A Note from Dr. Langman

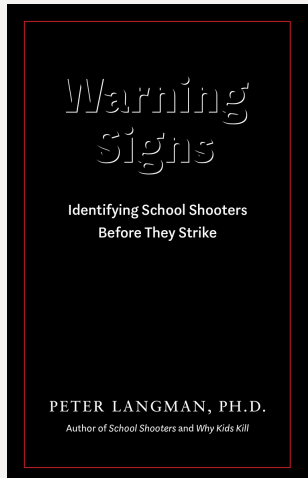

In a better world, this site wouldn’t exist. But, tragically, rampage attacks continue to devastate communities in the United States and around the world. At its most basic, *School Shooters .info* is a compendium of documents relating to a wide range of active shooter incidents in educational settings. We also provide a meticulously prepared database of information about perpetrators, a timeline of school shootings, and a memorial page commemorating those we have lost. The purpose of the site is to provide insight into the perpetrators of large-scale school violence and to educate professionals and the public about the warning signs of an impending attack. The materials on this site are relevant for professionals in education, mental health, law enforcement, and all levels of government, as well as journalists, professors, students, and anyone else with an interest in keeping kids safe. Together, we can work toward a world in which school shootings are nothing but a distant memory.

PETER LANGMAN, PH.D.
