on floor
36	**#713** Body #1, Northwest corner, Table 2, blood on floor

Roll #12

1	Card
2	**#709** blood on carpet between Rows 2 and 3
3	**#710** side end, Row 4, Southeast corner, Table 9
4	**#711** Body #3, blood on carpet, South side, Table 6
5	**#714** Body #5, blood on carpet

Roll #12 continued

6	**#715** Body #4, Southwest side, under Table 14, blood on carpet
7	**#718** blood on East end, Table 1
8	**#719** bottom, Row 1
9	**#720** trash can entry corner
10	**#720** close-up
11	**#721** Body #1, backpack
12	**#722** Table 2
13	**#723, 724, 725**, Table 4
14	**#726, 727, 728**, Table 6
15	**#729** beside Table 14
16	**#730** beside Table 9
17	**#731** Table 9
18	**#738**, #1 stool, front, staff service area
19	**#738**, #1 stool, back
20	**#738**, #1 stool, front/scale
21	**#738**, #1 stool, back/scale
22	Inside staff service area counter, West end
23	Inside staff service area counter, West end
24	**#732-735, 739, 740** midrange
25	**#732-735, 739, 740** midrange
26	**#732, 733**
27	**#735**
28	**#734**
29	**#739, 740**

Roll #13

1	Card
2	**#741** midrange, bullet under carpet in thick stain
3	**#741** Midrange, bullet under carpet in thick stain (Body #3)
4	**#741** carpet under Body #3
5	**#741** close-up of bullet core beside copper jacket under carpet
6	**#742** overall, underchair
7	**#742** midrange
8	**#742** close-up

Roll #13 continued

9	**#743** midrange
10	**#743** close-up
11	**#744** midrange
12	**#744** close-up
13	Overall photo of trajectory rods in place, South of Table 6 and Chair 6D
14	Overall photo of trajectory rods in place, South of Table 6 and Chair 6D, No flash
15	Photo of Chair 6D with trajectory rod showing approximately 15° downward, repositioned
16	Overhead shot, Table 6, showing Chair 5G
17	Chair 5G at Table 6
18	Chair 5G with trajectory rod, repositioned
19	Chair 5G with trajectory rod, repositioned
20	Overall mirror, South wall with trajectory rod
21	Midrange mirror, trajectory rod through mirror into wall
22	Close-up, trajectory rod through mirror into wall
23	Overall, possible shooter position – mirror/Body #3 (possible problems with camera – rewind on)
24	Overall, possible shooter position – mirror/Body #3 (possible problems with camera – rewind on)
25	Overall, possible shooter position – mirror/Body #3 No flash
26	Overall, possible shooter position – mirror/Body #3 No flash
27	Overall, convergence/mirror
28	Overall, convergence/mirror
29	Overall, convergence/mirror
30	Overall, convergence/mirror
31	Convergence aspirated/expirated blood, Table 6
32	Close-up, convergence aspirated/expirated blood, Table 6
33	North end, Table 6
34	North end, Table 6
35	North end, Table 6

Roll #14

1	Card
2	**#744** trajectory rod
3	Overall trajectory rod, **#744**, tables 3 and 4, South, downward 10°
4	**#745** mirror with copper jacket
5	**#746** bullet from wall above window, 3rd from East
6	**#768**, copper jacket, 3S, 25E ceiling panel
7	**#768**, copper jacket, 3S, 25E ceiling panel
8	Entrance from hall/ceiling **#768**
9	Entrance from hall/ceiling **#768**
10	Exterior hall, **#768/1281**
11	Landing steps to **#768/1281** long range
12	Landing steps to **#768/1281** midrange

Team Two

Report Date May 21, 1999	Colorado Bureau of Investigation Report of Investigation	Case No. D99-1333
Type of Report Crime Scene	Report By Agent Tom J. Griffin Team Leader	Area Jefferson County
Nature of Case Homicide		

CRIME SCENE REPORT FOR TEAM TWO

REQUESTING AGENCY:	Jefferson County Sheriff's Office	
INVESTIGATING OFFICER:	Lab Supervisor Chris Andrist	
DATE OF REQUEST:	April 20, 1999	
DATE OF OFFENSE:	April 20, 1999	
AGENCY CASE NUMBER:	99-7625	
LOCATION OF SCENE:	Columbine High School, 6201 South Pierce Street, Jefferson County	
VICTIMS: (DECEASED)	Cassie Bernall	DOB: (110681)
	Steven Curnow	DOB: (082884)
	Matt Kechter	DOB: (021983)
	Isaiah Shoels	DOB: (080480)
	Kyle Velasquez	DOB: (050582)
SUSPECTS:	Eric Harris	DOB: (040981)
	Dylan Klebold	DOB: (091181)
WEATHER:	Variable	

EVIDENCE SEIZED BY: James Jennings, Tom Acierno, Steve Stalter all Jefferson County Sheriff's Office representatives

EVIDENCE IN CUSTODY OF: Same as above

REMARKS: The following is a group report for the members of Team Two, assigned to the west side of the library media center of Columbine High School. In addition to Griffin, the reporting team leader, other members and their agencies were

Tom Acierno (Jefferson County Sheriff's Office)
Laura A. DeLong (Arapahoe County Sheriff's Office)
Alan Hammond (CBI Denver)
James R. Jennings (JCSO)
Peggy Rowlett (Wheat Ridge Police Department)
Jennifer Savage (JCSO)
Richard Swanson (CBI Pueblo)
Steve Stalter (JCSO).

The composition of this team varied during the time of the processing.

On Tuesday April 20, 1999, various team members responded at different times to the area of Columbine High School in Jefferson County to assist the Jefferson County Sheriff's Office in the investigation of multiple deaths, gunshots, and explosions. No processing teams were allowed to enter the building on April 20th due to the safety concerns with the presence of unexploded devices.

ACTION TAKEN: On the morning of Wednesday, April 21st, various team members were involved with either recording information and checking vehicles in the school parking lots for possible explosive devices or participating in searching the grounds and Pierce Street for possible evidence. After an assessment of the scenes by members of the Jefferson County Sheriff's Office (JCSO) and Jefferson County Coroner's Office (JCCO), Chris Andrist conducted a preliminary walk through for, and overall documentation by, Tom Adair (Arapahoe County SO) and Bob Lloyd (Thornton PD) for videotaping and Chris Loptien (JCSO) and Griffin (CBI) for photography. These individuals entered the school

at approximately 10 a.m. and began the documentation at approximately 10:50 a.m. completing it at approximately 12 p.m. Andrist identified the team assignments outside of the school and team members then met to ensure a standard approach to all of the scenes. Each of the teams was led through the various scenes in the school to help in the assessment of evidence.

Team Two entered the building at approximately 1:54 p.m. The processing of the scene continued until Thursday April 29th. The approximate scene activity times were as follows:

Wednesday April 21st, 2 p.m. to 11:00 p.m.
Thursday April 22nd, 8 a.m. to 5 p.m.
Friday April 23rd, 8 a.m. to 7 p.m.
Monday April 26th, 9 a.m. to 8:30 p.m.
Tuesday April 27th, 9 a.m. to 7 p.m.
Wednesday April 28th, 7:30 a.m. to 6 p.m.
Thursday April 29th, 8 a.m. to 6:30 p.m.

The library media center was on the southwest end of the high school on the upper floor, level with the main entrance. It was above part of the cafeteria. For processing purposes, the library was divided into east-west sections at the pillars to the east of the fifth row of bookshelves. Team One handled the east section and some of the rooms to the north of the library and the hallway on the northwest leading to an emergency exit. Team Two worked the west section. The west, curved wall was comprised of ten columns of windows, each with double panes of glass. These were numbered sequentially from north to south, beginning with number 1 at the north wall. Each column of windows was arranged in three vertical sections (top to bottom) of glass separated by metal frames. The largest section was on the bottom.

The numbering sequences for bookshelves and tables were continued from labels assigned by Team One in the east side. Three rows of metal bookshelves, labeled Rows 5, 6 and 7, extended north to south. Row 8 was along the southwest wall below the windows. Six wooden tables labeled as Tables 15 through 20, each with wooden and cloth chairs in various positions relative to the tables, were in the south portion of the room. Two rows of tables (computer workstations) and chairs, running east-to-west, were in the

north portion. Walls were painted white; the suspended ceiling tiles were white; and the gray carpet, with green border on some portions next to the walls, was glued to a concrete floor.

The scene processing included measurements and diagrams (primarily handled by DeLong), photography (Swanson and Jennings), identification of evidence and some package preparation (Hammond and Griffin) and collection, sealing and log entry of evidence (Jennings, Savage, Acierno, Stalter, and Rowlett), projectile entrances, exits and trajectories (Hammond and Griffin), and bloodstain pattern evaluation (Griffin). This team had been assigned evidence numbers 900 through 1199. All item numbers in this report are those assigned by JCSO.

One primary focus on the 21st was to document the positions of the victims and suspects with photography and measurements, and collect any evidence near the bodies that might be disturbed in the process of removing the bodies. The other primary focus was to obtain firearm data for the Bureau of Alcohol, Tobacco and Firearms (ATF). In addition, pieces of window glass were occasionally falling out or coming loose when team members were working next to them. A west wind was also increasing and blowing some of the cardboard evidence placards. Since storm clouds were also moving in, this team requested that the broken or missing windows be boarded. As that activity could further dislodge the glass, priority was placed on examining and documenting the projectile holes in and around the windows.

Special Agent Gary Wurm (ATF) had requested information from the four firearms found on the floor by the bodies of HARRIS and KLEBOLD. A 12 gauge pump shotgun (Item #900) with a spent round in the chamber was found partially under HARRIS' right leg. (Refer to page 28 for a detailed description of the firearms.) A Hi Point 9mm carbine (Item #901), with empty chamber and no magazine, was on the floor to the west of HARRIS' left foot and to the north of KLEBOLD's right knee. An empty, single column magazine (Item #989) was on the floor between HARRIS' left boot heel and the butt of the carbine. A double-barrel shotgun (Item

#902) with a spent shell in each chamber was to the north and west of KLEBOLD's left toe.

A TEC-9 (Item #903) with a live round in the chamber was in the right hand and under the right leg of KLEBOLD. It was also attached with a strap to KLEBOLD's body. At 3:35 p.m. under the direction of Jefferson County Coroner's Office Chief Deputy Coroner Triena Harper, Hammond and Griffin cut the strap holding this firearm and removed it from KLEBOLD's right hand. At this time Harper also stated that all firearms related evidence and weapons from the bodies could be collected as evidence by Team Two working with coroner representatives later this day. The firearm information was copied by one of Wurm's agents for ATF use in record tracing. The firearms were collected and packaged the evening of the 21st. After each was secured in a separate cardboard box, a sheet of plastic was sealed across the opening of each box, so that each weapon could be viewed while keeping the evidence seals intact.

The deceased previously had been given numbers by JCSO; identifications were made at a later time. Victim #6, MATT KECHTER, a white male, was on his back under Table 16 against the north table leg or support. His right leg was extended to the west and his left leg under his right thigh. Possible burns were seen on his left hand, the center and right side of his gray, long-sleeve shirt, and two dark areas on his blue jeans. He was wearing white athletic shoes, white socks, and a ball cap with the letter "M". His head was towards the east. Blood was on his face and the left shoulder of his shirt. A hole was in the left front shoulder of the shirt. His right hand held some type of writing instrument.

Victim #7, ISAIAH SHOELS, a black male, was to the south of, and slightly under, KECHTER. He was generally facedown with the left side of his chest slightly above the floor. His legs were extended generally to the west. SHOELS was wearing a black, short sleeve shirt, green slacks, and white socks and white athletic shoes. A pool of blood was under and to the south of his head. SHOELS head was towards the east.

Victim #8, STEVEN CURNOW, a white male, was seated on the floor in the leg area of computer station number LMC 17. This station was at the west end of the south side of the south row of computer stations. His back was against the west panel with his right leg partially bent and under his left leg, which was also partially bent. His arms were crossed at the wrists and in his lap. He was wearing a short sleeve blue shirt, blue jeans, white socks and brown and black boots. A large wound was on the right side of his neck. His books (Item #1040) and backpack (Item #1020) were found near the center on the south side of the north row of computer stations.

Victim #9, CASSIE BERNALL, a white female, was found under Table 19. Her shoulders were against the west side of the table, her head tilted to the north, and her legs extended to the east. She was wearing a green, short sleeve shirt over a black shirt, light blue jeans, white socks and black boots. There was blood on the right side of her face, her right hand, and the right and center portions of her clothing. An apparent contact or near-contact wound was visible on the back of the right hand. Another wound was also visible on the right side of her head.

Victim #10, KYLE VELASQUEZ, a white or Hispanic male, was on the floor in front of the south side of the north bank of computers at station 7. He was on his right side, head facing southwest, with his left leg extended south and bent at the hip, and his right leg bent under the left. His left arm was under him and his right arm partially under his head. He was wearing a blue and green coat over a white shirt, black pants, and black athletic shoes. He had a wound to the top of his head.

Body #11, DYLAN KLEBOLD, a white male, was on his back with his head pointing east. His legs were bent at the hip with his knees towards the north and his lower legs pointing west. His left arm was across his stomach with a fingerless black glove on his left hand. His right arm was extended by his side and his right hand was around the grip of the TEC-9 pistol. Gray tape, holding two match strikers to the inside of the forearm, was around his right wrist . He was wearing a black T-shirt with the word "wrath" in red on the front, black

cargo-type pants, black boots and white socks. A large knife was on the left side of his belt. His face was bloodstained and a pool of blood was on the carpet under his head. Ammunition on his body included 14 rounds of 2 3/4" Federal shotgun shells in an ammunition belt around his waist; in a bandoleer were 19 rounds of Federal 00 buck shells; numerous live shotgun shells in a pouch in a pants pocket.

Body #12, ERIC HARRIS, a white male, was to the north of KLEBOLD. The upper back was leaning against the bottom shelf of the west side of Row 6 with his head pointed south. His skull was open at the top and the shelves behind (to the east) of him and the ceiling above him and the carpet below his head were bloodstained. His arms were by his chest with his forearms and hands angled up towards his face. He had a fingerless black glove on his right hand, which was next to a green pouch with shot shells. His legs were somewhat extended to the west. He was wearing a white T-shirt, black pants with a green ammunition belt, black boots and a knife strapped to his right leg. He had an ammunition pouch in his left cargo pants pocket. That pouch contained 10 rounds of Winchester 12 gauge shotgun shells, each shell labeled as containing 15 pellets of 00 buck. Two single-column magazines with 9mm rounds were in a pants pocket. A black ball cap with the letter "B" was between HARRIS' left leg and KLEBOLD's head.

Representatives from other coroner's offices were working with Dr. Nancy Bodelson, Jefferson County Coroner, and her staff in removal of the bodies. This included Dr. Thomas Henry, Denver County Coroner and staff from his office and staff from the Douglas County Coroner's Office. Bodies were removed beginning with VELASQUEZ and CURNOW and ending with KLEBOLD and HARRIS. Per a previous discussion with Harper (JCCO), Investigator Mike Guerra (JCSO) was present and searched both HARRIS and KLEBOLD for explosive devices in the presence of representatives from one or more coroners' offices, including JCCO. Devices were found in KLEBOLD's pockets and Guerra collected these. Photographs were taken in conjunction with the work of the coroners' offices.

The Jefferson County Coroner's Office also collected skull pieces (#962 and #991) from two areas on the carpet; one to the west of KLEBOLD and the other to the south of HARRIS. When the body of HARRIS was being moved into the body bag, a mass of blood fell out of the open skull and landed on the carpet where KLEBOLD's body had been. That office also collected the student ID card (Item #923) of VELAZQUEZ which had been on top of computer monitor #10B when his body was removed.

The tops of the tables were coated with a white dust-like material and small pieces of glass were randomly present. Oblique lighting was used to examine the tabletops for any possible footwear impressions and none were observed. The bottoms of tables, computer work stations, and chairs were examined for possible evidence and explosive devices. No additional devices were found. The floor was carefully searched. Other observations included the presence of small (estimated 1-2mm) spheres present throughout the west section, including several shelves of the magazine racks at the north end of the library. Other metal fragments were also on these magazine shelves. These fragments and spheres were collected and numbered as one group (Item #1152).

Wooden matches, both burned and unburned, were found on the floor primarily in the south half of the west side of the library. A black trench coat (Item #929) was on the floor to the south of the south row of computer stations. The backpacks, bags, books and clothing found on scene were examined for possible evidence and identification. Anything determined to belong to a deceased victim was collected as an item of evidence. Personal items, excluding those with safety hazards, were identified for future return.

Pieces of gray duct tape were also present on the floor and on, or adhering to, other furnishings such as shelves. The books on the shelves of Rows 5, 6 and 7 were each removed and examined for evidence such as holes or blood. Those books with holes in them were opened and examined for any metal objects. Such objects were photographed and collected. The bottom shelves were also removed and the carpet below examined. The larger glass pieces on the floor

below the west windows were examined and removed by hand. The smaller glass pieces and debris were examined and moved by hand or a small brush. Metal fragments found were documented and collected. The glass pieces were placed in a custodian waste barrel either by hand or by brushing. A custodian vacuum was used to remove the glass debris during the searching process.

All of the student computers were left as found for examination by computer specialists. Some of these systems were still on. Others were without power, as were some of the electrical outlets by the two computer tables. The table tops under the keyboards and computer units were examined.

No computer was at the station immediately east of LMC 17 where CURNOW was found. This station had bloodstains on the carpet and the surfaces under the table. No deceased was found at this site. On the carpet were pieces (Item # 1061) of jewelry-like components (such as from a bracelet or necklace). These pieces were silver-colored spheres, an estimated 1/8" in diameter, with a hole in the center; 1/4" diameter silver-colored disks; and 1/2" wooden tubes all in the blood pool on the carpet. A disk (Item # 1058), similar to these, and a blue rubber band (Item #1059) were found on the wet, partially snow-covered, concrete step outside the emergency door north of the library. Suspected blood was also noted on the push bar of the door, the carpet in the hall, and on the concrete step. This team collected Items # 1058 and 1059, but this hallway area was processed by Team One at a later time.

Griffin and Hammond examined the holes in the glass remaining in the windows to determine the direction of travel for the projectiles producing these holes. These determinations were made by either noting the beveling of the holes or the presence of damage on the west side of support posts when no projectile hole was discernible. A minimum of 24 incoming projectiles was determined. This number was a minimum as a large portion of Window 5 was missing. There was also one damaged area on the metal frame of Window 5 that was believed to be the result of a projectile traveling in an unknown direction. There were

three holes caused by projectiles traveling out of the library windows. (Refer to trajectory section of report on page 14.)

The exposed (library) surfaces of the ceiling tiles, fluorescent light fixtures and grates for air vents were examined. Two large (estimated 1/4" or bigger) holes that perforated the tiles were seen. With one exception, all of the scrapes and small holes in the ceiling tiles aligned with the windows penetrated or shattered by incoming projectiles, including a direction of travel east from the windows when such a determination was made. The indentations in the metal reflective backing of the fluorescent lights were also consistent with an origin from or through the west windows. One gouge, approximately 1" wide and 2 1/2" long above or slightly south of Table 17, had a generally north-to-south orientation for its long axis. This would be consistent with a projectile (such as from an explosive device or a firearm) coming from either the south or north, including from the general area of the body of KLEBOLD or previous damage to the tile. A piece of white material consistent with ceiling panel was on Table 17.

A search of the tops (unexposed) of the tiles disclosed the presence of two metal fragments and isolated small (about 1-2mm diameter) gray metal spheres identical to those found on the floor, furniture and windowsill(s) of the library. The rails for the suspended ceiling tiles were attached to concrete beams. Sections of drywall on the south and west walls and window frames and sills on the west side were cut to follow projectile tracks and recover any evidence. Metal pellets, which had fallen down the hollow metal frame that extended from the library to the cafeteria below, were recovered from the floor behind the drywall of this lower room.

A nylon knife sheath with a double-edged knife and two metal spikes had been removed from the left boot of HARRIS. Swanson and Griffin examined the sheath and contents and performed the phenolphthalein presumptive test for blood. No positive reactions were obtained.

On Friday, April 23rd, Griffin was introduced to School Resource Officer Deputy Neal Gardner at 11:45 a.m.

Gardner described his gunfire sequence that occurred at the double doors on the west side of the hall north of the library. Since this would not account for the incoming projectiles through the north emergency exit of the library, Gardner would meet with the appropriate team for that area.

On Wednesday, April 28th, Teams One and Two met with Dr. Bodelson and the five pathologists who conducted the autopsies: Dr. Michael Dobersen (Arapahoe County Coroner) Dr. Ben Galloway (for Jefferson County Coroner), Dr. Thomas Henry (Denver County Coroner), Dr. John Meyer (Boulder County Coroner) and Dr. Jim Wahe (for Denver County Coroner). After being shown the overall building scene by Andrist, the group began an escorted review of the library with the teams.

The preliminary information for each deceased available at this time was as follows:

KECHTER (#6) [from Dr. Henry/Wahe] suffered a gunshot wound to the chest, with a left-to-right trajectory with possible wadding in the right lung. He had also suffered burning from an unknown incendiary (explosive or flammable) device.

SHOELS (#7) [from Dr. Meyer] suffered a gunshot wound perforating the left arm, entering the left chest, from left-to-right essentially straight across the chest, and exiting below the right armpit. Two pieces of wadding were found in the right arm of his shirt and a possible shotgun slug between his two shirts.

CURNOW (#8) [from Dr. Meyer] had a copper-colored fragment on the outside of his shirt, which was not necessarily related to his wounds. He suffered a tangential wound to his right shoulder and a perforating wound entering on the right side of the neck and exiting on the left. A metal fragment was recovered.

BERNALL (#9) [from Dr. Henry/Wahe] suffered a defensive wound to the right middle finger, a gunshot wound to the right side of her head, with the trajectory from right-to-left and a slight front-to-back. Seven copper-colored pellets

were recovered. Two pellet exit holes were found and it is possible that another two or three pellets are visible on the x-ray. An intact shot cup was found in her hair.

VELASQUEZ (#10) [from Dr. Henry/Wahe] had three pellets enter his right shoulder and exit his lower back. He had a head wound with seven holes and a shot cup in his head. One shot cup was found in his clothing. A ball cap (Item # 908) believed to be worn by VELASQUEZ was found on the floor of the north side of the north computer table. This cap had damage to the back strap and front.

KLEBOLD (#11) [from Dr. Galloway] had a near contact wound to his left temple with a corresponding exit wound through his right temple. He also had aspirated blood. He could have been capable of some involuntary movement.

HARRIS (#12) [from Dr. Galloway] had a shotgun wound to his head with the muzzle in the mouth. Bleeding was observed through his nose. At this time skull fragments from HARRIS, some with circular holes through them, were collected. Dr. Henry also collected suspected brain material and both packages were given to Dr. Bodelson. She said she would x-ray the brain material for shot pellets and make the material available to Dr. Galloway for his examination. (During a phone conversation between Bodelson and Griffin on April 30th, she advised Dr. Galloway found only wadding material in the brain matter. No pellets were seen on the x-ray. The holes in the skull fragments were consistent with pellets exiting the skull with the muzzle in or near the mouth.) This mutual briefing ended at approximately 9:15 a.m.

Also on this date at approximately 1 p.m., both library teams met with three members (including Paula Ernst) of the FBI's Special Project Team and Denver FBI ERT leader Carl Schlaff. Laura DeLong (Team Two) and Tom Adair (Team One) would convert their respective sketches into computerized diagrams and provide these to the FBI.

At approximately 2 p.m. also on the 28th, Griffin recovered a pair of eyeglasses in a case from AMANDA STAIR's backpack for Andrist.

Hammond performed the sodium rhodizonate test at various locations in the west library area. Positive results for the presence of lead, were observed for the following:

> 1) the gray transfer on the edge of the television cable plate on the south wall under the television; 2) the gray longitudinal transfer on the bottom of the wall mount for the television on the south wall; 3) the tear in the seat cushion on the chair in book shelf Row 5 where books belonging to KATHY PARK were found; 4) the two gray transfers in the gouges on the top of Table 15; 5) gray transfer on the edge of the chemistry book on Table 15; 6) damaged areas of DAN STEEPLETON's backpack and papers inside (a shot shell plastic wad had previously been found in the damaged papers); several locations of heavy gray deposit in the holes in the glass windows; the scratches in the east wall of the exit hallway to the north of the library.

A strong reaction for lead was found at the indentation (item #1012 photograph only) on the top of the window frame at the north side of the library. A trace of gray transfer on the left arm of the blue chair associated with KATHY PARK was indicative for lead. No reactions for lead, barium or antimony were obtained for the gray-colored transfer on the rear of the backpack of HALL at Table 20; and the gray-color site on the bookshelf kickplate on the west wall below the window near the southwest column.

Areas sustaining damage consistent with an incendiary or explosive device were observed at the following: The southeast edge of bookshelf Row 7 had black debris and blackening was on the carpet (photograph 5-5) adjacent to this area. Small holes (approximately 1-2mm) were on the south wall and the blinds covering Window 11, and the window pane (photographs 13-15 and 13-16). These holes were consistent with the small diameter of the spheres found on the windowsill and elsewhere in the library. Pieces of gray duct tape (item #1063) were adhering to the side of a wicker basket with an artificial plant (photograph 27-12). This tape was about 9-11 inches above the floor. Item #987 was a piece of metal (photograph 13-11) consistent with an

opened CO_2 cartridge. On the top of bookshelf Row 6 at marker #985 was duct tape with burnt wooden matches (photograph 27-14) consistent with causing the damage at marker #984. Black residue or burning was noted on a portion of the southwest carpet by item #1004 (photographs 23-2 and 23-3). The south, center portion of the top of Table 15 had a burned appearance, and the newspaper and a text on the tabletop were partially burned.

PRELIMINARY TRAJECTORY OBSERVATIONS

Scene examination determined a minimum of 24 incoming projectiles; more may have been possible due to the missing portions of glass in the windows of the library. The nature of these holes or impact sites were documented with photographs and located in the areas described. (Also refer to the four pages of window diagrams later in this report.) The numbers were assigned arbitrarily and was not meant to convey any sequencing. The letters "XI" were used on scene to note a hole or impact created by a projectile traveling from the exterior into the library. The exterior was either through the windows on the west or the hallway to the north. Yellow paper with the identifying number was placed by the holes or impacts for photographic documentation. The letters "A, B, C", etc. were used in describing three of the firearm discharges (1, 2 and 16) in the library to denote a sequence from a particular hole or impact site. Both Hammond and Griffin measured angles of elevation or declination and horizontal angles from perpendicular.

Three projectiles entered the library from the north hallway. Two of these, **#1** and **#2**, struck the north side of the north row of computer stations at the second station from the west end. These are shown in photographs in roll #42. Documentation for **#1** starts with picture 17 and for **#2** with picture 21. The trajectories were illustrated with dowels and string.

The projectile causing hole **#1A** continued south through the kickboard and exited at **#1B**. Damage to the side of a chair at this station was consistent with **#1C**. The trajectory represented by the dowel from **#1A** to **#1B** had a 1 degree

angle of declination from horizontal and a 77 degree angle of impact out from the plane of the kickboard.

This team's projectile hole **#2A** corresponds with Team's One hallway impact identified as their #2. The projectile causing impact **#2A** at the table's edge, continued through the kickboard (entering at **#2B** and exiting at **#2C**), then was deflected by a perpendicular panel at **#2D**. The dowel representing the trajectory from **#2A** to **#2B** to **#2C** had a 5 degree angle of declination from horizontal and a 75 degree angle of impact to the kickboard. The cushion of a chair on the north side of the south computer table was damaged and a jacketed bullet (Item #1103) recovered from inside of the cushion. This impact was noted as either **#1D** or **#2E**.

Projectile **#3** was given to the screen of the computer monitor at the computer station above impacts **#1** and **#2**. This was the same number assigned by Team One to the projectile's impact in the hallway. The strings representing the trajectories for **#2** and **#3** appeared essentially parallel. The angle of impact to the screen was 72 degrees. A projectile (JCSO #909) was recovered from this monitor.

Projectiles **#4** and **#5** entered through the middle section of Window 2 (photographs 9 and 10 on roll 45). The lower hole, **#5**, had metal and/or glass strike the west side of the wall column.

Projectile **#6** entered through the bottom section of Window 3 (photograph 45-8).

The bottom section of Window 4 had holes from projectiles **#7-13** (photographs 45-6 and 45-7). The white shade (item #1074) for a floor lamp by this window had multiple, small impact holes consistent with fragments, glass and/or metal, striking the shade from the west. The shade's location was consistent with any single or combination of projectiles **#11-13**. The top section of Window 4 had a hole from projectile **#14**. This projectile struck a portion of the ceiling and was deflected. A dowel representing this trajectory was documented with photographs 45-2 through 45-5.

The majority of the glass from the bottom portion of Window 5 was missing. This was the one hole for which no determination could be made on scene as to interior or exterior origin due to the amount of damage. There were possible associated projectile strikes on the metal frame to the south, but there was still insufficient detail for origin determination. The hole for projectile **#15** was in the top portion, for **#17** by the north frame, and for **#16** and **#18** in the middle portion (photographs 45-12 through 45-16).

Projectiles **#19** and **#20** entered through the south end of he bottom section of Window 6 and struck the west side of the support pillar (photograph 45-17). This window also had most of its glass missing. The hole from projectile **#21** was in the middle section of Window 6 and the hole from projectile **#22** was in the top portion (photograph 45-16).

Projectile hole **#23** was in the middle portion of Window 7 (photograph 45-18).

Projectile hole **#24** was in the bottom portion of Window 8 near the north edge by the frame (photograph 45-19). The damage carried over to the south side of the bottom of Window 7.

The letters "IX" were used on scene to denote holes formed by projectiles traveling from the interior of the library out the windows on the west side. When applicable, the letter "I" was used to denote an impact with no perforation from an interior shot. Black numbers on white backgrounds were used to designate areas in the library where evidence indicated a firearm had been discharged. This was done for areas with damage such as holes (windows, walls, etc.), indentations (metal shelves, for example), and areas where a victim, alive or dead, had been shot. In the last case, the numbers were selected to coincide with the body number already assigned.

#1 was assigned to the hole in the bottom portion of Window 2 (photograph 45-9).

#2 was assigned to the hole and frame damage at the north end of Window 4 (photograph 43-21).

#3 was assigned to the shot pellet pattern in the frame at the north end of the bottom of Window 3. (Item #1104 recovered from this frame.)

Firearm discharge **#4** was directed south down the aisle between book shelves Rows 5 and 6. It was consistent with shotgun pellets with the first strikes being the blue chair in the middle of Row 5 (photograph 45-23). [Refer to the results of the sodium rhodizonate tests on the seat cushion and arm on page 13.] Pellets (such as item #1082) were recovered from the books on the bottom shelf of Row 5.

Firearm discharge **#5** was consistent with pellets from a shotgun south down the same aisle as discharge #4. Four of these pellets (item #1168 are two pieces recovered) perforated the south wall (photograph 45-24) with a fifth striking the bottom of the support plate for the wall-mounted television set.

Firearm discharge **#6** was the shotgun slug that killed KECHTER (photograph 45-21). No known holes or deformations existed for this event other than in the body.

Firearm discharge **#7** was the shotgun slug that killed SHOELS. No known holes or deformations existed for this event other than in the body.

Firearm discharge **#8** was the shotgun slug that killed CURNOW (photographs at the end of roll #43 and the start of roll #44). The hole in the panel to the north of CURNOW was approximately 23 inches high. There was an unfinished board behind this gray panel. The distance from the front of the gray panel to the front of the unfinished board was 1 1/4". Items labeled as #1143 (a plastic wad and piece of gray metal) were recovered on the ledge between the gray panel and the unpainted board. There were three gray streaks on the unfinished board. The horizontal center of the area with these three streaks was approximately 16 1/4" from the west end of the unfinished board. Their vertical center was approximately 1 1/8" above the top of the gray panel or approximately 25" above the floor.

The unpainted dowel in photographs 43-20, 43-22 to 44-3 marked the bottom of the hole in the gray panel. The east-to-west position of this dowel also generally bisected the area of suspected tissue on the underside of the tabletop. The short, pink dowel illustrated the trajectory formed by the bottom of the hole to the unpainted surface behind (north of) it. All of the physical evidence was consistent with the muzzle of the shotgun below a height of 24".

Firearm discharge **#9** was the shotgun discharge that killed BERNALL (photograph 45-20). No known holes or deformations existed for this event other than in the body.

Firearm discharges **#10A** and **10B** were the shotgun pellets that killed VELASQUEZ (photographs 43-5 to 43-19). The letter designations 10A through 10D were used to note the actions of 4 separate shotgun pellets. These letters were consistent with those used in the diagram by DeLong. 10A and 10B were on the west panel; 10A was higher and farther south than 10B. 10A was an indentation while 10B was a perforating hole. The trajectory resulting from the placement of a dowel through 10B and the indentation in the north panel to the west of this station (photographs 43-5 and 43-6) aligned with a nick at the bottom of the faceplate for this station (photograph 43-8). The resulting trajectory was measured at 37 degrees out from the table with a 15 degree angle of elevation. 10C and 10D were in the north panel; 10C was lower and farther west than 10D. 10C was an indentation while 10D was a perforating hole. Two copper-colored pellets (item #1142) recovered from this floor area were consistent with the two indentations. The third copper-colored pellet (item #1147) was recovered from behind the kickboard area with hole 10D.

A chair to the south of this station by the left foot of VELASQUEZ had a plastic shot cup (item #1144) recovered from the rear of the back cushion, and four holes on the upper right side of the frame. The two holes on the front were perforating; one copper and gray-colored pellet (item #1145) was recovered from one of the holes in the back of the chair. It was this chair that was the source of the piece of the wooden frame (item #1080) found on the floor by Table 17 as shown in photographs 30-18 and 31-12. A

minimum of 6 pellets, and a maximum of 8, was accounted for by the holes in the chair and leg area wall panels.

VELASQUEZ had three perforating pellet wounds in his shoulder and back. Most of the projectiles recovered from the head of VELASQUEZ were consistent with individual 00 buck pellets, with the exception of gray fragments (item #8662). Three of these pellets (items #8660, #8661, and item #8664) were copper-colored and five were gray-colored (item #8665). The Federal 12 gauge shot shells each had 9 copper-gilded pellets. Given that the three back wounds could be related to any or all of the holes in the chair and/or panels, the physical evidence was consistent with two shotgun discharges. The two discharges were also supported by the other shotgun evidence (items #922, 1144 and 8663).

The right (north) edge for these shot patterns was the nick and trajectory of 10B and the left (south) edge being the chair frame back. The dowel representing the trajectory for 10D could also line up with one of the two perforating holes in the chair frame. This reconstruction resulted in a left-to-right spread of approximately 10". The holes in the chair frame were 27-30" above the floor. The trajectory of the dowel at the right edge was continued with string back towards the southeast (photographs 43-10 to 43-19).

Hammond, who is approximately 6' tall, sighted along this string backing to the southeast until he reached a position to the north of the island in the front center of the library. At this position, the string, at a height of 5' 9" was consistent with the barrel of a shotgun at the shoulder of a shooter when the shooter was sighting down the barrel. A tripod was placed at this spot to note the maximum distance (183" or 15' 3") from the chair to the shooter. The horizontal distance from 10B to the center of the tripod was 245" (20' 5").

Firearm discharge **#11** was the 9mm projectile that killed KLEBOLD. No known holes or deformations solely existed for this event other than in the body. (The evidence recovered from discharges 13 and 14 may be the same as this event.)

Firearm discharge **#12** was the shotgun pellets that killed HARRIS (photographs 46-2 to 46-4). Pieces of skull recovered from the shelves had holes consistent with shot pellets (item #1158, for example, was in this area) exiting and also consistent with the autopsy findings of the muzzle being in his mouth. At least two indentations were found on the underside of the metal shelves above and slightly north of the position of HARRIS hips and legs. The physical evidence was consistent with HARRIS' torso generally facing west with his buttocks on or near the floor and his back near or resting against the west end of bookshelf Row 6.

Firearm discharge **#13** was the 9mm round (item #1166) that perforated the drywall below the frame between Windows 5 and 6 (photographs 44-16 and 44-24) and recovered under Window 5. The measured declination for this trajectory was 3 degrees and 37 degrees out from the west wall. Its apparent trajectory (photograph 44-22) traced back to the southeast being into or just above a chair on the west side of Table 20. If it was above this chair back, this continued trajectory was to the north of the bodies of KLEBOLD and HARRIS.

Firearm discharge **#14** was the 9mm round (item #1124) that perforated the frame at the bottom of Window 6 (photographs 44-16 to 44-24). In addition to gray and copper-colored metal fragments, the curved piece of window frame (all as item #1124A) were recovered from inside the windowsill. The measured trajectory for this projectile was 31 degrees out from the windowsill in an essentially horizontal path. When traced back to the southeast, this trajectory intersected the west side of bookshelf Row 6 at a point 45 3/4" above the floor and 52" north of the south end of the bookshelf. This trajectory also passed over the area where KLEBOLD's body was located at a height of approximately 36" (photograph 44-23). Of all the projectile holes/impacts in this area, discharge #14 was the most consistent (though not exclusively) with being the same as discharge #11 through KLEBOLD. (Note: DNA analysis on pellets and fragments recovered in this area did not have any evidentiary value.)

Firearm discharge **#15** was given to the bloodstain patterns associated with a victim positioned in the leg area of the empty computer station to the east of where CURNOW was found. Preliminary reports have placed KACEY RUEGSEGGER at this site. No known holes or deformations existed for this event other than in the body (photographs 44-4 to 44-8).

Firearm discharge **#16** was the pellets from a shotgun directed to the south first striking the chair to the north of Table 15 and the north side of the table itself (photographs 44-9 to 44-14). There were two impacts to the chair, one to the seat cushion from which a gray metal fragment (item #1140) was recovered and one into the front of the seat frame. There were four impacts in the support under the table top, two in the edge of the table (item # 1132) but one of these aligned with a hole in the support board, and two gouges in the top for a minimum of nine pellets between the chair and table. Any one of the perforating pellets, or an unobstructed pellet, may have caused the damage to the chair on the south side of Table 15. The trajectory of the pellet causing the east gouge on the table top continued to an indentation on the north face of the south side of book shelf Row 7. This indentation is marked with a yellow paper on the fourth row up in photographs 44-13 and 44-14. The trajectory illustrated by the string in photograph 44-12 to 44-15 began at the west gouge on the tabletop and traveled south to a hole in Window 11.

Firearm discharge **#17** was the nine holes in the artificial plant that was on the floor in front of Window 6 (photograph 44-16). The plant, which was on its side on the carpet when this team arrived, was repositioned as best as possible using the initial scene photographs and videotape (showing a circular void in the glass on the floor) and the resulting trajectories. The nine holes/tears were individually numbered and were located above the number "17" in photograph 44-16. Three holes in the tree trunk were consistent with this grouping. Impact sites and one hole (item # 1126) were in the north frame of Window 6. At least some of the indentations and possibly the hole could be associated with discharge #17 after the projectiles passed through the leaves, so that area was labeled as 17'/19'.

Firearm discharge **#18** was assigned to a single hole in the bottom portion of Window 6 (photograph 44-17). Since the position of the tree was estimated, the hole noted as **#18** could be from a separate event or from one of the deflected pellets of discharge **#17**.

Firearm discharge **#19** was assigned to two holes/tears in he repositioned plant. This damage was at the same height as the hole in the frame mentioned above in the area 17'/19'. The measured trajectory for 19 to 17'/19' (hole) was 40 degrees out from the west wall with a 1 degree angle of declination.

No trajectory was determined for the indentation on the north interior window frame (photographs 16-2 to 16-4). There were two tears noted in the carpet on the west side. One was by KLEBOLD's body and the other between Table 16 and bookshelf Row 6. The carpet in each of these areas was cut and pulled back and no fragments were found. The carpet tear east of Table 16 and a damaged rung (projectile entrance and exit on opposite sides) in a chair at the southeast corner of Table 16 formed a trajectory heading back north to northwest depending on the position of the chair (photographs 47-32 to 47-36). This hole and trajectory were consistent with a single projectile and could be considered as an interior firearm discharge (**#20**).

BLOODSTAIN PATTERN EXAMINATION

The preliminary interpretation of bloodstain pattern examination is as follows:

KECHTER (#6) and SHOELS (#7) were under Table 16. No projected bloodstains were found on the underside of that tabletop or the inside of the table legs. Blood flows were visible out of KECHTER's nostrils and mouth and then down the sides of his face. A ball cap he was wearing and the left side of his head were pressed against the inside of the north table leg. Pools on the carpet by the table leg and under the cap were consistent with flows along the table leg and cap. There was a hole in the upper left chest area of his shirt.

The left shoulder area and back of his shirt were blood-soaked. Bloodstains were on the top left thigh of his jeans extending from the knee to the waist. Suspected transfer patterns were on the lower right leg and cuff.

SHOELS (#7) had a pool of blood under his head and chest. Suspected bloodstains were also on the back of his black shirt, the back of his green pants, and the soles of his athletic shoes.

The bloodstains on the shoes of SHOELS and the lower leg of KETCHER appeared to be part of a pattern beginning by Table 15, extending north along bookshelf Row 6, under Table 16, between Tables 18 and 19 with a transfer pattern from a left palm (the center of photograph 35-11 and roll #47) on the floor, to the blue chair by Window 5 and ending on the ledge and glass at Window 5. This trail was consistent with being left by IRELAND as he worked his way to Window 5.

There was blood and tissue on the underside of the tabletop and on the horizontal surfaces to the north of the leg area of computer station (LMC 17) where CURNOW (#8) was found. A half dozen blood flow patterns were also present on the north kickboard by and below the point where his head was resting. The front of his shirt and jeans were soaked with blood. These stains were consistent with CURNOW having no movement after being shot with the possible exception of a continuation of momentum of his head and upper body towards the west side of the leg area.

As previously mentioned, the leg area and floor of the space for a computer to the east of CURNOW's position was bloodstained. There was pooling on the carpet at the southeast end of the leg area. Transfer patterns and projected blood and some tissue were present on the east wallboard and northeast corner of the leg area. Some tissue-like material was on the underside of the tabletop. The chair nearest to this area had transfer patterns on the wooden horizontal board under the seat cushion and on the seat cushion. Projected blood was found on the east (or right as one sits in the chair) leg. This is the same chair that had a nick on the left (as one sits) back brace referred to in

the trajectory section. This area of staining was consistent with bleeding from a victim not present during the scene processing.

Blood flow patterns were present on the right side of BERNALL's outer shirt and the right hip area of her jeans. There were small areas of blood pooling to the south of her body and a flow pattern on the inside (east side) of the west table leg. The flows and a swipe pattern were about 14" above the floor. The clothing stains and the corresponding stains on the carpet and table were consistent with BERNALL being in a somewhat upright or sitting position at one time. Bloodstains on the inside of the west table leg (the swipe) and the underside of the top of Table 19 were consistent with BERNALL's body moving from this upright position to her left, coming to rest on her left side and remaining as found.

The body of VELASQUEZ (#10) was found on the floor in front of computer station 7, while his student ID was on top of the monitor of station 6 immediately east of station 7. Bloodstains and tissue found in the area by VELASQUEZ included the ceiling to the northeast; the top of the table; CURNOW's books on this table to the west of this computer station; and some of the computer stations to the north and northwest, which included some hair-like material. (Note: Although the number 7 was at this station, the monitor bore #9B and the CPU bore #9A.) The greatest accumulation of blood and hair and possible tissue exhibiting a general conical appearance was on the face (or south side) of the horizontal plate running beneath the tabletop edge at a height of about 26". This was consistent with VELASQUEZ receiving a head wound while the affected area of his head was generally at the same height (approximately 26") as this plate. No hair, tissue or blood was observed on the underside of the tabletop.

A pool of blood on the carpet was to the north, east and south of KLEBOLD's (#11) head, as well as to the west under his left shoulder. There was a bloodstain area on the back of his left arm above the elbow that was not consistent with being formed with the arm in the position found. In addition, some of the blood flows on the face were also

formed with the head in a position other than as found. These flows were consistent with KLEBOLD's head resting on the right side of the face to allow the blood flow on the left side out of the wound. There were bloodstains on his right bicep and left center portion of his neck. The underside of the bill of the ball cap to the north of KLEBOLD appeared to be blood-soaked. This cap was in close proximity to the bloodstained area of the left knee of the pants worn by HARRIS.

There was a pool of blood to the east, south and west of HARRIS' head. The heaviest areas of bloodstaining on the bookshelves to his east (which his body was resting against) were in line with his waist and legs and above his body. The right side of his face and right arm were bloodstained. The left knee area of his pants was blood-soaked and a piece of skull was found to the north of his left calf. The stains on the ceiling and shelves were consistent with HARRIS receiving the gunshot wound to his head while he was in a seated position. His head and upper torso moved to the south or his left.

The team left the scene in the custody of the JCSO on Thursday, April 29th at approximately 6:30 p.m.

Upon the completion of the scene processing, the team had recovered in excess of 143 metal fragments, projectiles, or shotgun pellets; 10 spent 9mm cartridge cases; 29 shot shells; 20 shotgun wad-components, or pieces; the four firearms previously described; backpacks belonging to the deceased victims; unidentified clothing; matches and pieces of gray duct tape, numerous small, gray metal spheres; and evidence from the suspected incendiary devices. All evidence collected is noted on the included evidence log sheets from JCSO.

The photographers exposed 50 rolls of color film; two by Griffin on the initial walk through and 46 by Jennings and Swanson during the processing, and two by Rowlett. The photographs and corresponding photologs are also included with this report. The scaled scene diagrams are on separate sheets of large paper, with the exception of scaled diagrams for the west windows of the library, which are included. The

evidence logs provided by JCSO will also be a separate attachment.

20 Close-up, **#1127**

21 Close-up, **#1127** with scale
22 Close-up, **#1128**, top of Row 6, metal fragment
23 **#1128**, top of Row 6 with scale

Roll #37

1 CR placard
2 Close-up, **#1129**, metal fragment, top of Row 5
3 **#1129**, metal fragment, top of Row 5 with scale
4 Midrange, **#1135**, metal spheres on top of Row 6
5 Close-up, **#1135**, middle of south end of Row 6

6 Close-up, **#1135** with scale
7 South wall between Windows 11 and 12
8 Bottom of TV, south end of Row 6
9 South wall with book in Row 6
10 Close-up, **#1135**, metal fragments, south end of Row 6 (no flash)

11 Close-up, **#1135**, metal fragments, south end of Row 6
12 Close-up, **#1135**, metal fragments with scale, south end of Row 6
13 Close-up, **#1130**, metal fragment, top of Row 5
14 Close-up, **#1130**, metal fragment with scale, top of Row 5
15 **#1143,** hole under south computer table behind Body #8

16 **#1143**, hole, with scale, under south computer table behind #8
17 **#1143,** hole, with scale, under south computer table behind #8 and placard
18 Midrange, **#1143**, metal fragment and plastic wad under south computer table (through hole in table top)
19 Close-up, **#1143,** metal fragment under south computer table (through hole in table top)

Roll #37, continued

20 Southwest corner underneath south computer table by Body #8
21 Southwest corner underneath south computer table by Body #8
22 Southwest corner underneath south computer table by Body #8 next partition to east
23 **#1143**, metal fragment and plastic shot shell wad
24 **#1142**, CPU area #9, holes on boards and 1142 on floor (Body #10)

Roll #38

1 CR placard
2 North wall with scale under computer station #7, **#1142** and holes
3 West wall with scale under station #7
4 Midrange, 2 holes and 2 indentations
5 (no flash)

6 Close-up, **#1142**, two copper-colored metal pieces/"pellets"
7 Midrange, **#1144**, plastic shot wad in chair back
8 Close-up, **#1144**
9 Close-up, **#1144** with ID
10 Midrange, **#1145**

11 **#1145**, gray metal fragment/pellet in right side chair back
12 Midrange, **#1139**, sill of Window 12, three metal pellets
13 Close-up **#1139** with scale, 1 metal fragment
14 Close-up, **#1139** with scale, 2 metal fragments
15 Close-up, gray colored pellet connected with hole in photos #2-4 (midrange)

16 Close-up, **#1147**
17 **#1146**, duplicate **#1121**, metal fragment, shelf below Window 7
18 Midrange, **#1138**, metal fragment, floor east side of Row 6
19 Close-up, **#1138**
20 Close-up, **#1138** with scale

21 Midrange, **#1150**, metal fragment, floor east of Table 20
22 Close-up, **#1150**
23 Close-up, **#1150** with scale
24 Midrange, **#1148** and **1149**, metal fragments in front of Window 7

Roll #39

1 CR placard
2 Close-up, **#1148**, metal fragment in front of Window 7
3 Close-up, **#1148** with scale, metal fragment in front of Window 7
4 Close-up, **#1149**, metal fragment in front of Window 7
5 Close-up, **#1149**, with scale, metal fragment in front of Window 7

6 Overall shot, **#1152**, magazine rack, north wall
7 **#1152,** magazine rack, north wall, from west
8 **#1153**, metal fragments under Window 5
9 **#1072**, chair back cushion after removal of metal fragments
10 **#1072** chair back cushion, with scale, after removal

11 **#1072**, chair back cushion, after removal and cover removed
12 Midrange, **#1151**, shot shell wad (no flash)
13 Midrange, **#1151**, shot shell wad
14 Close-up, **#1151**, shot sell wad
15 **#1141**, metal spheres on windowsill 11

Team Three

REPORT DATE January 7, 2000	COLORADO BUREAU OF INVESTIGATION REPORT OF INVESTIGATION	FILE P99-0453 D99-1333
TYPE OF REPORT Crime Scene	REPORT BY Agent James Crippin, Team Leader	AREA Jefferson County, CO
NATURE OF CASE Homicide		

CRIME SCENE REPORT FOR TEAM THREE

REQUESTING AGENCY:	Jefferson County Sheriffs Office, 200 Jefferson County Parkway Golden, CO 80401, 303-271-5626
REQUESTING OFFICER:	Lab Supervisor Chris Andrist
INVESTIGATING OFFICER:	Lab Supervisor Chris Andrist
DATE OF REQUEST:	April 20, 1999
DATE OF OFFENSE:	April 20, 1999
AGENCY CASE NUMBER:	99-7625
LOCATION OF SCENE:	Columbine High School, 6201 S. Pierce Street Jefferson County, CO 80165
VICTIM (DECEASED):	
SUSPECTS:	Dylan Klebold (DOB: 091181) Eric Harris (DOB: 040981)
WEATHER CONDITIONS:	Varied
EVIDENCE SEIZED BY:	Deputies Ralph Gallegos and Doug Moore Jefferson County Sheriff's Office
EVIDENCE IN CUSTODY OF:	Jefferson County Sheriff's Office
REMARKS:	On April 20, 1999, crime scene personnel from various law

enforcement agencies were assigned to assist with the processing of a crime scene at Columbine High School, located in Jefferson County, Colorado.

Upon arrival at the Command Post located on Pierce Street by Clement Park, crime scene personnel were informed that the bomb squads of various agencies were in the process of clearing the school and the parking lot of explosive devices. At approximately 11:30 p.m., all crime scene personnel were instructed that processing of the scene would not start until the bomb squads had completed their activities; therefore, all crime scene personnel would report back to the command post on Wednesday, April 21, 1999 at 8:00 a.m.

ACTION TAKEN:

At 11:45 a.m. on April 21, 1999, Chris Andrist of the Jefferson County Sheriff's Office conducted a briefing for crime scene personnel. A plan was presented to divide the crime scene into specific areas and assign a team of four or five crime scene personnel to each area. A team leader was designated for each team.

Team Three consisted of the following personnel:
James Crippin, Colorado Bureau of Investigation, Team Leader
Cordell Brown, Colorado Bureau of Investigation
Scott Pratt, Colorado Bureau of Investigation
Diane Cloyd, Arapahoe County Sheriff's Office
Peggy Rowlett, Wheat Ridge Police Department
Ralph Gallegos, Jefferson County Sheriff's Office
Doug Moore, Jefferson County Sheriff's Office.

Team Three had been assigned to process the hallway running north to south in front of the library. Agent Crippin made the following team assignments:

- Scott Pratt – Crime Scene Sketch
- Peggy Rowlett - Crime Scene Sketch & Video
- Diane Cloyd – Photographer
- Cordell Brown – Photo Log Recorder
- Deputies Ralph Gallegos and Doug Moore (previously assigned as the evidence collection personnel for Team Three by Chris Andrist, Jefferson County Sheriff's Office) Evidence Custodians

Team Three members made an initial walk-through of the area at approximately 1:30 p.m. The initial impression of the hallway was that there had been two explosive devices that had detonated in

the area causing various areas of blast damage. Additionally, there was evidence of small arms being discharged in the area.

The processing of Team Three's area started at approximately 2:30 p.m. A closer inspection of the hallway was made and a plan of action developed. The hallway was divided into four sections and each section would be processed independently of the others. It was decided that overall photographs of the hallway would be taken and then the hallway would be video- taped. After these two things were done, the team personnel would walk the hallway and place evidence identification placards at items that would be collected as evidence. Team Three had been assigned #1200 through #1499 for evidence identification and collection. The hallway would then be sketched and measurements of any items to be collected as evidence would be noted. Team Three was later informed that a complete building sketch would be made by another agency and that they were not to reproduce this effort. The hallway would then be photographed and videotaped again with the evidence placards in place to show where the evidence to be collected was located. After this was done, the evidence would be collected.

After the hallway had been photographed and videotaped, the team members proceeded to identify possible items of evidence. Team Three identified 86 items of evidence that were to be collected. It was noted at this time that an explosive device had penetrated the wall into Team One's area. It was decided that Team Three would process two additional areas that had been originally assigned to Team One. Those areas were two rooms located off the north side of the main library room. Those rooms were processed after the hallway area was done.

Section #1 was the northernmost area while section #4 was the southernmost area. Sections #1, #2 and #3 measured 27 feet 5 inches in length and section #4 measured 28 feet in length. Sections #1, #2, #3 and #4 were separated by columns on the east side of the hallway that measured 30 inches wide by 21 inches deep. Opposite columns were noted separating #1 and #2 and #3 and #4 on the west side of the hallway. The column that would have been opposite the column separating section #2 and #3 was the main doorway into the library. Sections #1 and #4 each measured 16 feet 10 inches in width. Section #2 measured 16 feet 10 inches in width at the northern end and 23 feet 6 inches in width at the southern end. Section #3 measured 23 feet 6 inches in width at the northern end and 16 feet 10 inches in width at the southern end. The ceiling height in sections #1 through #4 was approximately 10 feet and the areas adjacent to the columns separating the individual sections was approximately 8 feet high.

Evidence from the floor areas in each section was removed first. Sections of the carpet where the devices had exploded were also removed. After the floor areas were cleared of evidence, attempts were made to collect any evidence that was located in the walls or ceilings.

- A section of wall above the lockers on the east side of section #1 approximately 55 inches from the column separating section #1 and #2 was removed in an attempt to recover possible shrapnel. A ceiling tile was also removed in this area in an attempt to recover possible shrapnel.
- Section #3 had an area of the carpet that showed blast damage. It was located 92 inches from the east wall, 201 inches from the west hallway wall and 111 inches from the corner of the elevator. This area was identified as item #1232 and a portion removed for analysis. Portions of the upper wall above the lockers on the east side of section #2 at the northernmost point, were removed in an attempt to locate pieces of possible shrapnel. Ceiling tiles were removed in the northernmost area of section #2 in an attempt to recover possible shrapnel that had passed through them. Several sections of the west wall were removed in an attempt to recover shrapnel. The initial walk-through had identified three separate areas of damage on the west wall of section #2 that had possibly been caused by shrapnel from the device that had detonated outside of the library entrance. Extensive damage was noted on this wall area. A section of wall was removed approximately 5 inches above the baseboard and 8 inches south of the left side of the elevator. A section of end cap (item #1226) was removed from the wall interior (Note – another section of the end cap had continued on through the opposite side of the wall causing damage in another room). A section of the west wall further south of the elevator had a partial explosive device (item #1240) imbedded in it. This appeared to be the device that had exploded in the area of the hallway in front of the library. The device had struck the wall approximately 6 inches above the baseboard. It had struck an inner structural support and did not penetrate the wall on the other side. Several casings were located by the elevator. Another section of wall on the west side of the hallway had shrapnel damage (item #1242) located 51 inches from the library entrance and 52 inches above the floor. The shrapnel penetrated the hallway wall, pierced an inner structural support and exited the back wall into a room just north of the main library area. There were several bullet holes on the north side of the column separating section #3 and section #4. There

were two small holes approximately 1 to 1 ½ feet from the floor and 1 large hole near the ceiling. The small holes looked like they could be 9mm and the large a shotgun slug. None looked like shrapnel holes. The opposite side of the column showed two holes down low and two large holes up high. It is thought that the shotgun slug split and caused the two upper holes. The holes were in a north to south direction. 9mm bullets and shotgun slug pieces were later recovered from the far south wall of the hallway by another team that could be traced back to these holes.

- Section #4 had an area that showed blast damage. It was identified as item #1261 and located 105 inches from the west hallway wall and 109 inches from the south edge of the column separating sections #3 and #4. A section of pipe (item #1263) was found against the west hallway wall and 100 inches from the west wall column. The west hallway wall had what appeared to be shrapnel damage (item #1280) approximately 16 inches above the floor and 106 inches from the west hallway wall column. Additionally the west wall above the southernmost bookcase had a single bullet hole in it approximately 1 to 1 ½ feet below the edge of the ceiling. The hole showed a east to west direction of travel and what ever had caused the hole had exited into the library through a comforter that was hanging on the east wall of the library above a bookcase. A 9mm bullet was later recovered by Team #1 in the ceiling of the east side of the library that had a trajectory indicating that it was from this hole. The opposite side of the hallway in section #4 (east side) was a wall composed of individual 3 foot by 3 foot glass panels. A blue plastic pager (item #1265) was found 44 inches from the east wall and 97 inches from the east hallway wall column. A green canvas bag containing several shotgun shells (item #1273) was located 7 inches from the east wall and 58 inches from the southernmost edge of section #4. One of the glass wall panels on the east side had been broken. This panel was located 156 inches from the east hallway wall column.

Sections #1, #2, #3 and #4 all had numerous pieces of grey duct tape, bits of carpet and large numbers of nails and shot pellets scattered throughout the floor areas.

Team Three personnel proceeded to the two rooms located just to the north of the main library area. The east room measured approximately 17 feet by 20 feet. It had doors located on the south, the west and the north walls. The west room measured approximately 20 feet by 19 feet. It had doors on the east, south and north sides. Both rooms were photographed and videotaped

prior to any evidence placards being put into place. After the evidence was identified and placards put into place, the rooms were again photographed and videotaped. The east wall of the easternmost room had two holes in it. Both holes had been caused by shrapnel penetrating them from the hallway wall on the other side. The southernmost hole corresponded with item #1242 and was further identified as item #1242A. It was located 55 inches above the floor and 12 inches from the south wall. A small piece of possible shrapnel was located on the opposite side of the room under a LCD projector. The northernmost hole corresponded with item #1226 and was further identified as item #1226A. It was located 7 inches above the floor and 18 inches from the north wall. A piece of pipe end cap (item #1226B) was located 59 inches from item #1226A. A spent shotgun shell (item #1285) was found 95 inches from item #1226A and 56 inches from the east wall. The west room had a TV set that had what appeared to be a bullet hole (item #1286) in the front of the picture tube. Fragments of a bullet were later recovered from inside of the television. The TV was located on a bench area in the approximate center of the room. An empty casing was found approximately 27 inches from the east wall and 33 inches from the north wall.

The processing of the library hallway and rooms north of the main library ended at approximately 8:45 p.m. on April 21, 1999.

Items collected from the hall included six spent 9mm cartridge cases, three spent Federal 12 gauge shot shells, two projectile fragments, three miscellaneous firearms-related items, and 49 pieces of explosive related evidence. In addition, two projectile fragments and one spent 9mm cartridge case were found in the AV room west of the hall.

Team Four

Report Date May 11, 1999	Thornton Police Report of Investigation	Thornton Case Number 99-4919
Type of Report Crime Scene	Report submitted by Robert Lloyd	Jefferson County Sheriff Case Number 99-7625

NATURE OF CASE Homicide

CRIME SCENE REPORT FOR TEAM FOUR

REQUESTING AGENCY: Jefferson County Sheriff's Office

INVESTIGATING OFFICER: Lab Supervisor Chris Andrist

DATE OF REQUEST: April 20, 1999

DATE OF OFFENSE: April 20, 1999

AGENCY CASE NUMBER: 99-7625

LOCATION OF SCENE: Columbine High School, 6201 South Pierce Street, Jefferson County, Colorado

VICTIM: David Sanders DOB: (102251)

SUSPECTS: Eric Harris DOB: (030981)
Dylan Klebold DOB: (091181)

WEATHER: Variable

EVIDENCE SEIZED BY: Jefferson County Sheriff's Deputy Steve Stalter

EVIDENCE IN CUSTODY OF: Same as above

REMARKS: This is report by Team Four, assigned to the science area that contained the body of David Sanders, at Columbine High School. The team was also assigned the south and central portion of the school. In addition to Lloyd, the reporting team leader, other members and their duties were:

Tony Gallardo, Arapahoe County Sheriff's Office
Sketching
Bruce Davis, Greenwood Village Police Department
Video, measurements and trajectory
Stephen Adams, Arvada Police Department
Photography, bullet trajectory
Steve Stalter, Jefferson County Sheriff's Office
Photo and evidence log, collection of evidence.

On Tuesday, April 20, 1999, Team Four members responded at various times to a staging area set up on Pierce Street, north of Columbine High School, to assist JCSO in the investigation of multiple deaths, shots fired and explosions. No teams entered on April 20 due to safety concerns with the presence of unexploded devices.

On Wednesday morning, April 21, 1999, a planning meeting was held. Team leader Robert Lloyd, along with Chris Andrist, JCSO, Tom Griffin, C.B.I., and Sergeant Randy West were appointed as co-crime scene coordinators. The purpose of the group was to establish procedures for documenting the scene and setting up crime scene teams.

After an assessment of the scenes by members of the Jefferson County Sheriff's Department, and Jefferson County Coroner's office, a preliminary walk through was conducted to establish assignments.

Agent Griffin documented the scenes with 35mm photographs and Robert Lloyd videotaped the bodies. Another back up 35mm and video team, consisting of Criminalist Tom Adair, Arapahoe County Sheriff's Department and Chris Loptien, JCSO, also videotaped and

photographed the bodies. The documentation commenced at 10 a.m. and was completed at 12 noon.

On April 21, 1999, at approximately 12:30 p.m., Chris Andrist assigned crime scene personnel to various teams. This meeting was conducted to ensure a standardized approach to all of the scenes. Each team member was then escorted through the various scenes in the school for an assessment of evidence.

Photographs were taken to record the areas investigated by Team Four. Each photograph was documented in a photo log, which is a part of this report.

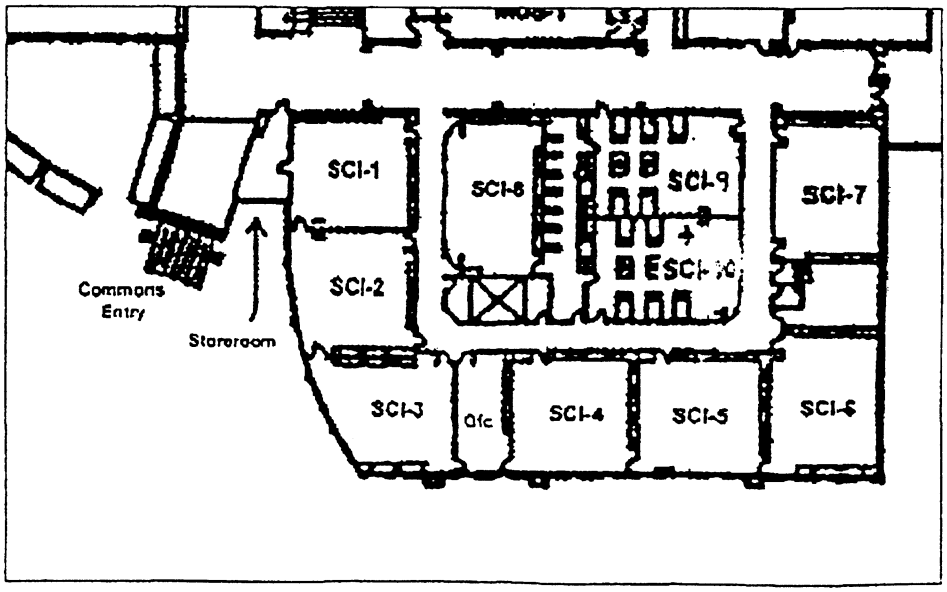

Team Four was issued evidence numbers 1500 through 1699. An evidence log was maintained to record the numbers used by Team Four. Measurements were taken on each item of evidence collected for inclusion in diagrams and will not be repeated here.

Columbine High School is located on the west side of Pierce Street at the intersection of Fair Drive. The main entry to the school faces east with parking lots on the south side of the school and on the northeast side. Various athletic fields are located on the west and northwest areas of the school grounds and Clement Park borders the north side. The school is a two-story structure with the main entrance being on the upper level. There is exterior access to the lower level on the south and west sides. The main or central hallway for the school runs east and west with the front doors being on the east side and the office area just to the north of the main entrance. The north side of the central hallway on the main level consists of the administrative offices, the gymnasium, the band room and specialty classrooms such as the wood shop, ceramic studio and photography. Numerous other smaller classrooms are also located north of the main hallway. South of the main hallway is the primary classroom area for Social Studies, Language Arts, Math and Science. It also contains the auditorium. The library is located in the west end of the main level with the cafeteria being on the lower level directly underneath the library.

There is a south entrance to the school on the lower level at the west end. This enters the southeast corner of the cafeteria. There is a stairway that goes from this location to the main level at an intersection of hallways at the southeast corner of the library area (see diagrams). The Science area is in the southwest side of the school on the main level. There are ten classrooms in this area labeled SCI-1 through SCI-10. There are two Science office rooms and a chemical storage area (see diagrams). There is a storeroom on the west side of SCI-1.

This science storeroom has a doorway on the east side into SCI-1 as well as a doorway on the north side onto to the hallway at the top of the stairs coming up from the cafeteria on the lower level. This hallway at the top of the stairs from the lower level runs east and west and is another main hallway south of the central hallway. This hallway intersects with a hallway that runs north and south in front of the library area. These two hallways intersect at the southwest corner of the school above the southwest entryway on the lower level. The west wall of this science storeroom is also the east wall of the southwest entryway to the school. One victim of the shooting was found in this science storeroom on the west side of SCI-1.

Science Area Diagram (For reference only-not to scale)

ACTION TAKEN: On April 21, 1999, Team Four entered the building at approximately 1:35 p.m. The processing of the scene continued until Tuesday, April 27. The approximate scene activity times were as follows:

Wednesday, April 21st, 1:35 p.m. to 6:00 p.m.
Thursday, April 22nd, 8 a.m. to 6 p.m.
Friday, April 23rd, 8 a.m. to 6:30 p.m.
Monday, April 26th, 8 a.m. to 7 p.m.
Tuesday, April 27th, 8 a.m. to 2:30 p.m.

Science Storage Room/ Body #13

In the science storage room was the body of a white male, which had been previously designated as body # 13, later identified as teacher DAVID SANDERS. The body was on the floor positioned on his back. His head was pointed north towards the hallway door in the room. His feet were pointed south and his arms were down along his sides. Mr. Sanders was bare chested. His blue and white dress shirt and T-shirt were cut and pulled down to the waist. He had gray slacks and brown shoes. Under the body was a flannel shirt and next to the head was a gray sweatshirt. These items appeared out of place with the clothing Sanders was wearing. It was noted that there was an absence of blood under the body. There did not appear to be any evidence in the room to indicate that this was where this victim had actually been shot.

Initially there were two wounds visible: one was in the upper mouth and he appeared to be missing two teeth; the other was an apparent bullet wound on the front of the right shoulder. Once the initial documentation was completed, the Coroner's Office was requested to respond to conduct their examination. Triena Harper of the Jefferson County Coroner's Office and a member of the Denver Coroner's Office responded and conducted an investigation on the victim (see also: Coroner's Report). The examination disclosed two additional bullet wounds in the victim's back, one on the upper right shoulder and one at the base of the lower left side of the neck. The bullet wound on the back of the right shoulder appeared to be related to the bullet wound on the front right shoulder. The bullet wound at the base of

the neck appeared related to the wound in the victim's mouth.

The victim had a wallet, which tentatively identified him as William David Sanders, dob: 10/22/51, with an address of [redacted], and described him as a white male, 6' tall, 190 lbs., brown hair, blue eyes and wearing corrective lenses. The driver's license was a Colorado driver's license #942973429 and showing a social security number of 315-54-0935.

The victim was placed in a body bag, which was sealed and carried to the Coroner's vehicle at the front entryway to the school. After the body was removed from the storeroom, additional photographs were taken to document the room without the body present.

Located in the hallway, just outside the storage room door, were two large pools of suspected blood on the carpet. In both pools of blood (items #1513-1514) were suspected bone fragments. Between the pools of blood and the north storage room wall, the team recovered a single tooth on the floor (#1517).

East of the large pools of blood the team observed additional bloodstains in the carpeting. The first one appeared to be a right hand, believed to be Sanders, due to the close proximity of the tooth and tooth fragments. This pattern had all fingers and thumb patterns in the carpet. A few inches further east the team observed a bloody outline consistent with knuckles of a hand, with voids where the back of the fingers would have pressed on the carpet. Further east along the blood trail was a second right hand impression, with fingers and thumb.

The staggered blood trail continued east then turned south toward Science Room 1 (SCI-1). On the door of SCI-1 there was blood on the door handle and several blood drops on the floor below the handle, as if someone had been standing there. The trail did not enter the room.

The blood trail continued south past the two doors for SCI-2. The blood trail did not enter this room. It continued to SCI-3 where it did enter the room. There was a large pool of blood

in front of the black chalkboard, which is on the east wall. Several feet away were additional bloodstains along with several T-shirts, a fire blanket, and additional clothing on the floor covered with blood. There was a tooth fragment (#1537) on the floor. On the floor was a portion of a blue and white dress shirt (#1538), consistent with the shirt found on DAVID SANDERS in the science storage room. A pair of blood stained glasses (#1539) was located on a desk along the north wall.

On the floor in the southwest corner of SCI-3 was a hand-lettered sign (#1540), which read, "1 BLEEDING TO DEATH."

In SCI-2, eight tables were set up in a barricade like position across the back of the room. The bloodstains on the floor indicate Sanders was pulled from SCI-3, through SCI-2 (behind the table barricades), through SCI-1 and into the science storage room.

In summary, the investigation revealed that SANDERS was shot twice while in the hallway outside the science storeroom. He probably crawled east until reaching the next hallway junction where he turned south. He opened the door to SCI-1 but did not enter. He then continued south to the end of the hall and entered SCI-3. He was subsequently taken from there across the backs of SCI-2 and SCI-1 to the science storeroom.

Processing of the science storage room and victim was completed at about 6:00 p.m. This completed the work on April 21,1999.

On April 4, 1999, Team Four returned to the scene of Columbine High School and signed in at approximately 0800 hours. At this time the team began to measure the evidence that had been located and numbered on the previous day. Again photographs were taken to document each item of evidence with the number plaque in view. Where appropriate, the items were photographed with and without a scale. This included evidence item #1500 through item #1553. See the evidence recovery log for the details relating to the individual items.

A decision was made to mark all holes and impact points on walls and windows with numbers prefixed by the letter "BH" since it was sometimes difficult to determine whether the hole or impact was made by a bullet, shotgun round or bomb fragment. All holes and impact marks were measured to document their position (see diagrams). All penetrating impacts were searched to try and locate the projectile causing the hole. When found, they were photographed and measured for location. Where appropriate, probes were used to determine trajectories and relate specific evidence to the holes. Photographs were taken of these holes both with and without the probes in place.

Hallway South of Library

Examined and photographed were numerous bullet holes and defects in the south wall and windows at the west end of the southern east/west hallway. The windows overlook the entryway for the south entrance and to the lower level commons area. A total of 16 holes or impact points were noted. BH-1 was a hole through the lower portion of the wall close to the west edge of the wall with the Science storeroom. This projectile went through the south wall of the hallway and into the west wall of the storeroom and was recovered inside the wall just south of the sink and cabinet located in that room. The projectile recovered appeared to be a bullet fragment and was recovered as item #1548.

The hole designated as BH-2 located in the lower left hand area of that section of wall (as you look towards the south) was approximately one and one-half inch in diameter and may have been made by a piece of bomb fragment. This hole penetrated the wall and is associated with a hole gouged in the west wall of the Science storeroom. The projectile did not penetrate this wall and would have fallen to the floor in the entryway of the commons area. The size of the hole would be consistent with the end cap of one of the bomb devices.

BH-3 was a small hole in the molding at the base of the wall in line with a tear in the carpet south of that location which was designated as evidence item #1503. The projectile causing this hole penetrated the south wall of the hall and

also penetrated into the west wall of the Science storeroom. The projectile recovered in the wall appeared to be a bullet fragment and was designated as evidence item #1553.

The hole BH-4 was caused by a projectile going through the south wall below the windows and impacting the window frame at the south end of the east wall of the commons entry area (subsequently recovered as evidence item #1618).

The hole BH-5 was on the lower edge of the window on the south wall. The projectile did not penetrate the metal window frame and is believed to be a bullet fragment which was found directly underneath that spot, that being item #1543.

The hole BH-6 was caused by a projectile that penetrated the vertical window frame for the center portion of the window of the south wall and the projectile was lodged inside the frame. This was a bullet subsequently recovered as evidence item #1616.

The holes BH-7, BH-8 and BH-9 are holes through the window glass of the window on the south wall. These may relate to impacts on the south wall of the entry to the commons area (BH-48, 49, and 50).

The impact point designated as BH-10 was a mark on the wall in the shape of the profile of a flathead screw. A screw of the same size and shape was recovered from the carpet south of that location and was evidence item #1502.

The hole BH-11 was in the wall on the west side of the windows. The projectile causing this hole penetrated the wall and pointed directly to a broken window above the south entry to the commons area. This projectile also penetrated that window and no evidence item was recovered that could positively be associated with that hole.

The hole BH-12 was the furthest west impact on the south side of that hallway wall. This is a low impact into the drywall behind which was a concrete pillar. Numerous lead fragments were recovered from this hole and designated as item #1550.

The hole BH-13 was located in the wall over the windows on the south wall with the projectile penetrating completely through the wall. No associated evidence item was recovered.

BH-14 was actually a metal fragment stuck in the wall above the windows. This was recovered as evidence item #1551.

The hole BH-15 was also above the windows but did not penetrate to the other side. The wall was opened up and a metal fragment was found lodged in the insulation between the inner and outer walls and collected as evidence item #1548.

The hole BH-16 was in the wall above the windows and penetrated through to the area above the entryway for the commons area. No item was recovered for this hole.

Science Room #8

Overall photographs were taken in SCI-8 where it was apparent that shots had been fired through the window of the northwest door, into the classroom in a southeasterly direction. A table, inside the room had been tipped up in front of the door. Two fired shotguns shells and three fired 9 mm casings were found outside the doorway to this room (see evidence item #1525 through #1529).

New Information Received

At approximately 1600 hours on April 22, 1999 the team was advised by Scott Mundine, an agent for the Colorado Bureau of Investigation, that interviews had indicated a student had a video camera in the music room that contained images of one of the suspects from the previous Monday. This room was found to be Music-1 and with the description given to Scott Mundine the associated evidence was found in that room. This was a backpack, a Sony video camera, a blue hat and a white t-shirt. These items were photographed and their location measured. They were not collected pending an examination by bomb squad personnel.

At approximately 1630 hours, the team was contacted by Chris Andrist who advised that other interviews indicated a student in one of the Math rooms also had videotape of at least one of the suspects. This was found to be Math room

#10 and was associated with a student Eric Veik. A backpack, plastic bag of videotapes and a video camera bag were found at this student's desk in Math #10. The photographic documentation of these items was deferred to the next day.

The photographs taken on April 22, 1999 included roll #7 through roll #12. The team cleared the scene at Columbine High School at approximately 1700 hours.

Math Room #10

On Friday, April 23, 1999, the team entered Columbine High School at approximately 0800 hours. Photographs were taken to document Math #10 and specifically the desk of Eric Veik. His desk was in the third row from the east and was the second desk from the south. A test paper on the top of the desk showed the name Eric Veik, also on the top of the desk was a pencil and a calculator. On the north side of the desk was a black backpack. On the south side of the desk was a black video camera case and a plastic Target bag containing six Sony VHS tapes. (See evidence items #1559 through #1562). It should be noted here that neither these items nor the backpack and other items in the music room had yet been searched by the bomb squad.

Science Room #8 (continued)

Team Four returned to SCI-8 to continue the photographing and documentation of the evidence in this room. (See evidence item #1563 through #1586.) This evidence consisted primarily of fired bullets, lead fragments and shotgun shell wads. As previously stated it appears the shots fired into the room came from the northwest door going southeast across the room towards the southeast door of the classroom. As done previously in the hallway, bullet or projectile impacts and holes were designated with a number preceded by the prefix "BH."

BH-16 was a hole in a plastic electrical conduit along the east wall of Science room #8. A bullet fragment was recovered from inside this conduit as evidence item #1582. (It was later noted that BH-16 was used previously, so there are now two references to this number).

BH-17 was an impact in the east wall, which penetrated the wall and exited into the chemical storage room on the east side of SCI-8. The projectile impacted two metal cabinets inside this room and was recovered on a shelf as evidence #1585.

BH-18 was an impact point on the east wall of SCI-8 and recovered was a small fragment imbedded in the wall as evidence item #1581.

BH-19 was an impact point on the east wall. No fragments were recovered.

BH-20 was an impact point on the east wall through a Wolf poster. The projectile went partially through the wall and was imbedded in the insulation between the walls. This was recovered as item #1584.

BH-21 was a hole in a lower cabinet door on the east side of the room, the cabinet being directly under the sink. The projectile was recovered from within the door as evidence item #1577.

BH- 22 was an impact point on the top drawer of a cabinet on the east wall underneath the sink. This was an impact point only. No evidence was recovered from this spot.

BH-23 was impact point on the east wall at the top of the Wolf poster. This is an impact point only.

BH-24 was a hole in a box sitting on the east counter just south of the sink area. The projectile went through this box and impacted a Safeway sack. The hole in the Safeway sack was marked as BH-25. The projectile continued though the Safeway sack and impacted the back splash on the back of the east counter and this was marked as BH-26.

BH-27 was an impact point on the south wall by the southeast door to SCI-8. There were two fragments imbedded in the wall at this location, which were recovered as item #1583.

BH-28 was also on the south wall by the southeast door and was an impact point only.

BH-29 and BH-30 appeared to be impact points on the ceiling tiles in the middle of the room but the projectile did not penetrate these tiles. The angle indicated by the gouge in the ceiling tile pointed back to the northwest door to SCI-8.

BH-31 and BH-32 are impact points in the upturned desk in front of the northwest door to SCI-8. BH-31 was an actual hole punched through the edge of the desk and BH-32 appeared to be an impact point only.

West Science Hallway

In the hallway south of SCI-8, by a mechanical room, two spent shotgun shells were found on the floor (items #1530 and 1531). Blood spatter was seen on the wall of the hallway across from Science office #1. This is at the junction with the south hallway running east and west. A sample was collected as Item #1532.

Science Office #1

Team Four next examined Science office #1, which is located on the south side of the building between SCI-3 and SCI-4. This office area has a door on the northwest corner of the room (opening onto the hallway); a door on the southeast corner (opening to SCI-4); and a door on the southwest corner (opening to SCI-3). Teachers' desks are along the west wall. There are two rows of equipment and bookshelves down the middle of the room and the sink along the east side.

It appears multiple shots were fired into this room through the hallway door window, including shotgun and 9 mm. An incendiary device was also ignited inside this room. A live 9mm cartridge was found outside the door to SCI-3 and three fired 9mm casings were found outside the door to the science office (items # 1533-1536).

The incendiary device consisted of a glass bottle with some type of flammable liquid. There was also a CO2 cartridge, matches, and lead fragments found in the debris (items #1587-1594). Burn deposits on the glass door to the Science office indicate that the device may have been stuck on the window of the door with the initiator (which would be the CO2 cartridge) filled with some type of flammable and/or

explosive compound. Since a lid was found for the glass bottle but no wick or other fusing, it appears as though the CO2 cartridge may have been the intended initiator for this device. While there were burn deposits on the door window, it does not appear that the glass jar containing the flammable liquid actually broke until it hit the floor inside the room. This would suggest that perhaps the CO2 cartridge was attached to the device, which was attached to the window but the cartridge failed to explode and simply spewed burning debris from the top depositing it on the window. The window was subsequently broken with the device landing on the floor inside the room. It was noted that the CO2 cartridge was not ruptured. A small fire was apparently started but extinguished by someone using a dry chemical fire extinguisher.

The bookcases down the center of the office were impacted by projectiles with the path of the projectiles pointing back to the northwest door. This would put the projectiles on a southeast trajectory coming through the door of the office.

Team Four left the Science area at approximately 1700 hours and attended a briefing in the auditorium for all the crime scene investigation teams. At approximately 1800 hours, Team Four cleared from the school. Taken on 04/23/99 were photo rolls #13 through #20.

On Monday, April 26, 1999, Team Four returned to the scene at Columbine High School at approximately 0800 hours. There, the investigation of the scene inside Science office #1 was resumed. Photographs were taken to document the individual items of evidence collected and also more bullet holes and impact points inside the room. Evidence collected from the Science office #1 consisted of evidence items #1587 through #1614.

BH-33 was a large impact point on the west edge of the window frame for the door to Science office #1. This impact point would be consistent with a shotgun round.

BH-34 was an impact across the spine of the books on the second shelf unit to the south and the third shelf down from the top.

BH-35, BH-36 and BH-37 represent the path of the projectile traveling southeast from the northwest corner of the room. This is a large hole skipping across the spine of a Sigma catalog and through the south end of the second shelf unit to the south (BH-35). BH-36 is a hole in a blue 3 ring binder at the north edge of the third shelf unit to the south which is a through and through hole leading to BH-37 which enters another 3 ring binder just to the south of the first. Within this second 3 ring binder was recovered a large lead fragment and other smaller fragments were found when the 3 ring binder was moved. These were recovered as item #1607 and would be consistent with a shotgun slug. Item #1606 may be fragments relating to this item (#1607) as they were recovered on the same shelf beneath BH-35. It was also noted that a single shotgun wad in three pieces was recovered from inside the room. These were items #1597, #1608 and #1610.

BH-38 was an impact on the end of the second shelf unit to the south and recovered in that area were two small lead fragments marked as item #1611.

BH-39 was a hole through the end of the second shelf unit to the south which when a probe was placed through the hole lined up with BH-41. BH-40 was a second hole through the end of that same shelf unit which related to BH-42. BH-41 was in the divider between the east and west shelf units as was BH-42. The projectile going through BH-39 and BH-41 was recovered as item #1614 (a lead fragment located in a culture tube box on a shelf on the east side of the room). The projectile from BH-40 and BH-42 was recovered as item #1613, another fragment located inside a second culture tube box on the east shelf units. Item #1614 was in the box on the fourth shelf up from the floor and item #1613 was in the box on the fifth shelf up from the floor. Both of these were on the second unit to the south on the east side of the room.

South Science Hallway

The Science area has a U-shaped hallway with two north/south segments, which are on the west and east sides and the bottom of the U is the east/west hallway on the south end of the Science area. On the north side of the hallway at the intersection with the eastern northwest

hallway was an impact point marked as BH-44. BH-44 is a gouge in the wood molding on the northwest corner of the intersection with the south Science and the east Science hall. This would locate it at the southeast side of SCI-10 and kitty-corner (northwest) across the hall from SCI-6. SCI-6 is located in the southeast corner of the Science area (see diagrams).

BH-45 is a hole in the hallway wall just to the north of the doorway for SCI-6. This is a through and through penetration into SCI-6. BH-46 is a hole in a speaker mounted on east wall of SCI-6. The projectile went through the speaker and into the wall behind the speaker. This is labeled as BH-47. The projectile was subsequently recovered as item #1615.

Entryway-South Commons Area

Team Four returned to the area of the entryway for the commons area located at the southwest corner of the school. In looking at the south wall over the entryway, additional impact points were noted that possibly relate to the initial impact points located on the second floor above the entryway (BH-7, BH-8 and BH-9).

The impact labeled BH-48 was in the window frame of the windows over the south entry to the commons. This is an impact point with no penetration.

BH-49 was a hole in the glass window over the south entryway over the east set of doors. This window is a set of double pane glass and the projectile penetrated the northernmost pane but did not penetrate the southern pane. A projectile was recovered between the glass as item #1619.

BH-50 was in the frame of the window at the southeast corner on the east wall of the entryway. A projectile was recovered relating to this as item #1618 from inside the window frame.

A nail (item #1620) was found on the ledge of a column on the southeast corner at the top of the stairway from the commons area to the second or main level of the school. A possible impact point was noted on the wall south of where the evidence was located and marked as BH- 51. Again

photographs and measurements were taken on all of the above items and impact points.

The rolls of film taken on this date included roll #21 through roll #39. Team Four cleared from the scene at Columbine High School at approximately 1810 hours on April 26, 1999.

Outside the Commons Area

On Tuesday, April 27, 1999, Team Four entered the scene at Columbine High School at approximately 0800 hours. Team Four and the other investigators attended a briefing in which the remaining items of evidence needing to be collected were discussed. Team Four was assigned to collect a fragment of a bullet found outside the school. This was labeled as item #1622 and was found outside the south commons area in the lawn just to the southeast of the entry doors. This was photographed and measured for the diagrams.

Science Room #7

The team then went to SCI-7 where witness reports had indicated that several people had made notes relating to the bombing within the school as they sat in the room waiting for rescuers. Numerous papers were seen in this area strewn on the floor at the front of the classroom, which would be the west side of the room. These papers were photographed and collected as item #1623.

Tech Conference Room

Team Four was also requested to photograph the Tech conference room, which is located on the east side of the Tech Lab area. This had not previously been documented. It was noted that on one of the write-on boards on the north side of the classroom were the words "The skool sood bee blown u.p.s."

Team Four Summary

The following rooms contained evidence collected by Team Four:

Science 3 Science 6 Science 7 Science 8
Science Office #1 Chemical Storeroom Music 1
Math 10 Science Hallways Commons Entrance Area

The team cleared the following rooms with no evidence collected:

Science 1	Science2	Science 4	Science 5
Science 9	Science 10	Science 11	Science 12
Math 1	Math 2	Math 3	Math 4
Math 5	Math 6	Math 7	Math 8
Math 9	Math 11	Math Comp	Math 13

Language rooms, LA-1 through LA-12
Social studies rooms, SS-1 through SS-10
Drafting Technical Lab
Southeast corner of auditorium

Evidence logs will be submitted by Jefferson County Sheriff's Office. Sketch information will be submitted separately. Photographic logs are included with this report.

The following is breakdown on the major evidence collected:

Fired bullets/fragments----------	55
Fired 9mm casings----------	6
Fired shotgun casing----------	4
Shotgun wad components--------	7
Live 9mm rounds----------	5
Bomb/Incendiary----------	1

This is the end of the narrative report. The photo log follows the signature page.

Team Four Photo Log

Roll # 1

1. Placard for roll #1
2. Overall door to science storage room, south side of hallway
3. Medium photograph of storage room door
4. Looking south through science storage room door
5. East/west hallway north of science storage room, looking west

6. Inside of storage room door
7. South from storage door doorway
8. Looking southwest in storage room, from NE corner
9. Looking south to north in science storage room
10. Looking northeast in science storage room

11. Looking east from west in science room
12. Looking west from south east in room
13. From classroom door into storage room, looking west
14. Sanders lower half
15. Sanders upper half, south to north

16. Overall of Sanders looking north
17. Sanders upper half facing east
18. Sanders right side
19. Sanders legs right side
20. Sanders bottom of shoes

21. Sanders, face
22. Sanders face close-up
23. Sanders mouth close-up
24. Wound to right side of Sanders

Roll # 2

1. Placard for roll # 2
2. Head and shoulders
3. Sanders mouth with scale
4. Mouth without scale
5. Sanders' front shoulder wound

Roll # 2, continued

6. Sanders' front shoulder wound with scale
7. Right shoe with scale
8. Left shoe with scale
9. Sanders, left side of head
10. Sanders, upper body left side

11. Door and one by two board
12. Midrange foot print on door
13. Door closing mechanism on door
14. Door closing mechanism on door frame
15. Both pieces of door closing mechanism

16. Shoe print on door
17. Shoe print on door with scale
18. Shoe print on door without flash
19. Shoe print on door with flash
20. Shoe print on door with flash and scale

21. Sanders, wound left rib area
22. Close-up left rib area of Sanders
23. Sanders, left hand
24. Sanders, right hand

Roll # 3

1. Placard for roll # 3
2. Overall of back of Sanders
3. Left rib area with scale
4. Upper left back shoulder of Sanders
5. Wound on base of left neck, with scale

6. Right shoulder wound, with scale
7. Sanders, wallet with identification: David Sanders, DOB: (102251)
8. Wallet, close-up
9. Hallway looking southeast
10. Hallway, outside storage room, blood stains on carpet

Roll # 3, continued

11. Blood stains with scale
12. North group of blood stains with scale
13. South group blood stains with scale
14. Blood trail looking east
15. Two pools of blood with scale

16. West pool with scale
17. East pool with scale
18. Tooth on floor east of science storage door
19. Tooth in relation to open science storage room door
20. Tooth in relation to open science storage room door with scale

21. Close-up of tooth with scale
22. Close-up of tooth without scale
23. Blood trail east of blood pools
24. Blood trail east of blood pools

Roll # 4

1. Placard for roll # 4
2. Right hand print in blood, hallway north of storeroom
3. Right hand print with scale
4. Right hand print without scale
5. Right hand print with scale, southeast impression

6. Right hand print without scale, southeast impression
7. Northeast handprint with scale
8. Northeast handprint without scale
9. Overall view of bloody handprints in hallway
10. Science hallway looking southeast

11. Science hallway looking southeast
12. Science hallway looking south
13. Science hallway to southwest
14. Door to science room # 1 (SCI-1)
15. Door knob with blood to SCI-1

16. Floor in front of SCI-1
17. North wall entry to SCI-1
18. Close-up blood spots in hallway outside SCI-1
19. Blood drops with scale, wall south of SCI-1 door
20. Blood on corner with scale, wall south of SCI-1 door

Roll # 4, continued

21. Overall door frame to SCI-1
22. Blood on door frame to SCI-1
23. Blood on door frame to SCI-1 with scale
24. West Science hallway looking south

Roll # 5

1. Placard for roll # 5
2. Door to science office 1
3. Hallway looking southeast toward science office
4. Fired shotgun shell outside mechanical room
5. Blood on hallway wall, intersection of hallways

6. Blood on wall with scale
7. Overall science room #3 (SCI-3)
8. Fired cartridge case outside SCI-3
9. Doorway to science office 1
10. Looking into science office 1

11. Fired 9mm casing, behind science office 1 door
12. Fired shell casing, east of science door 1
13. Looking south into SCI-3
14. Blood pool, east wall, SCI-3
15. Looking north, SCI-3

16. Looking west, SCI-3
17. Looking west, SCI-3
18. Close-up-portion of Sanders shirt on floor of SCI-3
19. Close-up-portion of Sanders shirt, close-up
20. Overall of tooth on floor, SCI-3

21. Overall of tooth in SCI-3, close-up
22. Close-up of tooth with scale
23. Eyeglasses on desk, north side of SCI-3
24. Close-up of eyeglasses

Roll # 6

1. Placard for roll # 6
2. West side of SCI-3 looking south
3. Sign, "1 BLEEDING TO DEATH"
4. Close-up of sign

Roll # 7, continued

14. **# 1511**, match stick, close-up
15. **# 1512**, match stick, close-up

16. **# 1513**, carpet with blood and fragments, close-up
17. **# 1514**, carpet with blood and fragments, close-up
18. **# 1515**, metal fragment, close-up
19. **# 1516**, carpet with blood, close-up
20. **# 1517**, tooth, close-up

21. **# 1518**, Advil pill, close-up
22. **# 1519**, nail, close-up
23. **# 1520**, live 9mm cartridge, close-up
24. **# 1521**, nail with duct tape, close-up

Roll # 8

1. Placard for roll # 8
2. **# 1522**, nail, close-up
3. **# 1523**, metal nut, close-up
4. **# 1524**, belt buckle, close-up
5. **# 1525**, fired shotgun shell, close-up

6. **# 1526**, fired 9mm casing, close-up
7. **# 1527**, fired shotgun shell, close-up
8. **# 1528**, fired 9mm casing, close-up
9. **# 1529**, fired 9mm casing, close-up
10. **# 1530**, fired shotgun shell, close-up

11. **# 1531**, fired shotgun shell, close-up
12. **# 1532**, blood (on wall), close-up
13. **# 1533**, live 9mm cartridge, close-up
14. **# 1534**, fired 9mm casing, close-up
15. **# 1535**, fired 9mm casing, close-up

16. **# 1536**, fired 9mm casing, close-up
17. **# 1537**, tooth, close-up
18. **# 1538**, partial shirt, close-up
19. **# 1539**, eyeglasses, close-up
20. **# 1540**, sign "1 BLEEDING TO DEATH", close-up

21. **# 1541**, nail, close-up

Roll # 8, continued

22. **# 1542**, nail, close-up
23. **# 1543**, bullet fragment, close-up
24. **# 1544**, bomb fragments, close-up

Roll # 9

1. Placard for roll # 9
2. Science storage room west wall with cabinet and sink
3. Science storage room west wall, behind cabinet
4. Science storage room west wall, close-up of hole
5. Science storage room west wall, close-up with scale

6. Science storage room, west wall hole with scale
7. **# 1545**, nail, close-up
8. **# 1546**, nail, close-up
9. **# 1547**, live 9mm cartridge, close-up
10. Overall, windows at south end of west hallway

11. Overall, west storage room wall, outside over entryway
12. Overall, west storage room wall, hole, other side of BH 2- 6
13. Overall, windows over entry to commons
14. Overall windows, south wall to west end of hall, looking from storage room
15. Overall, south side to west end of hall, with placards

16. East half, south window area
17. West half, south window area
18. Bullet holes (BH) 1 and 2
19. BH 1, with scale
20. BH 2, with scale

21. BH 3, 4, and 5
22. BH 3, with scale
23. BH 4, with scale

Roll # 10

1. Placard for roll # 10
2. BH 5, frame under poster
3. BH 5, with scale
4. BH 6 and 7

Roll # 10, continued

5. BH 6, with scale

6. BH 7, with scale
7. BH 8 and 9
8. BH 8, with scale
9. BH 9, with scale
10. BH 10, (nail strike)

11. BH 10, with scale
12. BH 11 and 12
13. BH 11, with scale
14. BH 12, with scale
15. BH 13 and 14, item **# 1548**, metal fragment

16. BH 13, with scale
17. BH 14, with sale
18. **# 1548,** metal fragment, with scale
19. BH 15
20. BH 15, with scale

21. South wall with bullet probes, looking southeast
22. South wall with bullet probes, looking southwest
23. Overall south wall with bullet probes
24. South wall looking from storage room

Roll # 11

1. Placard for roll # 11
2. South wall with probes looking up from commons area
3. West wall storage and south wall (up from cafeteria)
4. West wall of storage room from cafeteria
5. Hole west wall of storage room from inside room

6. Hole in west wall inside storage room
7. Hole in west wall showing bullet hole in stud
8. Hole in west wall showing bullet hole in stud
9. Bullet inside west wall of storage room
10. **# 1549,** bullet fragment, in wall

11. **# 1549**, bullet fragment, in wall
12. BH 12 with drywall removed (no flash)
13. BH 12 close-up

Roll # 11, continued

14. **#1550**, bullet fragment from BH 12
15. **#1550**, with scale

16. Bullet in insulation from BH 14 (no flash)
17. Bullet in insulation from BH 14 with scale
18. **# 1551**, bullet, with scale
19. **# 1552**, bullet fragment, south wall under window (overall)
20. **# 1552**, bullet fragment, close-up

21. **# 1552**, bullet fragment, with scale
22. Hole in drywall, west wall of storage room, behind shelves
23. Hole in drywall, (outside wall)
24. **# 1553**, bullet inside wall

Roll # 12

1. Placard for roll # 12
2. **# 1553**, bullet, in wall, science storage room
3. Door to SCI-8, looking SE, door open
4. Door to SCI-8, looking SE, door closed
5. Looking south into SCI-8 with bullet hole in table

6. Looking south into SCI-8, close-up of hole
7. Looking south into SCI-8, with scale and bullet hole
8. Looking south into SCI-8, with hole with scale
9. Looking southeast overall of science room 8
10. Looking southwest overall, science room 8

11. Looking northwest overall, science room 8
12. Looking northeast overall of science room 8
13. Music 1 door looking northeast
14. Music room 1 looking northwest overall
15. Looking northwest into music room 1

16. Looking southwest overall into music 1
17. Looking northwest overall into music 1
18. Medium shot of back packs and video camera, music room 1
19. Close-up shot of back packs and video camera, music room 1
20. Close-up shot of back packs and video camera, music room 1

21. **#1554-1557**, backpack, video camera, hat/shirt, notebook
22. Doorway to math 10

Roll # 12, continued

23. Looking northwest into math 10
24. Looking northeast into math 10

Roll # 13

1. Placard for roll # 13
2. Math 10, looking southeast
3. Math 10, looking southwest
4. Eric Veik's desk, looking SE
5. Eric Veik's desk, looking east

6. Eric Veik's desk, from top
7. Eric Veik's desk, from top
8. Eric Veik's desk, close-up
9. Eric Veik's desk, with camera bag close-up
10. Eric Veik's desk, Target bag

11. Eric Veik's desk
12. Looking northwest from Veik's desk, in math 10
13. **#1559-1562**, camera case, Target bag, backpack, paper and pencil
14. North doorway into SCI-8
15. Doorway looking south in SCI-8

16. Inside SCI-8, looking south
17. Inside SCI-8 looking east
18. From inside SCI-8 looking north
19. **# 1563**, bullet fragment
20. **# 1563**, with scale

21. **# 1564**, lead fragment
22. **# 1564**, with scale
23. **# 1565**, bullet fragment
24. **# 1565**, with scale

Roll # 14

1. Placard for roll # 14
2. **# 1566**, lead fragment
3. **# 1566**, with scale
4. **# 1567**, bullet fragment
5. **# 1567**, with scale

Roll # 14, continued

6. **# 1568**, shotgun wad fragment
7. **# 1568,** with scale
8. **# 1569**, shotgun wad fragment
9. **# 1569,** with scale
10. **# 1570**, bullet fragment

11. **# 1570**, with scale
12. **# 1571**, bullet fragment
13. **# 1571,** with scale
14. **# 1572**, shotgun wad fragment
15. **# 1572,** with scale

16. **# 1573**, lead fragment
17. **# 1573,** with scale
18. **# 1574**, bullet fragment
19. **# 1574,** with scale
20. **# 1575**, bullet fragment

21. **# 1575,** with scale
22. **# 1576**, bullet fragment
23. **# 1576,** with scale
24. Overall east wall of SCI-8

Roll # 15

1. Placard for roll # 15
2. **# 1577**, bullet fragment, in BH 21
3. **# 1577,** with scale
4. **# 1578**, bullet fragment
5. **# 1578,** with scale

6. **# 1579**, shotgun wad fragment
7. **# 1579,** with scale
8. **# 1580**, lead fragment (shot pellet)
9. **# 1580,** with scale
10. BH 16

11. BH 16 with scale
12. BH 17
13. BH 17 with scale
14. BH 18
15. BH 18 with scale

Roll # 15, continued

16. BH 19
17. BH 19 with scale
18. BH 20
19. BH 20 with scale
20. BH 23

21. BH 23 with scale
22. BH 21 (w/**# 1577**)
23. BH 21 with scale
24. BH 22

Roll # 16

1. Placard for roll # 16
2. BH 22 with scale
3. BH 24
4. BH 24 with scale
5. BH 24 exit

6. BH 24 exit with scale
7. BH 25
8. BH 25 with scale
9. BH 25 exit
10. BH 26

11. BH 26 with scale
12. BH 27
13. BH 27 with scale
14. BH 28
15. BH 28 with scale

16. Overall ceiling SCI 8 looking northwest
17. Overall ceiling SCI 8 looking southeast
18. BH 29, in ceiling
19. BH 29 with scale
20. BH 30, in ceiling

21. BH 30 with scale
22. BH 21 and **# 1577**, bullet fragment
23. **# 1577**, bullet fragment
24. **# 1577**, with scale

Roll # 17

1. Placard for roll # 17
2. BH 17 with probe looking east with no flash
3. BH 17 with probe looking east with flash
4. BH 17 with probe looking overhead
5. BH 20 with probe, looking east

6. BH 20 with probe from below
7. **# 1581**, bullet fragment
8. East wall, SCI-8, looking north with no flash
9. East wall of SCI-8 looking north with flash
10. **# 1582,** bullet fragment, looking south

11. **# 1582,** bullet fragment, looking south
12. **# 1582,** with scale
13. **# 1583**, lead fragment
14. **# 1584,** bullet fragment, in insulation
15. **# 1584,** with scale

16. Science office 3 chemical supply, looking north
17. Science office 3 chemical supply, looking northwest
18. Science office 3 chemical supply, looking south
19. Science office 3 chemical supply, looking east
20. Science office 3 BH 17 exit

21. Science office 3 BH 17 exit with scale
22. Science office 3 shelf area south of BH 17
23. Science office 3 shelf area west of bullet
24. **# 1585**, bullet, from BH 17

Roll # 18

1. Placard for roll # 18
2. **# 1585**, bullet from BH 17 with scale
3. Science office 3 with dent in cabinet
4. **# 1586**, lead fragment on top of towel dispenser, SCI-8
5. **# 1586,** with scale

6. Looking south at science office1
7. Looking south at science office 1 with door closed
8. Close-up of science office 1 door glass
9. BH 33
10. BH 33 with scale

Roll # 18, continued

11. Burnt deposit on science office 1 door exit
12. Science office 1 door looking east
13. From science office 1 door looking east
14. Looking north from south end, science office 1
15. Looking north from south end, east half of office

16. Looking north from north end, looking at east half
17. Burn pattern on floor looking west
18. Burn pattern on floor, looking north
19. Burn pattern on floor, from overhead
20. Looking east from doorway

21. North bookcase, west side
22. North bookcase, close-up of cloth vest hanging on shelves
23. North bookcase, holes in bookcase behind vest
24. South end, north bookcase

Roll # 19

1. Placard for roll # 19
2. North desk, science office 1
3. South desk, science office 1
4. East shelving unit, looking to west bullet holes
5. East shelving unit, looking to west, upper half

6. East shelving unit, looking west, lower portion
7. Science office 1, outside of door, number markers in hallway
8. Science office 1, number markers on floor
9. **# 1587**, match stick
10. **# 1587**, with scale

11. **# 1588**, 2 match sticks
12. **# 1588**, with scale
13. **# 1589**, lead fragment
14. **# 1589**, with scale
15. **# 1590**, bullet fragment

16. **# 1590**, with scale
17. Burn area with scale, showing **# 1589 - # 1594**
18. **# 1592**, CO2 cartridge
19. **# 1592**, CO2 cartridge, with scale
20. **# 1593**, lead fragment

Roll # 19, continued

21. **# 1593**, lead fragment, with scale
22. **# 1595**, bullet fragment
23. **# 1595**, with scale
24. Overall photo of items, **# 1596**, **# 1597** and **# 1598**

Roll # 20

1. Placard for roll # 20
2. **# 1596**, lead fragments
3. **# 1596**, with scale
4. **# 1597**, shotgun wad fragment
5. **# 1597**, with scale

6. **# 1598**, lead fragment
7. **# 1598**, with scale
8. **# 1599**, lead fragment
9. **# 1599**, with scale
10. **# 1600**, bullet fragment (piece of copper jacket)

11. **# 1600**, with scale
12. **# 1601**, lead fragment
13. **# 1601**, with scale
14. **# 1602**, lead fragment
15. **# 1602**, with scale

16. **# 1603**, blue vest
17. **# 1603**, with scale
18. Front of box with bullet hole from **# 1604**, bullet fragment
19. Side of box with bullet hole from **# 1604**
20. **# 1604**, bullet fragment, from inside box

21. **# 1604**, with scale
22. **# 1605**, lead fragments, overall
23. **# 1605**, no scale, close-up
24. **# 1605**, with scale

Roll # 21

1. Placard for roll # 21
2. **# 1600**, piece of copper jacket, overall
3. **# 1600**, with scale
4. **# 1601**, lead fragment, overall
5. **# 1601**, with scale

6. **# 1602**, lead fragment, overall
7. **# 1602**, with scale
8. **# 1603**, blue vest
9. **# 1604**, bullet fragment from inside box
10. **# 1604**, with scale

11. **# 1605**, bullet fragment
12. **# 1605**, with scale
13. **# 1606**, lead fragments, on shelf
14. **# 1606**, with scale
15. Bullet holes from **# 1607**, in shelf unit
16. Bullet holes from **# 1607**, in notebooks
17. **# 1607**, piece of shotgun slug, inside book
18. **# 1607**, with scale inside book
19. **# 1607**, second piece of slug on shelf
20. **# 1607**, second piece of slug, with identification tag

21. **# 1607**, second piece of slug, with scale
22. **# 1608**, lead fragment on floor
23. **# 1608**, with scale
24. **# 1609**, shotgun wad fragment, overall

Roll # 22

1. Placard for roll # 22
2. **# 1609**, shotgun wad fragment, in tray
3. **# 1609**, with scale (tray moved for photo)
4. **# 1610**, shotgun wad fragment (behind window shade)
5. **# 1610**, overall with shades up

6. **# 1610**, with scale
7. BH 34, 35, 36 and 37 (from **# 1607**)
8. BH 35 exit
9. BH 35 entry with scale on shelving
10. Bullet holes in south end shelving unit

Roll # 22, continued

11. Bullet holes in south end shelving with markers (BH 38-40 and 43)
12. Bullet holes in divider between shelves (BH 41 and 42)
13. BH 38 with scale
14. BH 39 and 40 with scale
15. Exits for BH 39 and 40

16. Exits for BH 39 and 40, with scale
17. BH 34, 38, 39, 40 and 43, with probes, looking east
18. BH, 34, 38, 39, 40 and 43, looking from doorway
19. BH 34 and 35 with a probe
20. **# 1611**, lead fragments, overall

21. **# 1611**, lead fragments, close-up
22. **# 1611**, with scale
23. **# 1612**, bullet fragments, inside book
24. **# 1612**, with scale

Roll # 23

1. Placard for roll # 23
2. East side of second shelf, exit for BH 42
3. East side, second shelf, exit for BH 41
4. BH 42 exit with marker
5. BH 41 exit with marker

6. Inside (close-up) culture tube box (BH 42 continued)
7. **# 1613,** bullet fragment (from BH 42)
8. **# 1613,** with scale
9. Small culture tube box (BH 41 continued)
10. Inside (close-up) culture tube box

11. Dividers inside small culture tube box
12. **# 1614,** lead fragment (from BH 42)
13. **# 1614**, with scale (removed from box)
14. South science hall, looking east outside SCI-5
15. Corner of hall, west of SCI-10

16. Close-up BH 44
17. Close-up BH 44 with scale
18. Midrange of BH 44, 45, and 46
19. Midrange of BH 44, 45, and 46 with scale
20. BH 45 no scale

Roll # 23, continued

21. BH 45 with scale
22. Exit for BH 45, overall
23. Bullet 45 exit, mid range
24. BH 45, exit with scale

Roll # 24

1. Placard for roll # 24
2. SCI-6 looking southeast
3. SCI-6, looking southwest
4. SCI-6, looking northwest
5. SCI-6, looking northeast

6. BH 46, in speaker, overall looking east
7. BH 46, midrange
8. BH 46, close-up with scale
9. BH 46, and BH 47
10. Exit for BH 46

11. BH 47, midrange
12. BH 47 with scale
13. Overalls, east pillar, SCI-6
14. **# 1615**, bullet, inside wall, midrange (from BH 44-47)
15. **# 1615**, close-up

16. **# 1615**, with scale
17. **# 1616**, bullet fragment (from BH 6), overall, inside window frame
18. **# 1616**, bullet inside window frame
19. **# 1617**, live 9mm cartridge, overall looking east
20. **# 1617**, live 9mm cartridge, midrange looking east

21. **# 1617**, close-up without scale
22. **# 1617**, close-up with scale
23. Looking south at upper window with bullet hole, south of cafeteria
24. Looking south at upper window with bullet holes, south of cafeteria

Roll # 25

1. Placard for roll # 25
2. Broken window and impact on frame
3. Overall impacts on window south side of cafeteria (BH 48-49)
4. Photo of bullet, between glass, south of cafeteria (**#1619**)

Roll # 25, continued

5. Looking south, BH 48, 49, and 50 south of cafeteria

6. Hole in window frame, east side of south commons entry
7. **# 1618**, bullet fragment, from BH 50
8. **# 1618**, with marker
9. **# 1618**, with marker, out of wall
10. **# 1618**, with scale

11. **# 1619**, bullet fragments (from BH 49), with marker
12. **# 1619**, with label from second floor
13. **# 1619**, with scale, removed from window
14. BH 51 overall, looking south
15. BH 51 close-up

16. BH 51 with scale
17. **# 1620**, nail, overall looking north west
18. **# 1620**, close-up
19. **# 1620**, with scale
20. Entrance music store room

21. Interior of music room looking northwest
22. Interior of music room, looking northeast
23. Interior of music room, looking southeast
24. Interior of music room, looking southeast

Roll # 26

1. Placard for roll # 26
2. Storage room, next to vocal music 1
3. Interior of storage room, looking northwest
4. Interior of storage room, looking northeast
5. Interior of storage room, looking southeast

6. Interior of storage room, looking southwest
7. Auditorium hallway, looking north
8. Doorway to music 3
9. Interior of music 3, looking northwest
10. Interior of music 3, looking northeast

11. Interior of music 3, looking southeast
12. Interior of music 3, looking southwest
13. Exterior science mechanical, next to SCI-4

Roll # 26, continued

14. Interior of science mechanical, looking southeast
15. Interior of science mechanical, looking north

16. Exterior of science mechanical across from SCI-4
17. Interior of science mechanical from south side
18. Exterior of SCI-4, with door
19. Interior of SCI-4, looking southeast
20. Interior of SCI-4, looking northeast

21. Interior of SCI-4, looking northwest
22. Interior of SCI-4, looking southwest
23. Exterior of SCI-5
24. Interior of SCI-5, looking southeast

Roll # 27

1. Placard for roll # 27
2. Interior of SCI-5, looking northeast
3. Interior of SCI-5, looking northwest
4. Interior of SCI-5, looking southwest
5. Exterior of science office 2

6. Interior, science office 2, east looking west
7. Interior, science office 2, west end looking north

NATURE OF CASE Homicide		

CRIME SCENE REPORT FOR TEAM FIVE

REQUESTING AGENCY:	Jefferson County Sheriff's Office 200 Jefferson County Parkway Golden, CO 80401 303-271-5600
REQUESTING OFFICER:	Lab Supervisor Chris Andrist
INVESTIGATING OFFICER:	Lab Supervisor Chris Andrist
DATE OF REQUEST:	April 20, 1999
DATE OF OFFENSE:	April 20, 1999
AGENCY CASE NUMBER:	99-7625
LOCATION OF SCENE:	Columbine High School 6201 South Pierce Street Jefferson County, CO 80165
VICTIM:	
SUSPECTS:	Dylan Klebold (DOB: 091181) Eric Harris (DOB: 040981)
WEATHER CONDITIONS:	Varied
EVIDENCE SEIZED BY:	Investigator Jose Aceves, Investigator Tom Acierno, Deputy Doug Moore
EVIDENCE IN CUSTODY OF:	Jefferson County Sheriff's Office

Type of Report Crime Scene	Agent Barbara Ray	Date 10/12/99	File Number P99-0453 D99-1333	Page 2

REMARKS:

On April 20, 1999, crime scene personnel from various law enforcement agencies were assigned to assist with the processing of a crime scene at Columbine High School, located in Jefferson County, Colorado.

Upon arrival at the Command Post located on Pierce Street by Clement Park, crime scene personnel were informed that the bomb squads of various agencies were in the process of clearing the school and the parking lot of explosive devices. At approximately 11:30 p.m., all crime scene personnel were instructed that processing of the scene would not start until the bomb squads had completed their activities; therefore, all crime scene personnel would report back to the command post on Wednesday, April 21, 1999 at 8:00 a.m.

ACTION TAKEN:

At 11:45 a.m. on April 21, 1999, a briefing was held with Chris Andrist of the Jefferson County Sheriff's Office. The plans for processing the scene and team assignments were made. Team Five was assigned the processing of the front foyer, lobby, hallway, and rear foyer of the school. The team consisted of Ken Van Cleave - CBI Pueblo, Vaughn Ballard - CBI Denver, Tom Netwal - CBI Denver, Barbara Ray – CBI Pueblo and Jose Aceves, Jefferson County Sheriff's Office. Duties assignments were:

- Ken Van Cleave, Team leader, sketching the scene and recording measurements
- Vaughn Ballard, photography
- Tom Netwal, measurements
- Barbara Ray, general notes and photography log
- Jose Aceves, collect, seal, label and submit evidence

All evidence was to be submitted to a central receiving area for the Jefferson County Sheriff's Office.

At 2:15 p.m., Team Five was taken on a cursory walk-through of the scene. Processing of the assigned area began at 2:30 p.m. During the cursory walk-through, several bottles of water and an opened box of military rations were noted in the lobby of the building. Team Five was advised that these items had been used by the SWAT team and did not require processing per Chris Andrist.

Items of potential evidence located on the floor were

marked by use of a placard near each item. Processing began in the front foyer of the building. Overall photographs and close-up photographs were taken. The east entrance to the school had two sets of double doors opening to the outside of the school. Another set of double doors was located connecting the foyer to the lobby of the school. A stain on the floor in front of the north interior door tested negative for the presence of blood. Items of evidence and bullet holes in the doors and ceiling were photographed and sketched. Team Five assigned the bullet holes numbers. The number designation contained BH (bullet hole), a sequential number and a 5 in parenthesis (indicating team number). Evidence collected from this area included live rounds, blood and projectiles. The bullet hole in the center of the front glass passed through the glass from the outside of the building. The remaining bullet holes were from bullets that had traveled from the west to the east.

Team Five proceeded to the lobby area and continued to process the scene by taking overall and close-up photographs, recording measurements and collecting items of evidence. Three stains tested positive for the presence of blood. These stains were located by evidence placard number 1812 (an area near the artificial plant), evidence placard number 1816 (an area near the hanging trophy case) and evidence placard number 1820 (an area in the doorway marked "Social Studies/English"). One area located by evidence placard 1817 tested negative for the presence of blood. The stains located by evidence placard numbers 1812 and 1816 were transfer stains, while the stain located by evidence placard number 1820 was more concentrated. The stain located by evidence placard number 1816 had an impression in the bloodstain similar to the bottom of a shoe. Evidence collected from this area included live rounds of ammunition and blood. The following overall observations were made:

- BH-4 (5), BH-5 (5) and BH-6 (5) were located on the south interior door to the lobby. None of these penetrated through the door.
- BH-7 (5) was a large hole and did not penetrate though the support
- BH-8 (5) and BH-9 (5) did not penetrate the door.
- BH-10 (5) contained a projectile
- BH-11 (5) and BH-13 (5) were impact sites

- BH-12 (5) penetrated the west side of the door panel
- BH-15 (5), BH-16 (5) and BH-17 (5) were in the center support on the interior foyer doors
- BH-18 (5) was in the glass on the interior of the foyer doors
- BH-19 (5), BH-20 (5) and BH-21 (5) were in ceiling tiles near the carpeted hallway

In addition, bullet or projectile holes not specifically noted in this report were documented through photography and sketching.

Team Five proceeded to the carpeted section of the hallway. Overall photographs, close-up photographs, measurements were taken and items of evidence were collected. At 6:40 p.m., Linda Holloway of CBI Denver and Steve Johnson of the Littleton Police Department joined the team and helped to make measurements. At 7:05 p.m., Joan Schroer joined the team and helped to make measurements. The hallway west of the foyer entrance was carpeted. This hall was divided into six sections, starting with section one at the east end where the carpet began. Subsequent sections began at each arch or doorway as one proceeded west. Bullet holes numbered BH-22 (5) through BH-33 (5) were documented in the first and second sections of carpeted hallway. At 8:15 p.m., Team Five suspended processing of the hallway. All items of evidence collected on this date and all film and photograph logs were given to Jefferson County Deputy Aceves.

On April 22, 1999, Team Five met at Columbine High School to continue with processing the hallway. Team members consisted of Barbara Ray (team leader), Ken Van Cleave, Vaughn Ballard, Tom Netwal, Joan Schroer and Steve Johnson. Joe Clayton – CBI Denver and Tom Acierno – Jefferson County Sheriff's Office joined Team Five. Team assignments were as follows:

- Ken Van Cleave, sketching the scene
- Vaughn Ballard, measurements
- Tom Netwal, measurements
- Joan Schroer, record measurements
- Steve Johnson, measurements
- Barbara Ray, general notes and photography log
- Joe Clayton - photography
- Tom Acierno, collect, seal, label and submit

evidence

Evidence placards #1835 and #1847 were documented by photography with no evidence associated with these numbers. Placard #1847 was a hole in the carpet. No bullet was revealed under the carpeting. Evidence placard #1846 consisted of nineteen cartridge cases near the access door to the mechanical area on the north side of the theater. These were collected as one item of evidence. Several pieces of tape were collected from the doorframe and from behind the doorway between the second and third sections of carpeting. This exhibit was marked as #1887-2. Evidence placard #1889 was a projectile collected from BH-35 (5). Evidence placard #1890 was a projectile collected from BH-64 (5). Evidence placard #1891 was a projectile collected from BH-67 (5). When a direction of travel could be determined, the bullet holes in the third through sixth carpeted sections of hallway and from the rear foyer were all in a direction from west to east.

The rear foyer was divided into six areas. Bomb fragments were indicated by markers with red tape and bullet fragments were indicated by markers with blue tape. Bomb fragments from each area were collected in one envelope. Bullet fragments from each area were collected in one envelope. Numbers were assigned to items of evidence that were collected. Three stains in the rear foyer tested negative for the presence of blood. The mat in the rear foyer was rolled up. It was unrolled and found to be clean and free of debris. Numerous bullet holes in the interior foyer rear doors were documented, photographed and measured. The processing was suspended at 4:45 p.m. All items of evidence collected on this date and all film and photograph logs were given to Jefferson County Deputy Acierno. A brief meeting with all teams was conducted.

On April 23, 1999, Team Five met at Columbine High School to continue with processing the hallway. Team members consisted of Barbara Ray (team leader), Ken Van Cleave, Vaughn Ballard, Tom Netwal, Joan Schroer, Joe Clayton, and Tom Acierno. Team assignments were as follows:

- Ken Van Cleave, sketching the scene
- Vaughn Ballard, measurements
- Tom Netwal, measurements

- Joan Schroer, record measurements
- Barbara Ray, general notes and photography log
- Joe Clayton, photography
- Tom Acierno, collect, seal, label and submit evidence

Processing resumed with the rear foyer of the school. Numerous bullet holes were photographed and measured on the inside of the back doors. These holes were assigned numbers BH-67 (5) through BH-125 (5). Several areas on the overhang in the rear foyer tested negative for the presence of blood. One number [BH-126 (5)] was given to all the fragments embedded in the southeast wall of the foyer. The south wall was photographed in several portions with markers BH-128-1 (5) to BH-128-4 (5). The north wall of the foyer was photographed in several portions with markers BH-129 (5) to BH-129-4 (5). Marker BH-129-1 (5) was not used.

The bullet holes in the ceiling were documented by designating an east and south coordinate to the ceiling tiles as they related to the section of carpet over which the holes in the tiles were located. Attempts were made to recover all bullets from the ceiling tiles, lockers and walls. Recovered projectiles were numbered and taken into evidence. Processing was suspended at 4:45 p.m. and a brief meeting with the other forensic teams was conducted. All items of evidence collected on this date and all film and photograph logs were given to Jefferson County Deputy Acierno.

On Monday, April 26, 1999, crime scene processing of Columbine High School continued. Following a briefing from approximately 8:00 a.m. until 8:50 a.m. at the school auditorium, Team Five continued to process its assigned areas. On this date Team Five consisted of CBI Agent Ken Van Cleave-acting as team leader, CBI Agent Joe Clayton, CBI Agent Vaughn Ballard, Detective Joan Schroer-Littleton PD, and Deputy Douglas Moore- Jefferson County SO, who took custody of all evidence collected.

- Ken Van Cleave, sketching the scene, general notes
- Vaughn Ballard, measurements
- Joan Schroer, record measurements, photography log
- Joe Clayton - photography

- Douglas Moore, collect, seal, label and submit evidence

Processing on this date included collecting evidence from the "Social Studies/English" hallway immediately south of the main hallway; collecting evidence from the custodians' office at the west end of the main hallway; collecting bullets and bullet fragments from the doors in the east and west ends of the main hallway; and collecting bullets from locker 1748 in the main hallway.

At approximately 9:00 a.m. processing of the "Social Studies/English" hallway began. After the overall area was photographed, the area was searched, and four (4) 9mm cartridges were found. Three cartridges were located just south of the doors into the main hallway and the fourth cartridge was found to the south at the intersection with the first east-west hallway. These items were given evidence numbers 1919-1922, and were photographed, measured and collected.

At approximately 10:45 a.m. collection of the bullets and fragments from the doors at the east end of the main hallway began. Members of the Littleton Fire Department under the supervision of Agent Van Cleave used their cutting equipment to help remove the items from the doors. Evidence items 1923-1926 were recovered.

The firefighters and other members of the team then moved to the west end of the main hallway to recover bullets and fragments from the doors. Bullets and fragments were recovered and given evidence numbers 1927 and 1932-1935.

Agent Van Cleave then examined the previously numbered bullet holes in the west wall and doors of the main hallway to determine the direction of travel of the projectiles. The following information was obtained:

BH-133 (5)	outside to inside
BH-134 (5)	outside to inside
BH-135 (5)	inside to outside
BH-136 (5)	no conclusion

At this time it was decided to examine and document the bullet holes on the outside of the west doors into the main hallway. This area had been examined previously

by the FBI; however, it was unclear if the bullet holes had been documented. These holes were assigned numbers, photographed, and measured by Team Five. It was also determined that the previously numbered BH-132 (5) on the inside of the west doors was the impact point for BH-178 (5) on the outside of the west doors.

During the examination of the doors and west wall additional items of evidence were recovered in the area previously processed by the FBI. These included numerous pieces of bomb debris and fragments from immediately outside the west doors, evidence item 1928, and three metal pieces from the area immediately west of the doors, evidence items 1929-1931.

Additional bullet holes were examined by Agent Van Cleave to attempt to determine direction of travel. The following information was obtained:

BH-145 (5)	no conclusion
BH-146 (5)	no conclusion
BH-147 (5)	outside to inside
BH-148 (5)	outside to inside

At approximately 2:45 p.m. processing of the custodians' office at the west end of the main hallway began. Examination revealed two bullets had been fired at the east wall of the room. The room was photographed and measured. Searching disclosed a fragment of bullet jacket on the floor near the desk. This item was given evidence number 1936, measured and collected. A bullet hole was found in the freezer door of the refrigerator on the east wall and was photographed and measured. Fragments of this bullet were recovered from inside the freezer and given evidence number 1937. A second bullet was removed from the east wall of the room. This bullet had passed through a table leg and was found behind the wallboard. After photographing and measuring this area, the bullet was removed from behind the wallboard and given evidence number 1938.

Agent Van Cleave and the other members of Team Five then responded to the main hallway to recover two (2) bullets from locker 1748. This locker had been examined and opened by bomb technicians to allow recovery of the evidence. One bullet was given

evidence number 1939 and was consistent with originating from the bullet which made the previously examined bullet hole BH-48 (5). The other bullet was given evidence number 1940 and was the bullet which made bullet hole BH-49 (5).

Team Five then discussed what processing they had done since beginning on Wednesday, April 21, 1999. It was concluded that no additional processing would be done in our assigned area and members of the team departed at approximately 4:00 p.m. All items of evidence collected on this date and all film and photograph logs were given to Jefferson County Deputy Moore.

Recorded measurements, crime scene sketches, photograph logs and evidence logs contain more details pertaining to the location and listing of all of the evidence.

Summary of evidence:

- thirty cartridge cases
- three shotgun shells
- two shotgun wads
- twenty-four bullets
- forty projectile fragments plus numerous fragments recovered from the rear entry way
- fourteen live rounds
- one pipe end cap
- one hundred forty-eight exit/entry holes resulting from projectiles

Evidence was collected and released to Jefferson County Sheriff's Office.

Type of Report Crime Scene	Agent Barbara Ray	Date 10/12/1999	Case Number P99-0453 D99-1333	Page 11

CRIME SCENE:

On 04/21/99 at approximately 1500 Hours Dets. D. Neil, 74010, and D. Wallis, 79046, were assigned and began a search of the Administrative Offices inside Columbine High School. Due to the size of these offices they were specifically assigned the outside offices and the financial office to document. Along with these two detectives from Denver Police Homicide Unit was Dets. W. Garson, 65006, and J. Sewell, 78018, of the Denver Police Crime Laboratory. Still photographs were taken by Det. Garson of the scenes as they were found. Evidence markers were then placed near the items that were to be recorded and taken as evidence.

Det. Gabel then used a video camera to record the scene as it is now to preserve the scene for any later analysis if necessary.

The items taken as evidence are then measured to specifically place them in the room if needed for any later analysis or recreation. Those items and measurements are:

Overall of first outer office:
23' 04" North to South walls
25' 00" East to West walls
(Note: North wall is a partial wall used for mail boxes)

Marker #	Item:	Measurements:
1.	Ash Tray	11' 04" North of South wall 09' 11" East of West wall

Overall of Second Office area: (North of Mail boxes)
29' 04" North to South walls
30' 11" East to West walls

Marker #	Item:	Measurements:
2.	Broken Pottery Statue	01' 02" West of East wall 03' 10" North of South wall
3.	Spent 9mm casing	07' 00" North Of South wall 07' 11" West of East wall
4.	Spent 9mm casing	07' 01" North of South wall 09' 00" West of East wall
5.	Spent 9mm casing	19' 05" West of East wall 00' 07" North of South wall
6.	Spent 9mm casing	19' 03" West of East wall 07' 01" North of South wall
7.	Live 9mm bullet	14' 09" West of East wall 12' 06" North of South wall
8.	Debris #1 (From TV)	23' 04" West of East wall 07' 02" South of North wall
9.	Debris #2 (From TV)	21' 05" West of East wall 06' 02" South of North wall
10.	Spent 9mm casing	11' 10" West of East wall 02' 10" South of North wall
11.	Live 9mm round	06' 06" West of East wall 02' 10" South of North wall

		09' 05" North of North wall (In hallway)
29.	Bullet strike-T.V.	29' 03" West of East wall
		11' 02" South of North wall
		06' 09" Above floor
30.	Bullet strike-wall	24' 01" West of East wall
		00' 00" South of North wall
		03' 05" Above floor
31.	Bullet strike-windows	09' 01" South of North wall
		00' 10" East of East wall (through glass)
		03' 03" Above floor
	Second bullet holes	04' 06" Above floor
32.	Bullet fragment	26' 04" West of East wall
		08' 02" South of North wall
33.	Bullet fragment	17' 09" West of East wall
		12' 09" North of South wall
34.	Spent bullet	18' 01" South of North wall
		02' 09" East of West wall
35.	Bullet strike #1-lawn	43' 10" East of West wall
		38' 00" South of North wall
		48' 04" From hole in windows
36.	Bullet strike #2-lawn	61' 01" East of West wall
		39' 04" South of North wall
		63' 06" From hole in windows
37.	Spent bullet-sidewalk	15' 05" North of North wall of school
		08' 03" East of East wall of school
38.	Spent bullet-park lot	54' 06" West of East Curb line of Pierce St.
		06' 06" North of South Curb line of driveway

Physical description of crime scene at Columbine High School
By Det. Gary T. Hoffman, 70120, D.P.D.
Date: 04/21/99
Approx. time of 1500hrs.

Visual description of the interior of the Clinic office, adjacent lavatory and hallway.

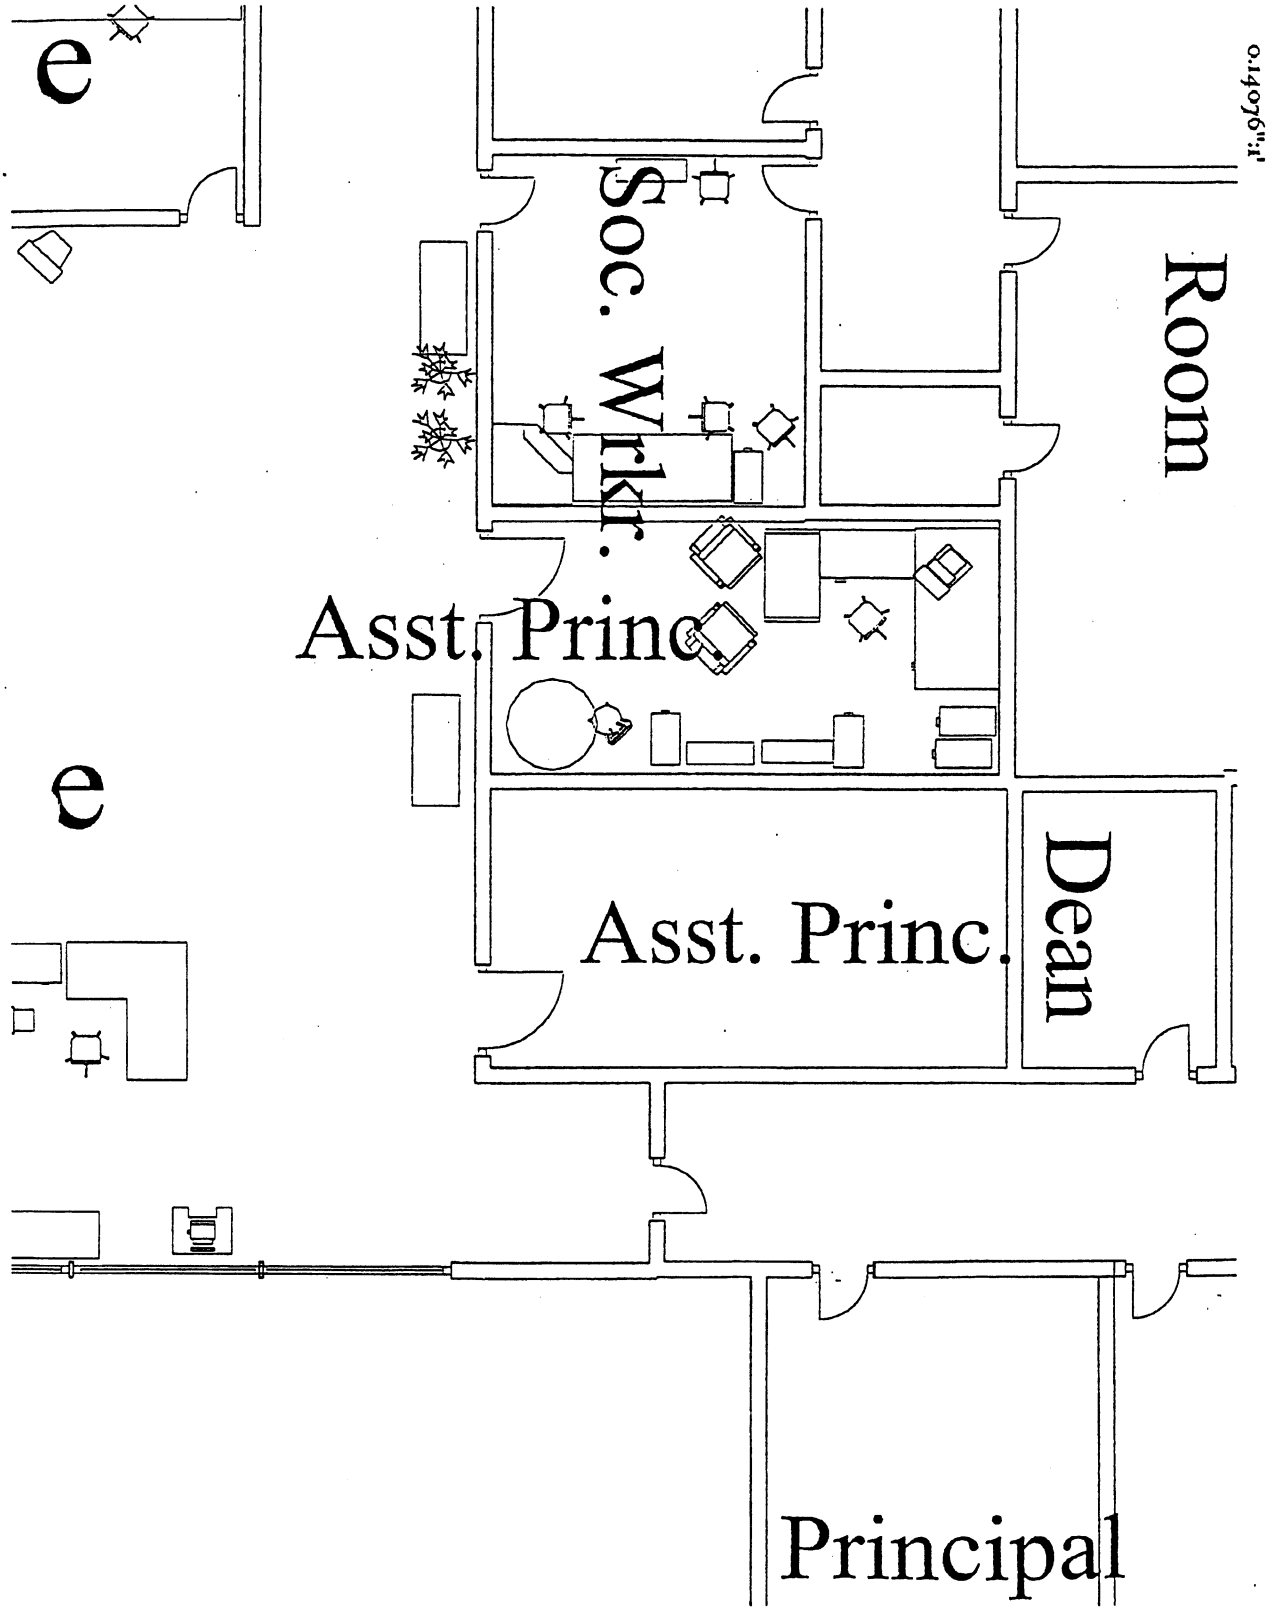

The clinic is accessed via a hallway on the south side of the office and also through the main administrative office area via a internal hallway to the east of the clinic proper. The clinic is located in a pentagon shaped room. The east wall is 20'9" long; the west wall is 23'8" long; the south wall is 15'10" long and is composed of two connected walls; the north wall is also 15'10" and is one continuous wall.
Viewing the interior of the clinic from the main door way on the west wall of the clinic, it is noted the door, which opens from right to left and to the interior of the office, is being held in the open position by use of two cardboard boxes, one on top of the other. The door in this position is against the north wall of the clinic. Viewing the interior in a counter clockwise manner, the walls are covered in sheetrock and painted. There is a light switch located just to the south of the door jam. The ceiling light are on and the clinic is well lit. Directly below the light switch on the carpeted floor is a plastic trash container lined with a disposal bag. Along the west wall of the clinic is a rectangular counter top supported off of the carpeted flooring by use of two drawer filing cabinets, one each located underneath of the ends of the top for support. There is a swivel type office chair located to the east and almost centered from the exposed edge of the counter top. The chair is facing to the west. The counter top itself has miscellaneous articles on top of it. South of the counter top and along the west wall is an irregular shaped rectangular shaped desk. ON the top of this desk is a two tone nylon wind breaker style jacket, a tan colored canvas ruck sack with the Boy Scout of America emblem on the cover flap. East of the open edge of the desk is another office chair which is facing to the west. South of this desk is a metal storage cabinet. It has a tan colored exterior and a reddish colored interior. The cabinet door are open and exposing the interior contents of the cabinet. On the top of the cabinet which is approx. 6'6" in height, is a cardboard box and a orange colored plastic Halloween candy bucket. The cabinet is located in the south west corner of the clinic. The south interior wall of the clinic is void of articles except for two large cardboard boxes, one on top of the other. The top box is empty. It should be noted at this point that the east interior wall of the clinic separates the clinic from the Attendance office. At the southeast corner to the clinic and along the east wall is a large stainless steel sink and cabinet/counter top combination. The door of the cabinet are open exposing the contents within. The sink is void of articles while the counter top has containers for medical equipment (tongue suppressor etc.) and a small white with an orange lid cooler. Above the counter top area on the east wall is a stainless steel medicine cabinet with a glass mirror and soap dispenser with in it. Above the sink on the east wall is a small storage cabinet with the doors closed. To the north of the sink is an examination bed. The bed is perpendicular to the east with head of the bed touching east interior wall. To the north of the examination bed is a tan colored wooden desk with miscellaneous articles of its top including computer equipment. There is a office type chair centrally located to the west of the desk and facing to the southwest. Above the desk in the east wall is a large window which offers visibility into the Attendance Office area. There is a raised venetian blind attached to the top of the metal window frame. At a point midway along the lower edge of the window glass is a bullet defect. The defect is circular is shape and is smooth on the clinic side of the glass. There is very little debris lying near the defect on the sill or the desk top and it's contents. This bullet defect is 45 inches above the carpeted flooring and 10'1" north of the south clinic wall. Note: For documentation purposes the bullet defect has been marked for photography purposes with placard #2. North of the desk on the carpeted flooring is a plastic trash container which is lined with a disposable bag. North of the trash container is another examination bed, perpendicular to the east wall with the head of the bed touching the wall.

South of the northwest corner of this examination bed is a spent shell casing. This casing is located 35" south of the south clinic wall (which separates the clinic area from the lavatory) and 8'0" east of the west wall. This casing has been given Placard #1 for photography purposes. North of the examination bed are two - four drawer file cabinets both facing to the west.
North of the file cabinets is the interior hallway which officers access to the main office area. The 5'1" wide hallway runs from west to east from the clinic lavatory door along the north clinic wall east. The hallway is 16'0" long from the lavatory door to the interior hallway door which separates the clinic from the other interior offices.
Along the north wall of the clinic west of the hallway is the entrance to the clinic lavatory. The lavatory door which faces to the east is propped open with a coat rack. The door opens from left to right and to the exterior of the lavatory. At a point just south of the lavatory door jam and just above the rubber base board molding is a defect to the sheetrock. This defect is located 9" above the carpeted flooring and 4'0" south of the north clinic wall. This defect is roughly rectangular in shape. It is noted that one of the base legs of the coat rack is covered with gypsum powder and is similar in size and shape to that of the wall defect noted. The wall defect is given placard #3 for photography purposes. The lavatory floor is vinyl covered, the walls are ceramic tiled to approx. 5'0" from the floor up and the remainder of the walls are sheet rocked. The interior of the lavatory is rectangular in shape having the overall dimensions of 6'0" north to south and 8'8" east to west. On the lavatory floor are two articles of clothing. Located near the lavatory door is a dark colored, hooded jacket. To the west of the jacket is a tan or taupe colored trench coat. On the west interior wall of the lavatory is a stainless steel sink and wheelchair accessible commode. Along the south wall near the sink is a plastic trash container with a disposal bag inside of it. Nothing else is noted within the lavatory.

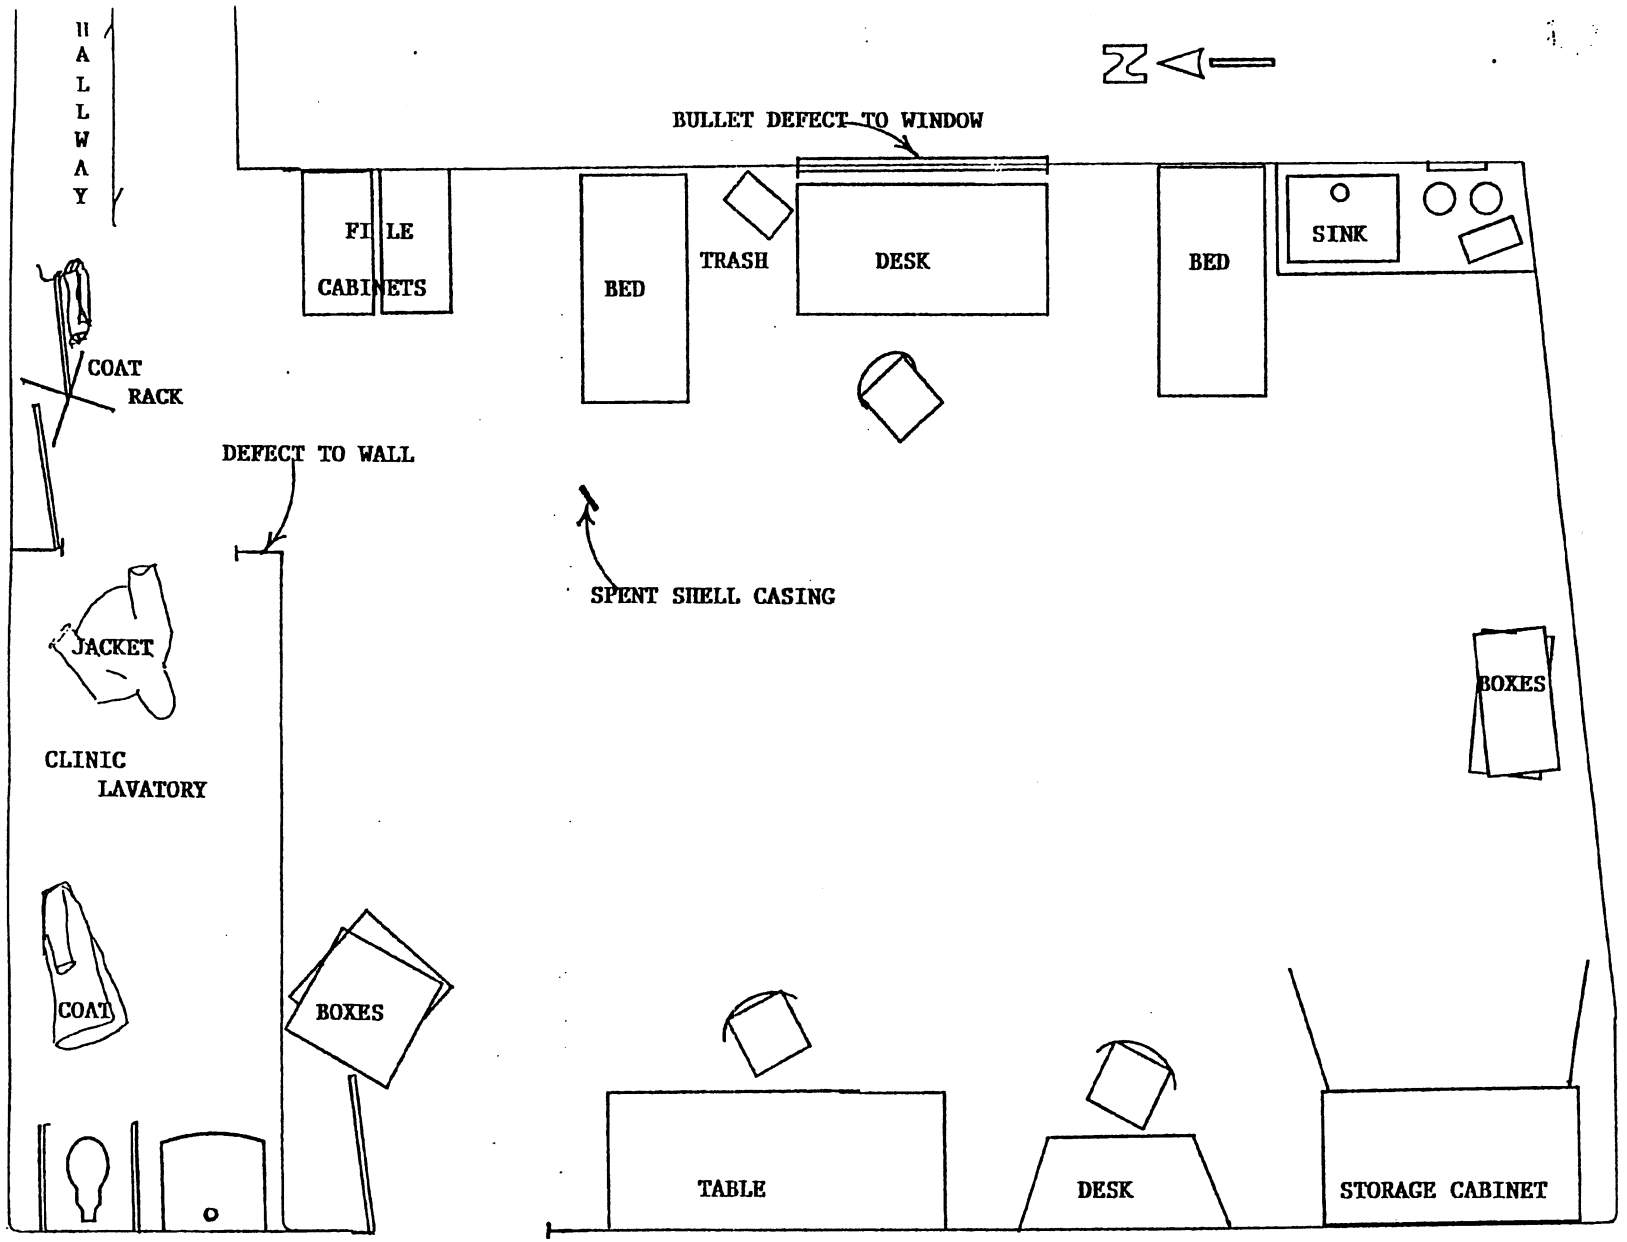

Visual description of the interior of the ADM-1 (Assistant Principles Office).

The entrance door to the ADM-1 office faces to the south and is located on the south wall in the southwest corner of the room. This office is square is shape and measures 16'8" north to south and 11'6" east to west. The door opens from right to left and is open at the time of the documentation. Viewing the interior of the office in a counter clockwise motion it is noted that the interior walls of the office are of sheetrock and are painted. The interior south wall next to the door jam has a light switch. The ceiling lights are on. Below the light switch and to the east of it, is a bullet defect. This bullet defect is located 3'5" up from the carpeted floor and 7'0" west of the east interior wall. This defect was caused by the entry of a projectile which penetrated the wall from the hallway. There is gypsum debris on the carpeted flooring below the defect. The interior south wall is void on any articles. From the southeast corner of the office north along the east wall is a circular table. The northwest of the center of the table is an office chair which is facing to the southwest. North of the table along the east wall is a plastic file container, two book shelves followed by another plastic file container. The northeast corner of the office is void of any articles. Along the north interior wall are two - two drawer file cabinets. West of the file cabinets is a office computer/work station counter top. The station counter top continues from the file cabinets to the northwest corner of the office and then south along the west wall to it's confluence with a work peninsula which runs perpendicular to the west wall. The counter top of the computer/work station contains computer/telephone equipment, work products and miscellaneous personal items. Approx. in the center of the work station area is an office chair which is facing to the west. On the west wall above the peninsula, is a bullet defect. The bullet defect is located 2'7" above the carpeted floor and 6'1" north of the south interior wall. This defect appears to be from the same projectile which exited the south wall near the light switch. At the south side of the peninsula there are two office type chairs which are facing to the north.

CRIE

Information Received

On 042099 at about 1415 hours I met Inv. Moomaw in the Swedish Medical Center Emergency section where he informed me that a shooting had occurred at Columbine High School in Jefferson County. Inv.'s Moomaw, Gee, Beichl, and Mundorf were present and I was requested to standby to receive evidence from the living victim's which were being transported to the hospital. At about 1428 hours I secured "Room #3", an equipment storage room, outside the trauma center main doors, for evidence storage. I kept the door locked and took custody of the keys from the nurse's station. I also posted a sign on the door instructing that there was no entry allowed by order of the Sheriff's Office. Yellow crime scene tape was taped across the upper part of the entry way. SLT Sprigg arrived a short time later to assist me with the collection of the evidence.

Either SLT Sprigg or I maintained a presence in the hallway outside room #3.

Receiving Evidence

At about 1435 hours I received custody of four white plastic bags individually containing the clothing and personal effects of the following individuals:

1. Richard Raymond Castaldo
2. Valarie Schnurr
3. Sean T. Graves

After taking the evidence to the secure evidence room, SLT Sprigg and I repackaged the clothing and personal effects into paper bags. Each of the white plastic bags was individually separated into a paper bag as well.

At about 1448 hours I took custody of a 9mm fully jacketed bullet from Det. Forrington from the Englewood Police Department. Det Forrington told me that the bullet had been recovered from the back of Mr. Castaldo. The bullet was enclosed in a semi-clear plastic container with a white hospital label showing the name of Mr. Castaldo. After taking the bullet to the secure evidence room I repackaged the bullet by wrapping it in tissue paper to protect any rifling marks and enclosed it in a separate plastic container which was sealed with evidence tape and my initials. Both plastic containers (one containing the bullet and the original container) were placed in a paper evidence bag.

At about 1520 hours I was contacted by hospital trauma nurse Kari Goerke and told that hospital staff needed access to the equipment in the evidence storage room. Mrs. Goerke offered her office as a secure storage area. We transported the evidence to office 3107 (Mrs. Goerke's personal office) at about 1535 hours. I took custody of her key.

Either SLT Sprigg or I maintained a physical presence in the office until we departed the scene.

At about 1611 hours I was contacted by Sgt. Beatty by pager. After returning the call, Sgt. Beatty told me that SLT Sprigg and I were to depart the hospital and return to the ACSO crime lab to secure the evidence. We were then to depart the crime lab for Columbine High School to assist the Jefferson County Sheriff's Office Crime Lab in processing the crime scene at the school. I informed SGT. Beatty that we had not collected all of the projectiles thought to be present in the victim's and he said that an investigator would be responsible for collecting any subsequent evidence from the hospital. SLT Sprigg and I departed the hospital, after returning the office key to Mrs. Goerke, at about 1628 hours. All evidence was transported in my vehicle. SLT Sprigg and I arrived at about 1640 hours and I secured the evidence in the ACSO crime lab.

After collecting needed equipment SLT Sprigg and I departed separately for Columbine High School at about 1657 hours.

I arrived on scene at about 1728 hours. Traffic was extremely congested along Bowles Avenue due to road closures and responding emergency vehicles, civilians, and the media. Upon arriving I was met and briefed by Jefferson County Sheriff's Office SWAT member Helgesen who told me that there were at least two bodies outside, one teacher in a hallway, and multiple bodies in the library. Dep. Helgesen also stated that there were several live IED's (improvised explosive devices), mostly pipe bombs, located throughout the building and crime lab entry was denied until the devices were rendered safe. I proceeded to the Arapahoe County Sheriff's Office Mobile Command Post Vehicle to check in and await instructions.

At about 2000 hours multi-agency crime lab personnel assembled in a pavilion at the south end of Clement park for a debriefing by Sgt. West of the Jefferson County Sheriff's Office. Sgt. West gave us a general briefing on the events, what little was confirmed at that time, of the event. Sgt. West stated that bomb squad technicians from various agencies were in the process of searching for, and rendering safe, numerous devices throughout the school, parking lot, and outside areas of school property. Sgt. West said that crime scene processing would not commence until bomb squad technicians had cleared work areas through render safe procedures. Sgt. West said several devices (12-13) had been cleared from the school and two large devices were located in each of the suspect vehicles.

Sgt. West said that the first priority of the crime scene personnel was to process the scenes toward the victim's so that they could be removed and autopsied as soon as possible. Five teams of five members each were to be deployed inside the school for processing. It was agreed that processing would not be compromised (sped up) for the purpose of victim removal. At the time each team was ready for a victim to be removed, a

team of coroner's investigators, assisted by a pathologist, would examine the victims in place and handle the removal from the scene.

At 2101 hours Jefferson County Sheriff's Office Criminalist Loptein gave another briefing and asked each crime lab member to fill out a roster stating each member's expertise and contact information. Loptein informed us that approximately 30 IED's had been discovered in and around the school and was delaying our entry.

Technicians were also sending in a forward looking infra-red team (FLIR). One device had already deflagrated while being handled by ACSO bomb tech's so safety was of major concern.

At about 1550 hours I was told by Criminalist Loptein that I should clear the scene and report back at 0600 hours on 042199. I departed the scene at about 0003 hours on 042199.

I arrived on scene at about 0536 hours on 042199. I was assigned to team #1 and would be processing the central and east sides of the library. See Colorado Bureau of Investigation (CBI) Agent Goetz's report for other team member names, assignments, and actions taken. I was assigned to take measurements and produce sketches of evidence locations in our (Team #1) area of the library.

At about 1000 hours, myself and three other lab members were requested to enter the school with Jefferson County Sheriff's Office Crime Laboratory Supervisor Chris Andrist to document the victim positions, and general location surroundings, with video and still photography. The members included Chris Loptein, Jeffco (35mm), Tom Griffin; CBI crime lab (35mm), Bob Lloyd; Thornton Police Department (video), and myself (video). I began videotaping at about 1055 hours and concluded our documentation at about 1200 hours.

My action times are listed below. For complete action report of team #1 in general see Agent Goetz's report.

042199 arrive 0536 hours; depart 2127 hours.
042299 arrive 0800 hours; depart 1656 hours
042399 arrive 0753 hours; depart 1902 hours
042499 arrive 0759 hours; depart 1340 hours
042699 arrive 0726 hours; depart 2038 hours
042799 arrive 0659 hours; depart 1820 hours
042899 arrive 0708 hours; depart 1811 hours
042999 arrive 0748 hours; depart 1850 hours

I produced a total of fifty one (52) sketches of the library and adjoining areas. Sketches were continually added to throughout the processing. Sketches were not to scale and north was approximate.

Arapahoe County Sheriff's Office
Crime Laboratory Report
Homicide
Arapahoe County Case Number 99-16215
Jefferson County Case Number 99-7625
Senior Laboratory Technician Thomas W. Adair 74978

On 042299 Team #1 was assigned to process and document the hallway, five offices, conference room, and emergency exit of the north west corner of the library, as well as the staff service area at the north end of the main library. I began documenting the area through sketches. Placards mounted to the walls outside each office designated the offices as "LMC 1", "LMC 2", "LMC 3", "LMC 4", and "LMC 5". The rest of the area was comprised of a conference room and hallway. The following observations were made in each room or hallway. See sketch for measurements of items and bullet holes. Bullet holes were given an alpha-numeric designation by Criminalist Loptein (ex. BH-1). All office entry doors were on the east side of each office.

LMC-1:

LMC-1 was the southern most office. The office door was closed and locked upon our arrival on scene. The office had a long desk that ran the length of the south and west walls. Bookshelves took up much of the space on the north wall. There were windows on the south and west walls of the office. No evidence was located in office LMC-1.

LMC-2:

LMC-2 is directly north of LMC-1 and has two windows along the west wall. The office door was closed and locked upon our arrival on scene. A rectangular wooden table and four chairs were in the center of the room. A small computer table was against the east wall to the south of the office entry door. A small book cart on casters was against the north wall just west of the entry. There was no evidence located in LMC-2.

LMC-3:

LMC-3 is directly north of LMC-2 and has one window along the west wall. The office door was closed and locked upon our arrival on scene. A long work table was attached to the south wall. A chair and file cabinet were located in the south west corner of the room. A row of staggered bookshelves was attached to the north wall west of the entry door. An apparent bullet impact defect was observed in the north wall above the door. A bullet fragment (item #763) was recovered from that location (corresponds to BH-6 in LMC-4).

LMC-4:

LMC-4 is directly north of LMC-3 and has one window on the west wall. A small table with a television on it was located in the north west corner of the office. There was a rectangular wooden conference table and six chairs in the center of the room. There was loose wallboard debris over the top of the table. The debris appears to have come from three bullets penetrating the north wall of the office, passing over the table, and entering

the south wall of the office. The south wall of the office contained three bullet holes given the designations BH-4, BH-5, and BH-6. A bullet fragment (item #761) was recovered from the hole designated BH-4 (corresponds to BH-1 in LMC-4). Another bullet fragment (item #762) was recovered from the hole designated BH-5 (corresponds to BH-3 in LMC-4). The bullet fragment recovered from BH-6 was actually recovered from LMC-3.

The north wall of the office also contained three apparent bullet holes designated BH-1, BH-2, and BH-3 (see sketch). There were no bullet fragments associated with these holes.

LMC-5:

LMC-5 is the northern most office in the northwest library hallway. LMC-5 has one window on the west wall and one on the north wall. A small wood table, black metal audio/visual cart, and chair were located against the south wall of the office. A green metal audio/visual cart was against the east wall directly south of the entrance.

There were seven apparent bullet holes in the south wall of LMC-5. The holes were labeled BH-6 (corresponds to BH-1 in LMC-4), BH-7, BH-8 (corresponding to BH-3 in LMC-4), BH-9 (corresponds to BH-2 in LMC-4), BH-10. BH-7 contained the copper jacketing associated with lead fragment item #761. BH-10 contained two copper jackets (one associated with item #762) and one lead bullet fragment (item #767). There were also numerous secondary missile impact sites in the area of BH-10 most likely caused by small glass fragments projected towards the wall, with the bullet fragments, from the north window..

The window on the north wall had five bullet holes through it (three through the glass, two through the frame). No bullet fragments were located in these five holes. The holes were labeled BH-1 (corresponds to item #764), BH-2 (corresponds to BH-6 and BH-7), BH-3 (corresponds to BH-10), BH-4 (corresponds to BH-8 and BH-10), and BH-5 (corresponds to BH-9). Criminalist Loptein and I determined through glass fracture analysis that the sequencing for the bullet holes in the north window glass of LMC-5 were as follows:

1. BH-2
2. BH-3
3. BH-4

The following chart explains bullet hole correspondance for LMC-5 through LMC-3 going from north to south

Ext.North	LMC-5N	LMC-5S	LMC-4N	LMC-4S	LMC-3N
BH-1	BH-1	ON FLOOR ITEM#764			
BH-2	BH-2	BH-6/BH-7	BH-1	BH-4	IN WALL (#761)
BH-3	BH-3	BH-10			
BH-4	BH-4	BH-8/BH-10	BH-3	BH-5	IN WALL (#762)
BH-5	BH-5	BH-9	BH-2	BH-6	IN WALL (#763)

Exterior North Library Wall:

The five bullet holes in the north window and frame of LMC-5 were also documented from the outside wall. In addition two bullet impact sites were located in the north wall between the north window of LMC-5 and the emergency exit door at the north end of the library hallway (see sketch for measurements).

Northwest Hallway:

There were several bullet impact sites in the hallway at the northwest corner of the library. All of the bullet trajectories were traveling essentially south and appeared to be coming from law enforcement. A wooden 20 drawer map storage cabinet, located against the east hallway wall directly south of the door leading to the "rebel news" studio, had three bullet impact holes on the north side of the cabinet. Two of the bullets (BH-1 and BH-3) were recovered inside the cabinet (see sketch). One bullet (item #757) was embedded in the wood of the south edge of drawer #10 from the top and was facing south. One bullet (item #755) traveled through the map cabinet (BH-2 to BH-4), exited the map cabinet then entered the rear of the television cabinet to the south of the map cabinet. Upon making contact with the front frame of the television on the west side, the bullet made a dramatic turn to the east and exited between the plastic face and glass screen of the television set. The bullet then traveled east and struck the east wall approximately three inches to the north of the wall mounted fire extinguisher cabinet, at a height of 3'9". The bullet was recovered from the floor beneath the television cart (see sketch). Criminalist Loptein and I observed wall board material on the nose of the bullet at the time of collection.

At the south end of the hallway, on the east wall separating the hallway from the conference room, there were several bullet impact sites. One bullet impacted the upper northern frame of a chair (CH1) along the east wall. The bullet impact (designated impact #1) sent smaller pieces of metal across the wall and through a picture frame on the east

wall at wall at the south end (see photos and sketch). A second bullet impact (designated impact #2) struck the wall board to the south of CH1 and impacted below the computer table (see sketch). That bullet was recovered by team #2. The third bullet impact (designated impact #3) struck the wood corner molding at the south end of the east wall. The projectile then traveled south and hit a Macintosh computer monitor on the computer table(see sketch). All three impact sites were tested with sodium rhodizinate with positive results. A fourth projectile also passed through the lower back (south) partition under the computer table and was designated projectile hole #1A by team #2. A minimum of 15 projectiles were determined to have been fired from the north end of the library, down through the northwest hallway and offices towards the south. These projectiles were most likely the result of cover fire by law enforcement.

Conference Room:

The conference room is located on the south East end of the hallway and directly west of the library magazine storage room. The conference room consists of a large wood top conference table, surrounded by six padded chairs, in the center of the room. A small table was to the west of the entrance along the north wall of the conference room. A large paper writing pad on an easel was located in the southeast corner of the room. There was a bullet hole in the north wall of the conference room on the west edge of the door frame. The trajectory of the bullet was traveling essentially south into the conference room. As the bullet passed through the wall it fragmented. Several copper and lead fragments were found on the floor, table top, chairs (Chairs "A" and "D") and the south wall (see sketch). A bullet hole was located in the floor molding of the south wall. The largest of the lead fragments (item #752) was located in south wall under the easel. An apparent bullet swipe was found on the conference room floor in the southeast quadrant of the room. The swipe was in line with the bullet hole impact area on the floor molding. Agent Ritter (CBI) tested the area with sodium rhodizinate with positive results.

Magazine Storage Room:

The magazine storage room is located directly east of the library conference room. Entry into the room can be gained by either the conference room or the staff service area. The room is comprised of two rows of magazine stacks as well as shelving on the south and west walls. No evidence was located in this room. Both doors were open and unlocked upon our arrival.

Staff Service Area:

The staff service area is located at the northern end of the main library. The area is comprised of a large wood counter top work area where students bring books to be checked out by library staff members. There are two computer terminals centered in the service counter which faces south. Upon my inspection of the area I observed that an under the counter telephone (presumably for staff use) was off the hook with the receiver on the floor behind the counter. One of the blue cushioned bar stool style chairs from the computer terminal area had apparent bullet hole damage to it (see Agent Ritter;CBI report for trajectories). The chair was laying on top of the counter to the east of the eastern most computer terminal. The computer monitor was off center of the CPU to the west and had scuff marks on the front of it indicating that the chair had been thrown onto the counter striking the computer monitor.

A small rectangular wooden printer stand cabinet is located at the north west end of the staff service counter. The cabinet is open to the east and 100 sheet packs of white (8 1/2"x11") printer paper was stored under the counter on the staff (east) side. A computer printer (HP Laser Jet 5si/mx) was essentially centered on top of the cabinet. There were at least 14 shotgun pellet impact sites on the wood frame of the cabinet, some causing multiple impact sites at the ricocheted (see Agent Ritter; CBI report for detail). At least three pellets also struck the east side of the upper northwest paper bundle (item #735). No on site examination, or extraction of pellets was performed on scene. One pellet (item #699) was recovered from the lower paper tray of the HP printer east side. Five other pellet impact sites were located on the west side wall of the western most staff seating area (access panel location) directly south of the printer cabinet. Additional items of evidence were recovered from the floor and counter top areas of the staff service section (see evidence report).

CRIME LAB PROGRESS REPORT — **CR # 99-16215**
Assist to Outside Agency – Jefferson County Sheriff's Dept — JCSD # 99-7625
Homicide – Columbine High School
Sr. Lab Technician Laura A. DeLong #9719 — Date of Report: 12/6/99

From November 15-17, 1999, I modified the diagram of the library to reflect corrections and additions as specified by Senior Lab Technician Tom Adair for Team 1 in the east side of the library. Adair told me the corrections and additions were based on review of scene photos and his original field notes. Adair provided additional notes and sketches to me at this time.

Items that were specifically measured are marked with an "X" according to their layer color for "floor", "elevated", or "ceiling". Those items that did not have specific measurements are now marked with an "O" according to their layer color to indicate an approximate location.

I added a baseline indicator from the north end of Row 1 (baseline) to the intersection of the Main baseline.

603 – move to W side trophy case (pos/neg mix-up in coordinates)

658 – remove duplicate by main entry

659 – remove duplicate by main entry

660- move - under table (mis-read Adair's notes)

677 - move by B3, corner of T6 (mis-read Adair's notes)

680 – change layer to "elevated"

683 – delete duplicate by T5 (should be by T3)

695 – move to positive (north) side of base line (pos/neg mix-up in coordinates) - (photo T1-11-7)

696 – move north of baseline (pos/neg mix-up)

697 – move north of baseline (pos/neg mix-up)

709 – by R3C ok, remove "?"

729 – change layer – backpack cut off victim

730 – move to floor point layer

735, 740 – add "O" for approximate location

738 – add number for stool, bullet impact site - on check out counter

751 – move (wrong chair) elevated in chair, next to 753

752 – duplicate of 804 – use both numbers per Adair

757 – move to south end of cabinet (originally just placed on the cabinet arbitrarily)

758 – move to south end of cabinet

761hole, 762 hole, 763 hole – added in wall bewteen LMC4/LMC5

762 – move closer to door with 763

763 – added – in wall between LMC3/LMC4 (east of doorknob pad)

765 – move - in SW corner, not NW corner

766 – move - in south wall of LMC 5 per Adair's elevation sketch

767 – move - in south wall LMC 5 per Adair's elevation sketch

768 – change to "elevated" layer

770 – added "O" to indicate approximate location

771 – added "O" to indicate approximate location

775 – add to area of Row 3 C (north section in row)

776 – (add) elevated, R2B, NW corner, blood

777 – (add) SGW on floor SE corner R3c (near 709)

779 – (add) W of R3c, north end (photo T1-15-10)

781 – (add) impact marks on center support of Table 1

784 – change to "elevated" layer, unspecified location of chair 9B

785 – (add) on chair, north end Row 1 - lead frag in unspecified location (photo T1-16-8)

786 - (add) R3A NE corner, "elevated" blood

788 – "X" added with exact location

789 – "X" added with exact location

790 - "X" added with exact location

791 – copper and lead fragments – 9'3" and 9'4" from south wall, but no distance from wall or R1 baseline

JC-001-012635

792 – "X" added with exact location

793 - "X" added with exact location

794 - "X" added with exact location

795 - "X" added with exact location (794 and 795 were in reverse bookshelf segments before)

796 – move around corner and take off "?" – elevated "O" on west panel (photo T1-17-7)

797 – (add) inside panel below 803 with "O" for approximate location

798 – (add) inside panel below 803 with "O" for approximate location

799 – (add) inside panel below 803 with "O" for approximate location

800 – (add) inside panel below 803 - into pillar, but below counter top level

801 – (add) elevated back built-in book case, east end – copper jacket fragment (per photo review)

803 – (add) video, elevated with "O" for approximate location

804 – (add) copper jacket embedded in wall (same as 752 location)

1058 – added "O" to indicate approximate position

1059 – added "O" to indicate approximate position

The chair at the north end of Row 1 was rotated slightly per the photographic view.

No "X"s or "O"s were added to the evidence in and around the bodies of Harris and Klebold due to space constraints. Refer to the evidence logs for these locations.

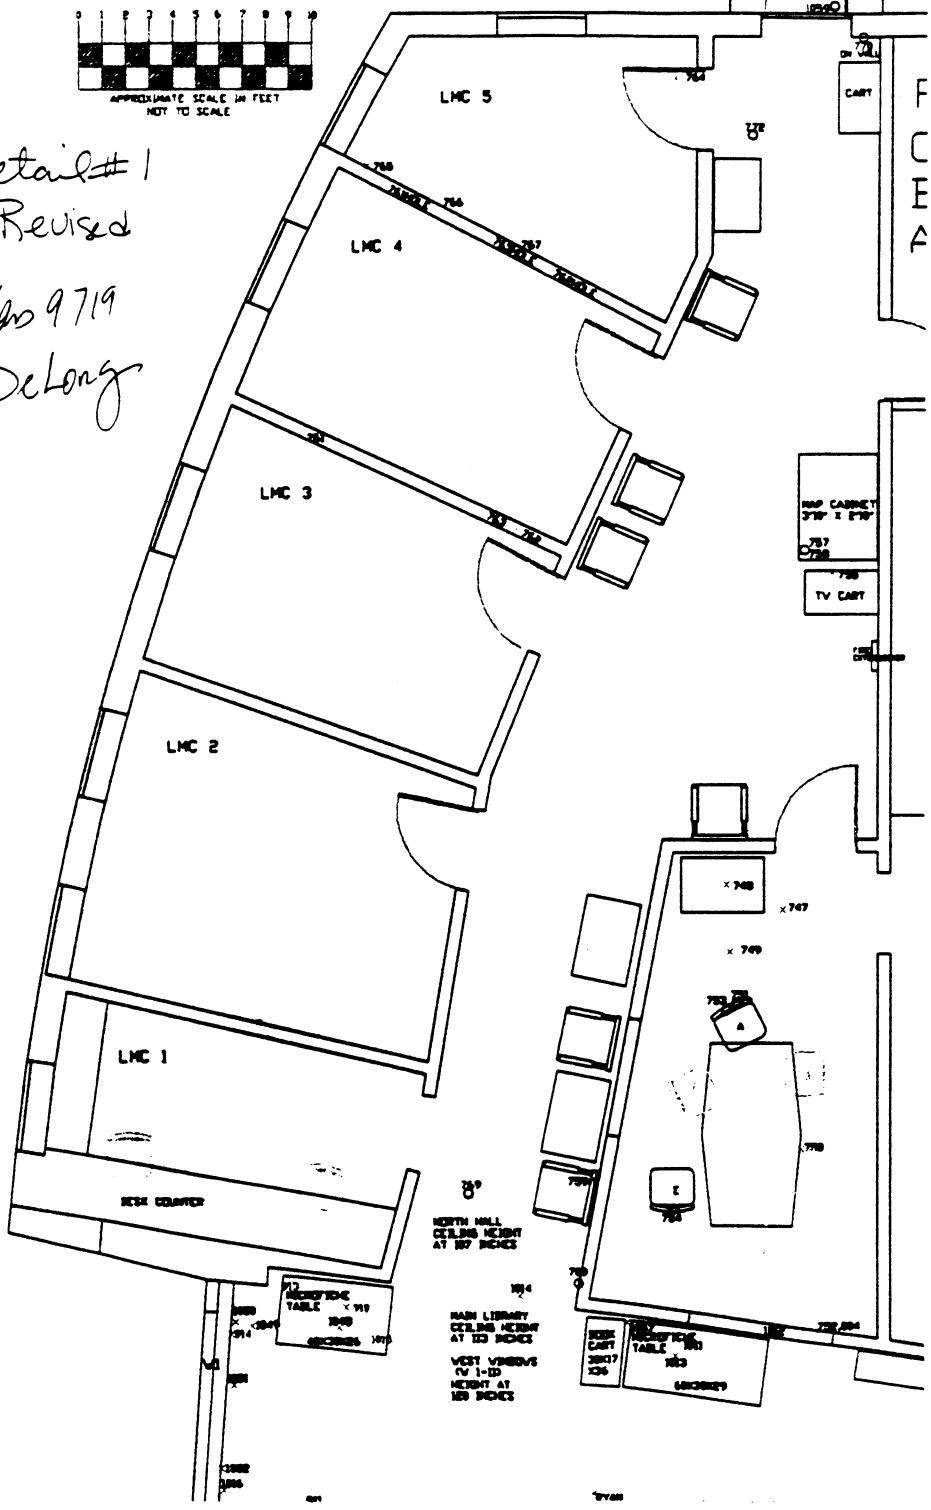

On 12/6/99, I copied the updated drawing file and mailed the copy to Paula Ernst of the FBI at the following address:

Re: Columbine High School Library
Littleton, CO

Dear Paula,

Enclosed is an updated disk for the evidence locations in Columbine Library.

Tom Adair specified the changes for the drawing after reviewing scene photos for Team One (1) at the Colorado Bureau of Investigation. I moved 15 items, deleted three duplicate numbers, changed the point layers on four items, added 20 item numbers, and added "X"s or "O"s on at least 10 items to locate the items better.

The items that needed to be moved were because of three reasons: 1) guestimated location pending further information from Adair, 2) transposed postive/negative on coordinates, and 3) mis-read information.

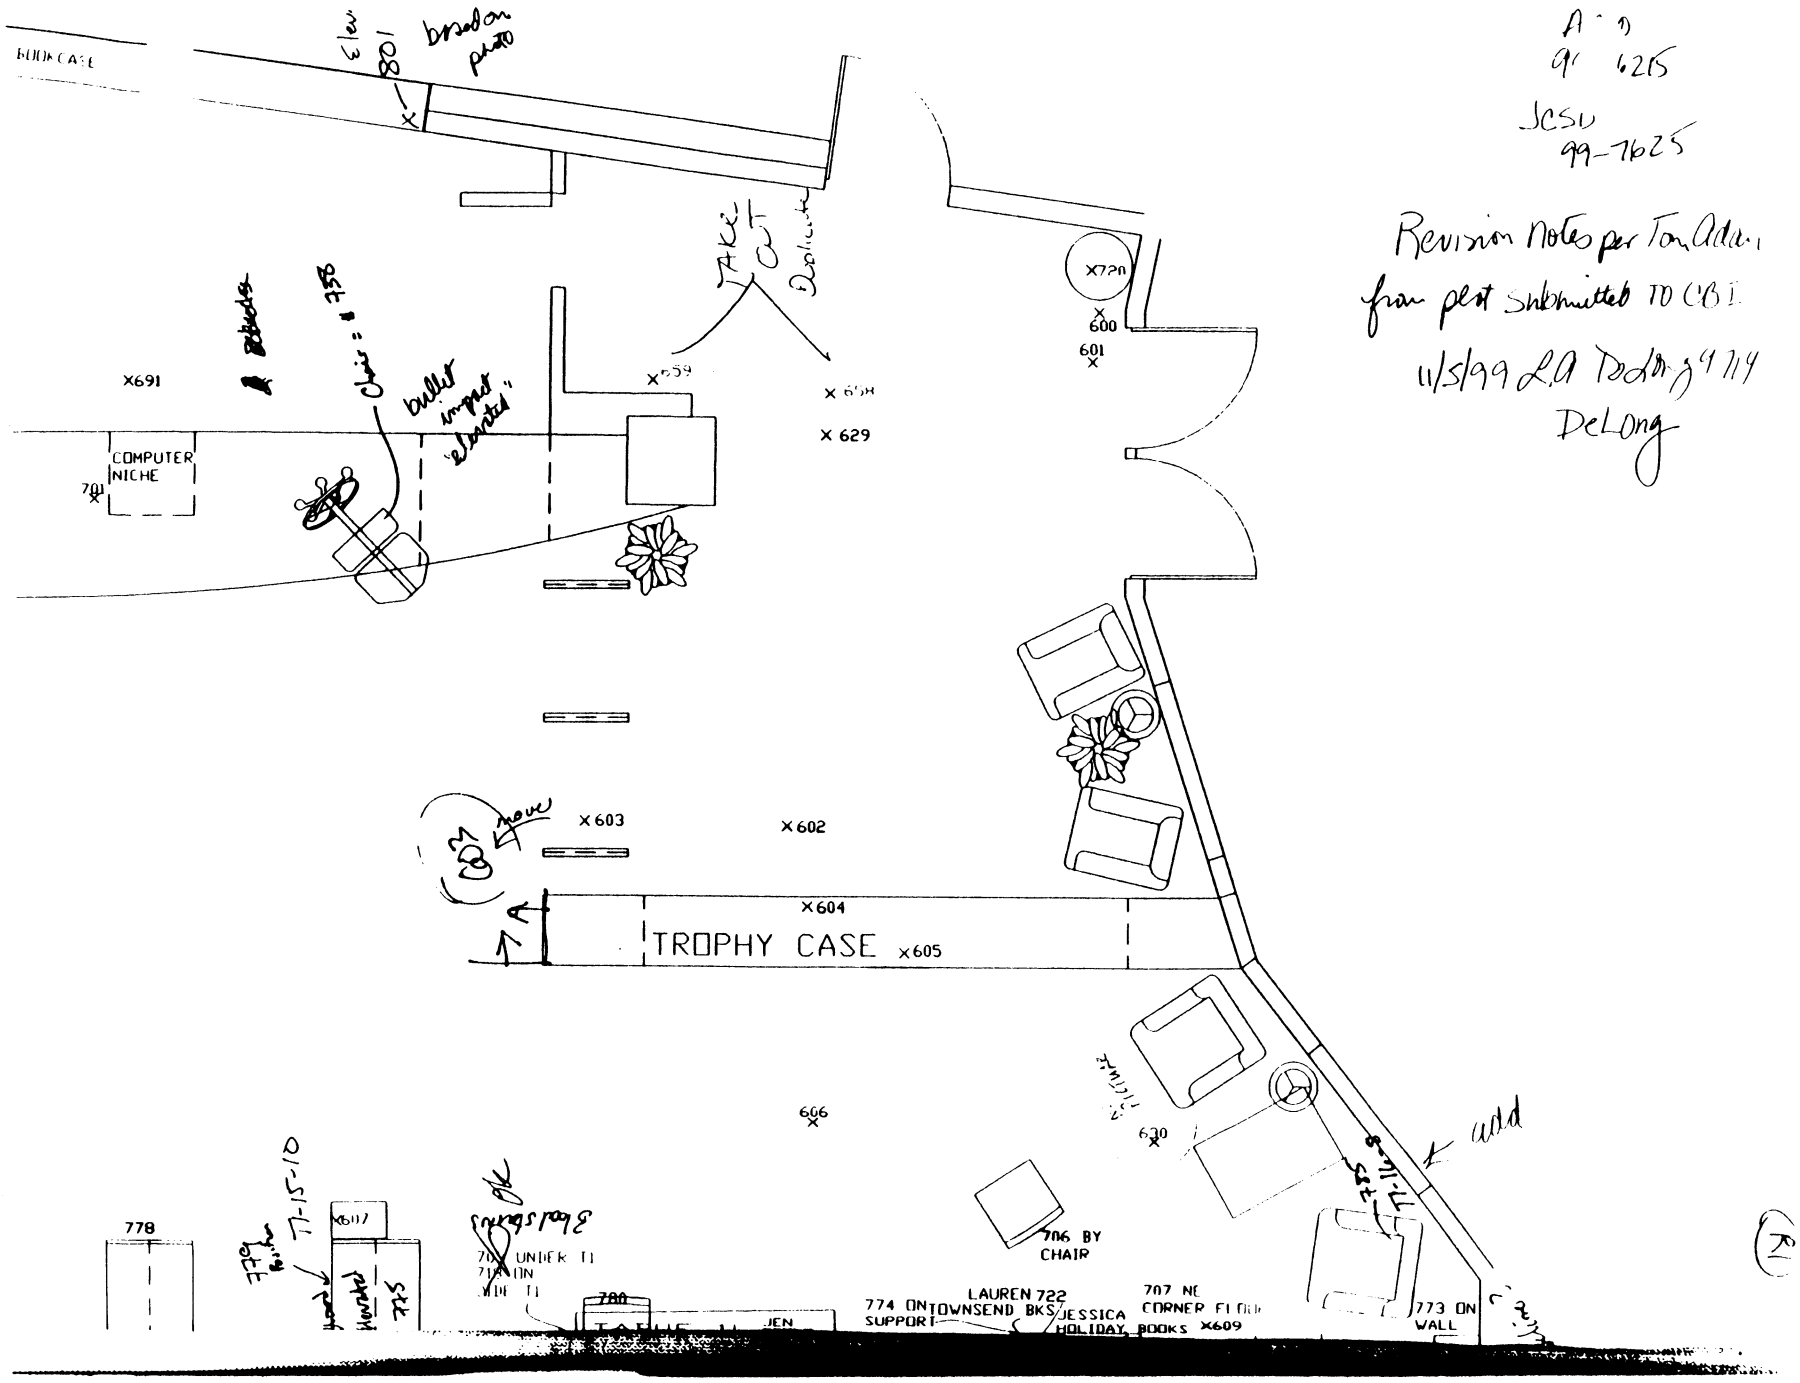

Most of the added item numbers were from elevation sketches not previously provided to me.

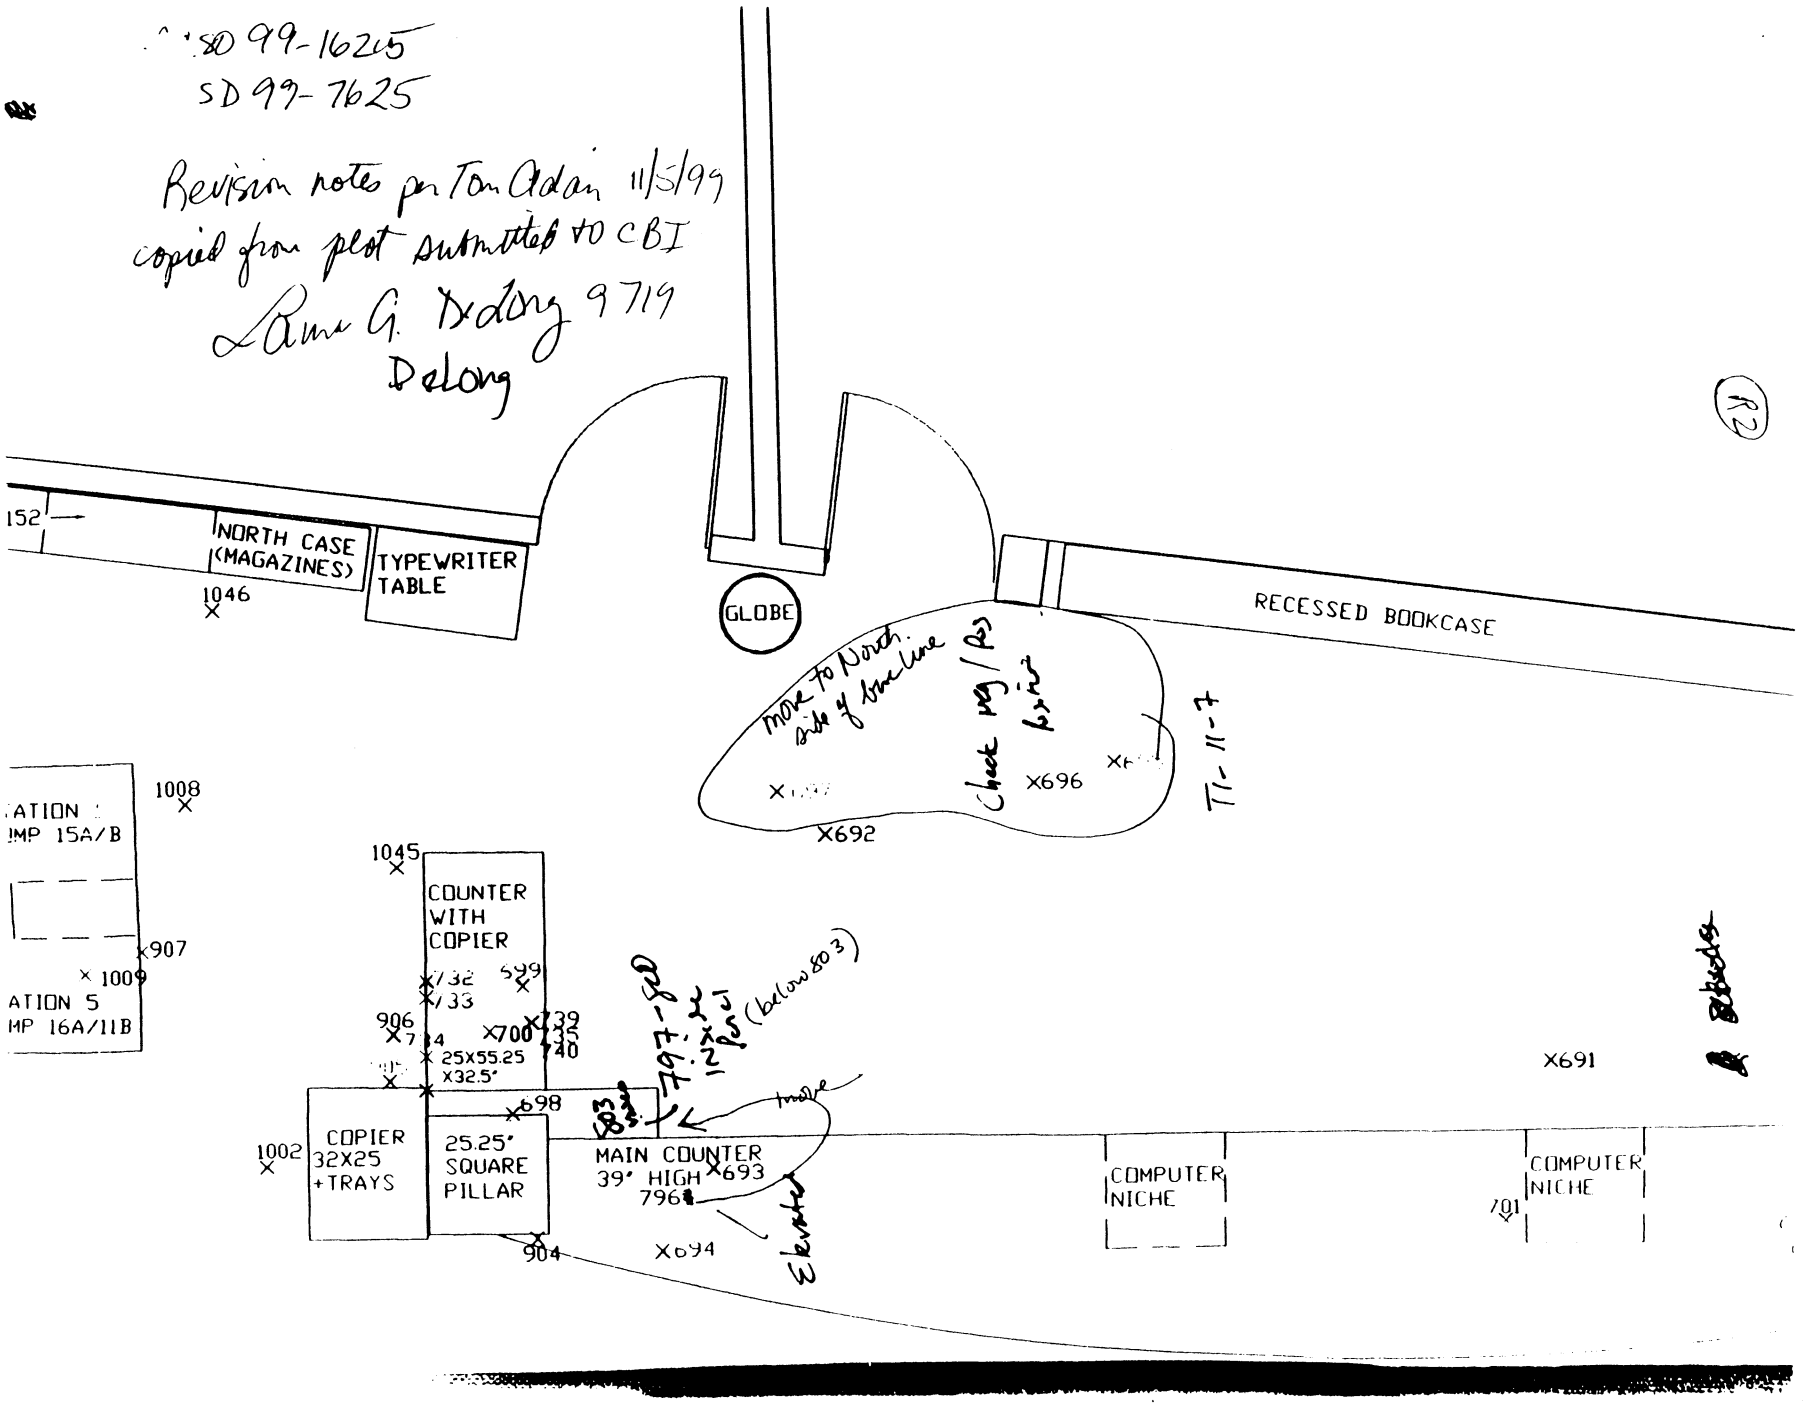

Attached is a copy of my report detailing the changes.

Respectfully submitted,

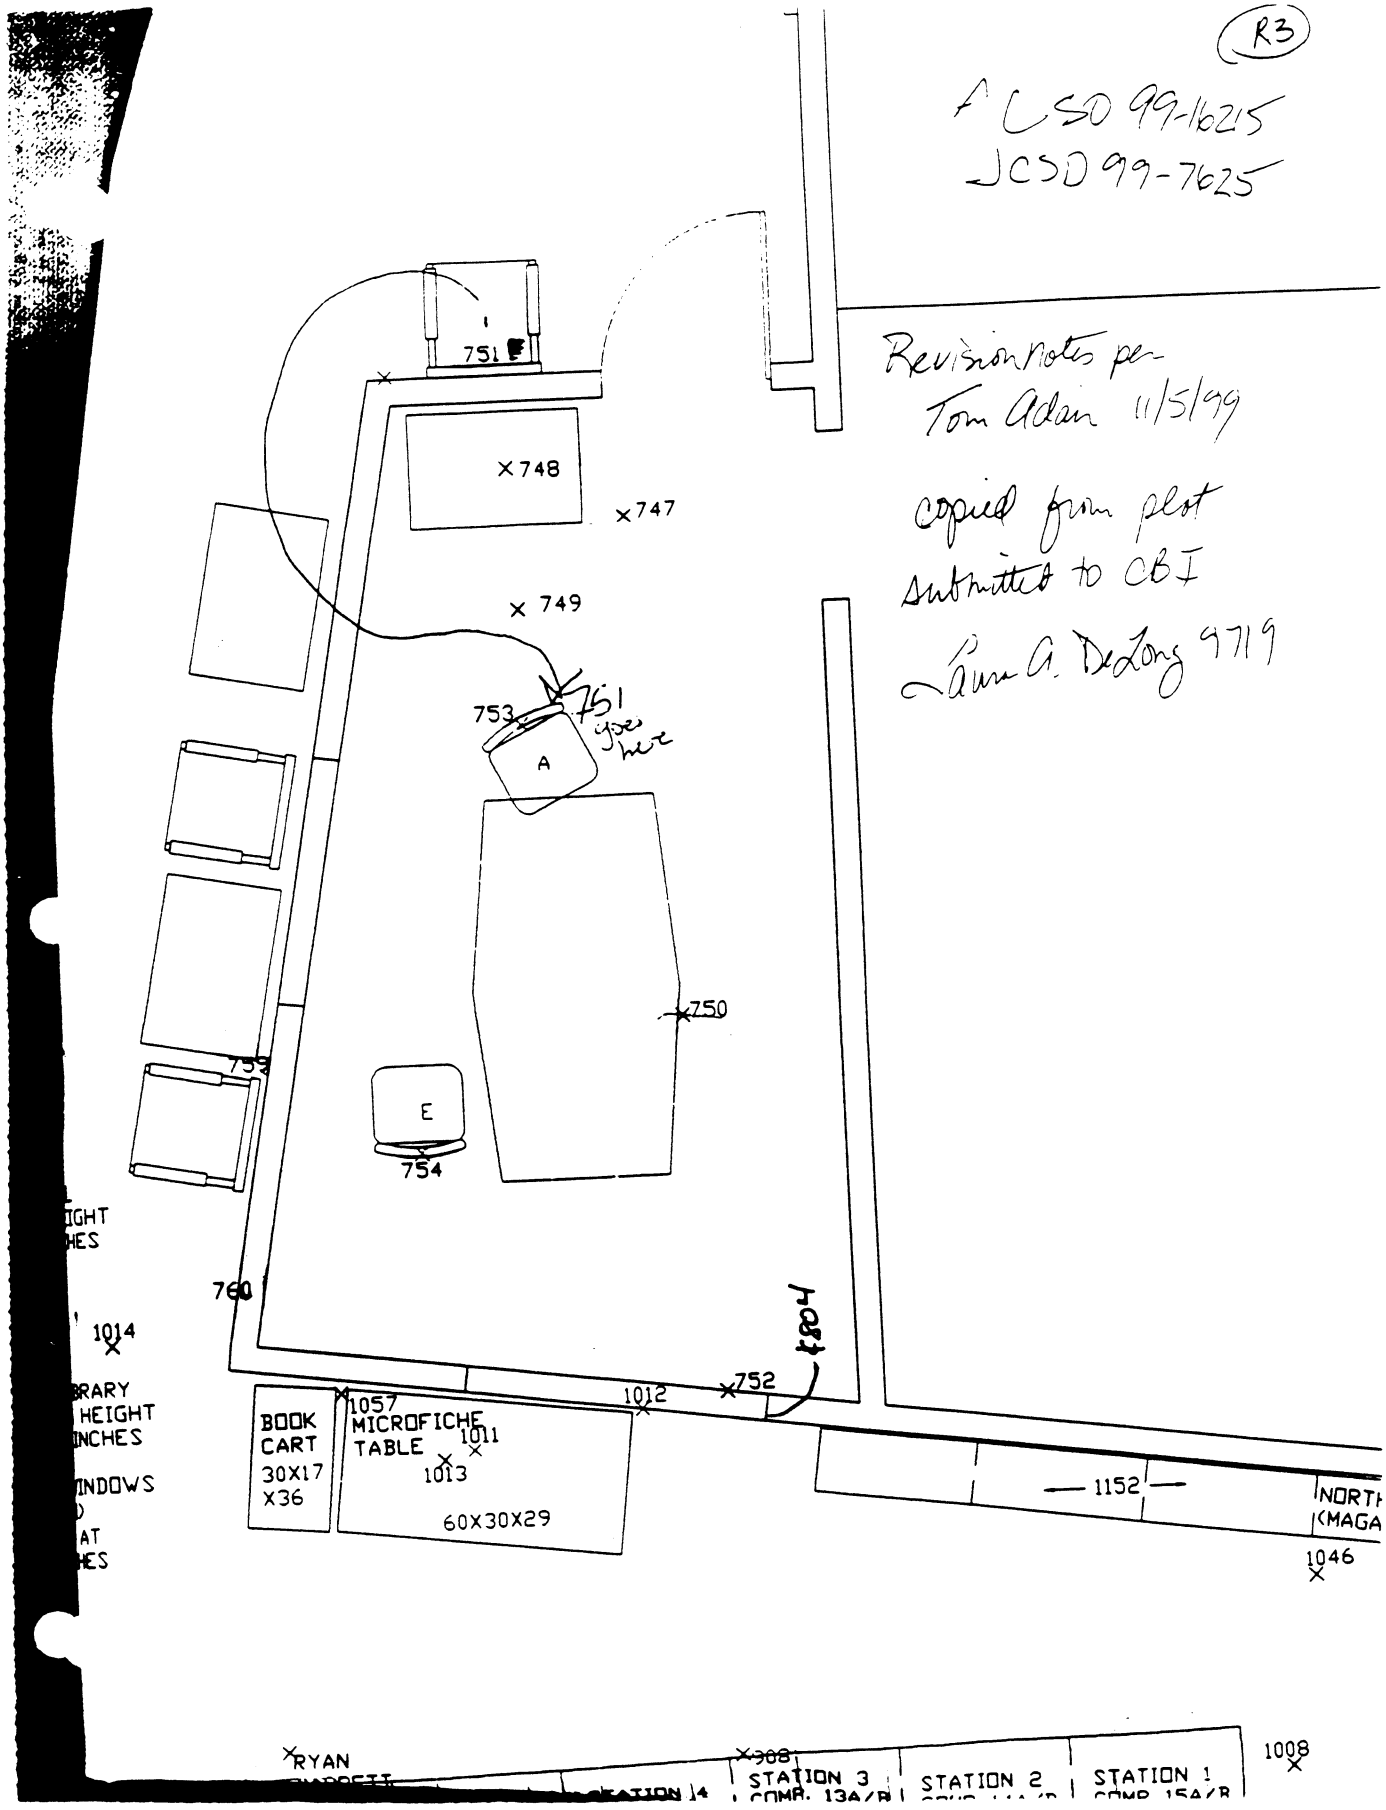

Laura A. DeLong
Sr. Lab Technician

ARAPAHOE COUNTY SHERIFF'S OFFICE

CRIME LAB PROGRESS REPORT — ACSO CR # 99-16215
ASSIST TO OUTSIDE AGENCY - JEFFERSON COUNTY SO — JCSD 99-7625
HOMICIDE - 6201 S. PIERCE, COLUMBINE HIGH SCHOOL
SENIOR LAB TECH LAURA A. DELONG #9719 — DATE OF REPORT: 6/30/99

On 4/20/99 at about 1445 hours I arrived at Littleton Porter Hospital to photograph victims from the shooting at Columbine High School. I was met by ACSO Investigators James Rasmussen, Kevin Heaton, Bruce Isaacson and Paul Goodman, and Detectives Michael Greenwell and George McGlynn of Lakewood PD.

I first photographed **Stephanie Munson, W/F, DOB 052682**, who had a bullet wound through and through at the top of her left ankle.

At about 1450 hours I photographed **Stephen "Austin" Eubanks, W/M, DOB 100781**, with wounds on the left knee, right little finger, and stitched right index finger.

At 1455 hours I photographed **Adam Kyler, W/M, DOB 062482**, who was in a neck brace. He stated he was hit by some object and not any bullets. There were no specific wounds to be photographed.

At 1520 hours I returned to the ACSO Lab to process the victim photographs.

At 1630 hours I was assigned to assist in processing the scene at Columbine High School at 6201 S. Pierce. I reported to Sgt. Beatty at the Command Post about 1500 hours. He informed me there would be a briefing at 1800 hours.

At about 1815 hours Chris Andrist of Jefferson County Sheriff's Office advised us that any pink flags found in the building were put there by bomb squad personnel. The pink flags were to indicate where bomb parts were or explosive devices had been and taken away to make safe.

At 1947 hours, Sgt. Randy West of JCSD gave another briefing to announce that SWAT and bomb personnel were still working on making devices safe, and making another sweep of the building. Nancy Bodelson, the Jefferson County Coroner would be in charge of identifying the bodies and we were not to touch the bodies.

At about 2100 hours, another briefing was held and we were told that more devices had been found in the school and in some cars so we would not be needed until the next day. I cleared the scene at about 2124 hours and then got paged to return at 2142 hours. I returned and was sent home again at 2305 hours.

On 04/21/99 at 0600 hours I returned to the Command Post parked near the school. Teams were assigned at about 0800 hours. I was assigned to Team Two which would be processing the west side of the library. Team Two was initially comprised of the following personnel:

- Tom J. Griffin, Agent - CBI Denver (team leader)
- Alan S. Hammond, Agent - CBI Denver
- Richard Swanson, Agent - CBI Denver
- James R. Jennings, Forensic Photographer - Jefferson County Sheriff's Department
- Jennifer Savage, Deputy - JCSD
- and myself, Laura A. DeLong, Senior Lab Technician - Arapahoe County Sheriff's Office

The following persons were later added to the team:

- Tom Acierno, Deputy - JCSD
- Steve Stalter, Deputy - JCSD
- Peggy Rowlett, Detective - Wheat Ridge Police Department

The school and grounds were still being cleared of explosive devices at this time. Some ammunition was found on Pierce Street in front of the school so I joined a search line at about 0845 hours to see if any other potential evidence could be found. I did not find anything related to the crime.

At 1100 hours I assisted in getting evidence packaging materials ready at the inflated hazmat structure located just outside the main entrance of the school.

I was finally cleared for entry in the school building and was given a tour of the whole scene at 1350 hours on 4/21/99. I brought my equipment into the building at about 1423 hours to commence processing the scene.

I worked in tandem with Senior Lab Technician Tom Adair, who was part of Team One and sketching the diagram for the east side of the library. We agreed to label the west windows from 1 through 10 starting from the north and continuing southward, with "W 1" being in the northwest corner and "W 10" being in the southwest corner. The south windows were labeled 11 through 17 starting from the west and continuing to the east, with "W 11" being in the southwest corner and "W 17" being in the southeast corner.

The tables were also numbered. Tables 1 through 6 were in the eastern third of the library. Tables 7 through 14 were in the center third of the library. Tables 15 through 20 were in the western third of the library.

The rows of book cases running north/south were numbered, starting with "Row 1" along the east wall of the library. Rows 2, 3, and 4 were located to the west of tables #1-6. Rows 5, 6, and 7 were located to the west of tables #7-14. I designated the south sections of the book cases as Rows 5A and 6A. I designated the north sections of the book cases as Rows 5B and 6B. Row 8 was along the west wall below windows #7-10. There was also a book case for magazines along the north wall of the library (Team Two side) and a built-in book case behind the check-out desk (Team One side), but these were not numbered.

The basis for measuring were several base-lines. The main east/west baseline was set at the south side of the center island, which also lined up with the south side of the trophy case. This was arbitrarily chosen since it was one of the few unobstructed sight lines in the library. The main "EW Base" was located 47'10" away from the south wall. Two other east/west base-lines were laid out with tape measures taped to the carpet at two 10-foot intervals to the north of the main east/west base-line. The base referred to as "EW+10" runs between the two computer tables and just in front of the pillar at the southwest corner of the check-out desk (also referred to as the staff service counter) and was located 57'10" from the south wall. The base referred to as "EW+20" runs between the north wall and the northern computer table, and was located 67'10" from the south wall.

The north/south base-lines were also arbitrarily chosen based on the least obstructed sight-lines. The base-line referred to as "18-2 Base" was 18'2" east of the windows on the main E/W base. This ran roughly from the center of the southern computer table, past the southwest corner of Table #16, under Table #15, and about the center of the pillar at the southwest corner of the library. The base-line referred to as "31-Ft" was located 31 feet east of the windows on the main E/W base. This line runs between book case Rows 5 and 6, and between the east edge of the computer tables and the check-out desk. The other base-line in Team One's area is along the west edge of book case Row 4.

The bodies were numbered 1 through 12. Bodies 1 through 5 were in the east side of the library. Bodies 6 through 12 were in the west side of the library.
B 6--Matt Kechter
B 7--Isaiah Shoels
B 8--Steve Curnow
B 9--Cassie Bernall
B10--Kyle Velasquez
B11--Dylan Klebold
B12--Eric Harris

My assignment was to diagram and record the location of evidence in the west side of the library. The area encompassed: the windows; six tables placed at random; two computer tables placed east/west at the north end; four rows of book cases placed north/south; two microfiche viewers on tables, a magazine book case, and a typewriter table along the north wall. Two pillars immediately to the east of Row 5 provided the dividing line between Team One and Team Two.

The windows on the west side of the library sustained damage due to gun fire. Since the cracked areas of glass were not stable, and a weather front was moving in, priority was given to documenting the window area along the west wall. At about 1520 hours, CBI Agent Tom Griffin and I documented the windows using measurements written on Polaroid photos.

At about 1600 hours I began recording furniture dimensions. At about 1647 hours, after laying out a rough sketch, I began recording body measurements and locating evidence immediately around the bodies. I recorded locations for bodies B8, and B10-12. Tom Griffin recorded the locations for bodies B6-7 and B9.

I then continued with measuring items of evidence. I was assisted in measuring by several different people during the time I was at the scene. These included Tom Griffin of CBI, Matt Murray of Denver PD, Jennifer Savage of JCSD, and Peggy Rowlett of Wheat Ridge PD.

Times on scene in the library are as follows:

Wednesday, 04/21/99, from 1350 to 2125 hours
Thursday, 04/22/99, from 0800 to 1700 hours
Friday, 04/23/99, from 0800 to 1900 hours
Monday, 04/26/99, from 0800 to 1730 hours
Tuesday, 04/27/99, from 0730 to 1700 hours
Wednesday, 04/28/99, from 0720 to 1730 hours
Friday, 04/30/99, from 1100 to 1300

I returned to the school to verify measurements and obtain additional measurements on the following dates.

5/4/99, from 0700 to 0900 hours
5/21/99, from 1100 to 1400 hours
06/01/99, from 0730 to 0930

ARAPAHOE COUNTY SHERIFF'S OFFICE

Crime Lab Progress Report — ACSO CR # 99-16215
Assist to Outside Agency - Jefferson County Sheriff's Office — JCSD # 99-7625
Homicide - 6201 South Pierce Street
Senior Lab Tech Laura A. DeLong #9719 — Date of Report: 6/30/99

I worked on preparing a diagram on Autocad and turned over a copy of the file on disk to the FBI's Visual Specialist Paula Ernst on 5/6/99. This basically included the layout of the room and position of furniture and bodies.

Between 04/28/99 and 06/25/99 I worked on adding the location of all the evidence.
On 5/12/99 and 6/3/99, I met with Tom Griffin at CBI to compare photos of the scene with notes to verify positions of different pieces of evidence.

On 6/29/99, from 0900 to 1730 hours, I returned to the school and met with others originally at the scene (Griffin, Adair, Loptein, Rowlett, Jennings, Andrist) and DA Russ Boatwright to discuss the correlation of evidence with witness statements. As a result of reviewing more photos from the scene to the diagram prepared, and against the scene itself, I found that I needed to shift some chair positions, rotate the right foot of Eric Harris, and add a few items of evidence in the Team One area on the east side of the library.

JC-001-012654

ARAPAHOE COUNTY SHERIFF'S OFFICE

Crime Lab Progress Report — ACSO # 99-16215
Assist to Outside Agency -- Jefferson County Sheriff's Department — JCSD # 99-7625
Homicide--Columbine High School, 6201 S. Pierce Street
Sr. Lab Technician Laura A. DeLong #9719 — Date of Report: 7/8/99

Between 6/30/99 and 7/2/99 I modified the diagram of the library at Columbine High School as indicated in the report dated 6/30/99. The diagram was printed to fit the 8.5" x 11" format paper and details were also printed by segments to allow readability and submit to Records.

Poster size versions were submitted periodically to Team #2 Leader Tom Griffin of CBI for review. Large poster sizes of the 7/2/99 version will also be submitted to Tom Griffin.

A copy of the Autocad file disk was submitted to Paula Ernst, Visual Information Specialist of the FBI on this date.

Enclosed is the disk for the library, both Teams #1 and #2. The few missing locations for evidence on Team #1 side (east side) will be added after I can consult with Tom Adair.

Rather than give you select pages of notes for elevated views I am giving you all my notes. I believe I re-drew all the small sketches of chairs and table holes that were scattered through the notes on the latter "sketch" pages. One exception is the chair that was by B11 (Klebold).

I added a few notations to the window elevations that you received previously.

I didn't use any symbols to designate different types of evidence. The only coding is by color so far.

Chairs are separated by "trajectory" and "non-essential", meaning no evidence or trajectory was associated with the chairs. The only chair plotted in the service desk or check-out counter area was the one thrown on the counter.

I have not included the wall mounted televisions that were found in the northwest corner and the southeast corner, or the one between windows 10 and 11. No evidence was associated with the TVs.

Any evidence item number that is not marked with an"X" was not precisely measured and is only indicated relative to some other object. This occurs primarily in the east half and the north hallway. The stacked evidence item numbers found in the east half of the library and the north hallway are also relative placements.

Accredited by the Commission on Accreditation for Law Enforcement Agencies, American Correctional Association and National Commission on Correctional Health Care

Columbine High School Shooting
Submission of AutoCad disk and elevation sketches **7/8/99**

The stacked evidence item numbers around the bodies of Klebold and Harris (B11 and B12) were pieces of clothing, evidence found within the clothing, or items of weaponry.

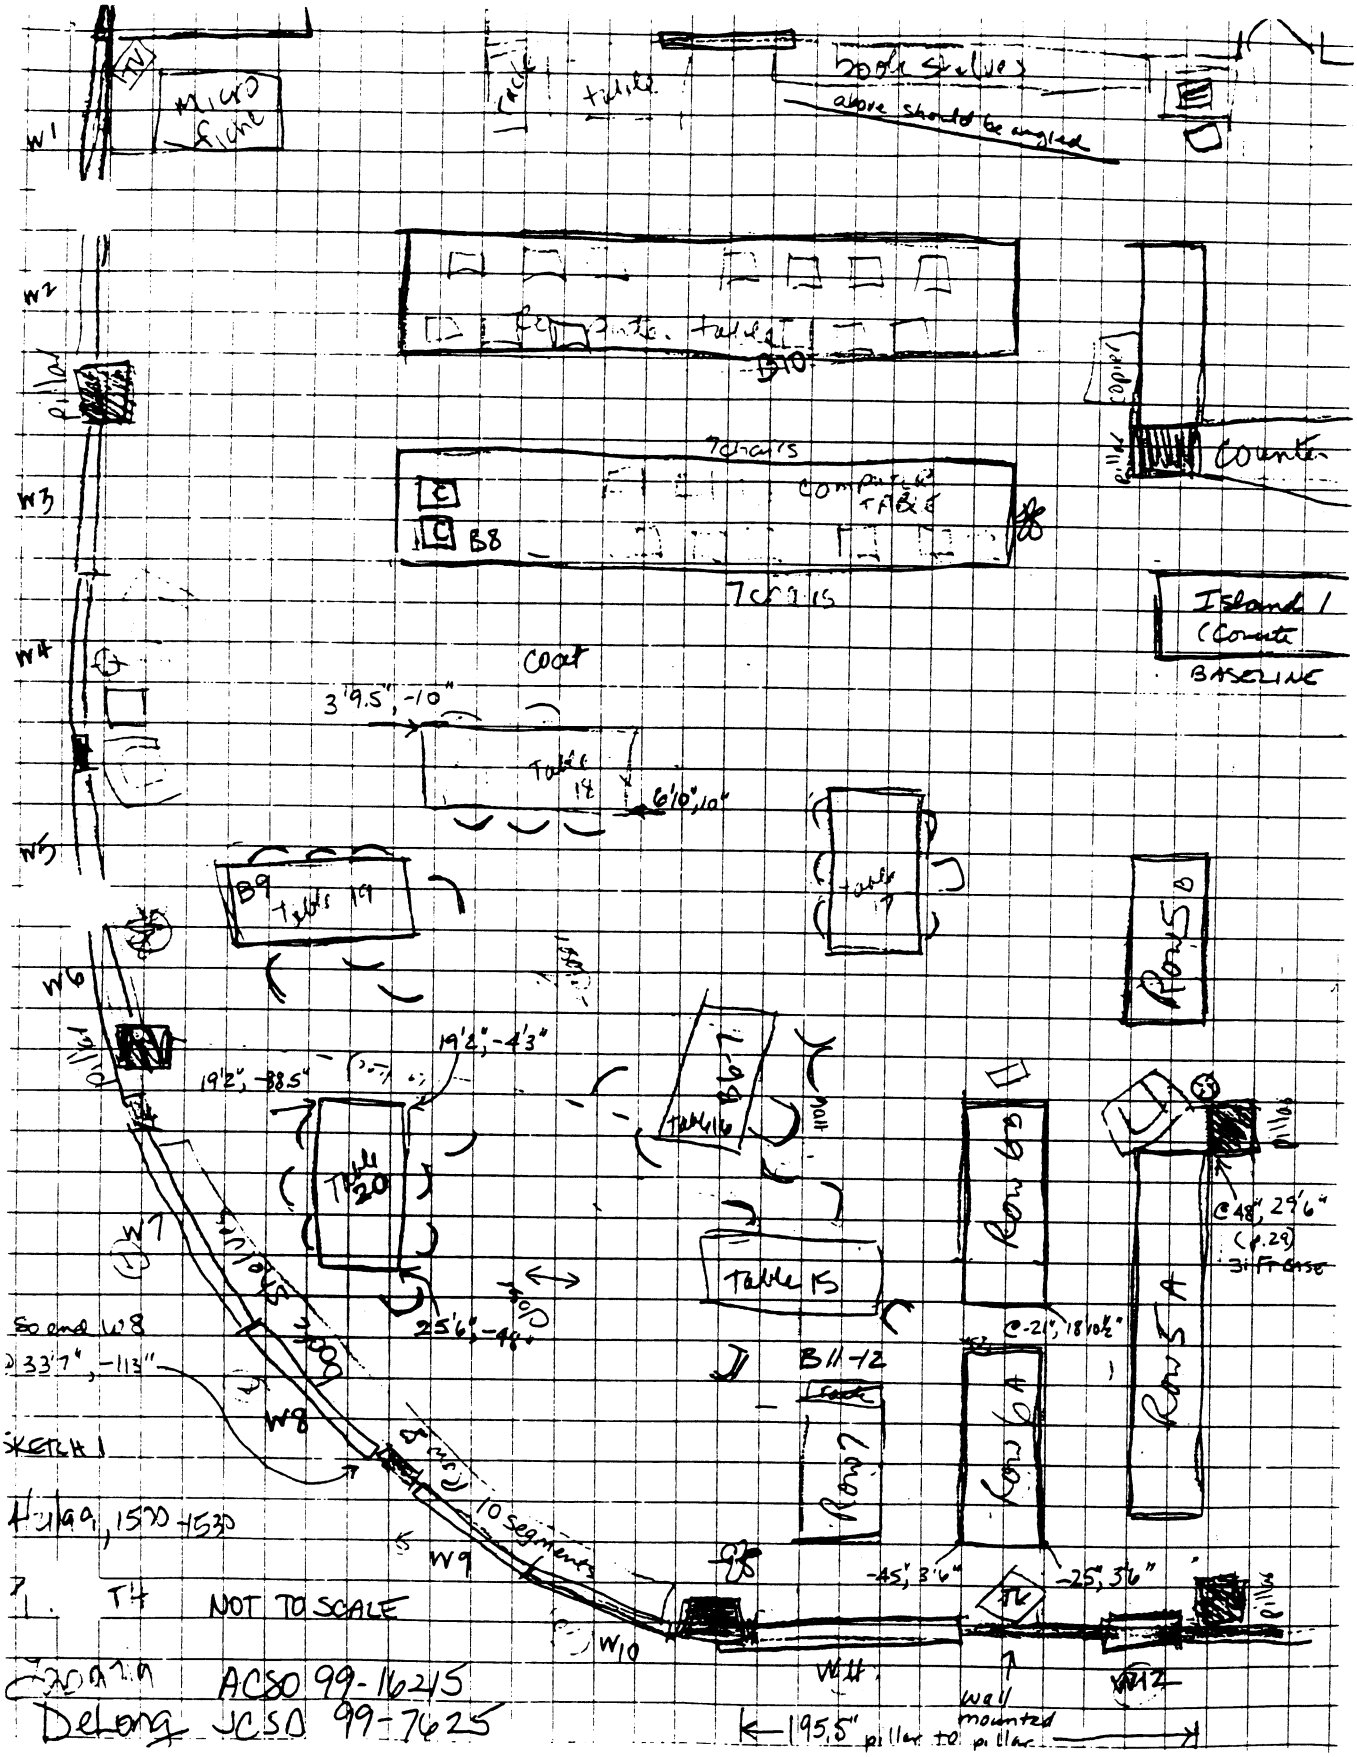

Tom Griffin, Agent with the Colorado Bureau of Investigation also indicated to me some "firearms discharge" events. Nothing has been done with these particular groupings, marked "FD"(number). These apparently will be further defined when all the firearms exams have been completed.

The designation of "shotgun related" was based on what I clearly knew to be shotgun type of ammunition parts. "Ammo related" refers to non-shotgun type of ammunition, a mixture of the two, or undistinguished.

Respectfully submitted,

Laura A. DeLong
